USDA to Survey Small Grains Yield and Production

Columbia, MO – During the first two weeks of September, growers of small grains around the country will receive Agricultural Survey questionnaires from the U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS). The agency is taking a comprehensive look into the 2020 production and supply of small grains, including wheat, oats, barley, and rye.

“The small grains industry is an important part of Missouri’s agriculture,” said Bob Garino, Missouri State Statistician. “We will contact more than 2500 producers in Missouri to accurately measure 2020 acreage, yield, and production for

Missouri Winter Wheat 2015 - 2019

	Ac Harv	Bu/Ac	Bu Produced	Value of Prod	Sep 1 Stocks, Bu
2015	610,000	53	32,330,000	\$ 133,200,000	32,623,000
2016	570,000	70	39,900,000	\$ 159,201,000	40,919,000
2017	540,000	68	36,720,000	\$ 164,138,000	41,048,000
2018	520,000	59	30,680,000	\$ 148,491,000	35,224,000
2019	390,000	63	24,570,000	\$ 126,536,000	26,469,000

small grain crops in Missouri. This data is also used to help set small grain acreage, yield, and production estimates at the county level, which will be available in Quick Stats on the NASS website this December.”

NASS will contact Missouri farmers and ranchers to gather information on their 2020 production of small grains and the quantities of all grains stored on the farm. Producers are encouraged to respond conveniently online at agcounts.usda.gov. The online questionnaire is fast and secure. They may also return their completed surveys by mail. Farmers who have not responded by August 29 may receive a phone call from a NASS representative who will help them fill out the survey or schedule a time to do so.

“NASS safeguards the privacy of all respondents, by keeping responses confidential and publishing the data in aggregate form only, to ensure that no individual operation or producer can be identified,” stated Garino. “We recognize that this is a hectic time for farmers and ranchers, but the information that producers provide becomes useful data for decision-making on the farm, federal farm programs, and the markets. I urge them to respond to this survey, and thank them for their time and cooperation.”

NASS will publish the results in the annual *Small Grains Summary* and quarterly *Grain Stocks* report on September 30, available at nass.usda.gov/Publications. These survey data also contribute to the USDA’s World Agricultural Outlook Board’s monthly *World Agricultural Supply and Demand Estimates (WASDE)*. For more information, call the NASS Heartland Regional Field Office at 800-551-1014.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
