USDA TO CONDUCT QUARTERLY HOGS AND PIGS SURVEY

St. Louis, Missouri– The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) is contacting producers for the September Hogs and Pigs Survey. Each quarter this survey provides comprehensive information on market hog and breeding stock inventories as well as pig crop and farrowing intentions in the US.

"I encourage all sampled producers to respond to the September survey to ensure Illinois hog inventory continues to be accurately counted," said Brad Summa, NASS Heartland Regional Director. The data gathered in the September survey will allow NASS to accurately measure and report conditions and trends in the U.S. pork industry over the last three months. The information is used by all sectors of the industry, including producers themselves, to help make sound and timely business decisions.

NASS will mail the questionnaires to selected hog producers in late August. Farmers are encouraged to respond online at agcounts.usda.gov, or by mail. Alternatively, NASS representatives will contact those who have not responded to arrange telephone interviews to complete the survey.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified, as required by federal law. NASS will publish the survey results in the Quarterly Hogs and Pigs report on September 28, available online at www.nass.usda.gov/Publications.

For assistance with the survey, or for more information, contact the NASS Heartland Regional Field Office at (800) 551-1014 or nassrfohlr@usda.gov.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.
