Issue 18-2007

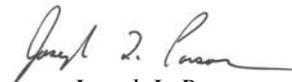

Released September 13, 2007

Dear Nebraska Farmers, Ranchers and Agribusinesses:

The following narrative and tables are from recently published reports by USDA's Agricultural Statistics Board. These data are direct results of information provided by Nebraska producers and agribusinesses to the surveys conducted each month by this office.

Thank you for your response to these surveys.

Joseph L. Parsons
Director

Crop Summary

Nebraska corn production based on conditions as of September 1, 2007, is forecast at 1.51 billion bushels, 4 percent above last month and 29 percent above last year. Yield is forecast at 174 bushels per acre, highest of record, 6 bushels above last month, and 22 bushels above a year ago. Soybean production is forecast at 205 million bushels, up 4 percent from last month but 18 percent below last year. Yield is forecast at a record high 52 bushels per acre, up 2 bushels per acre from August and 2 bushels above 2006. Sorghum production is forecast at 14.7 million bushels, up 3 percent from the August forecast but down 23 percent from last year. Yield forecast, at 98 bushels per acre, is up 3 bushels from the previous month, 18 bushels from last year, and equals the record set in 1994.

U.S. corn production is forecast at 13.3 billion bushels, based on September 1, 2007 conditions, up 2 percent from last month and 26 percent above 2006. Yields are expected to average 155.8 bushels per acre, up 3.0 bushels from August and 6.7 bushels above last year. Soybean production is forecast at 2.62 billion bushels, down slightly from the August forecast and down 18 percent from last year's record high. Yields are expected to average 41.4 bushels per acre, down 0.1 bushel from August and down 1.3 bushels last year. Sorghum production is forecast at 495 million bushels, up 4 percent from last month and up 78 percent from last year. Yield is forecast at 73.9 bushels per acre, up 3.0 bushels from August and up 17.7 bushels from last year.
