Corn price change - One **day** after **Production** report by number of reports (184)

Corn price change - One **week** after **Production** report by number of reports (184)

This report contains corn, soybean, and wheat price reactions to the USDA *Crop Production* and *Grain Stock* reports. This publication summarizes a larger report, *Price Reactions after USDA Crop Reports*, March 2022, which is available at www.nass.usda.gov/.

Each year, estimates of corn, soybean, and wheat production are published in the monthly *Crop Production* reports.

Corn estimates are included in the August, September, October, and November *Crop Production* reports and the January *Crop Production Annual Summary*.

Soybean estimates are published in the August, September, October, and November *Crop Production* reports and in the January *Crop Production Annual Summary*.

Wheat estimates are published in the May, June, July, and August *Crop Production* reports and the September *Small Grains Annual Summary*.

Estimates of corn, soybean and wheat stocks are published in the *Grain Stocks* report issued in March, June, September, and January.

The prices in this report for corn, soybeans, and wheat represent sales from producers to first buyers at major markets, as reported by the USDA Agricultural Marketing Service (AMS). The price data series used for each commodity is described below:

Commodity	AMS Market News Price Used
Corn	The closing cash price for Southern Iowa #2 yellow corn.
Soybeans	The average price paid at Southern Iowa points by processors.
Wheat	The closing cash price for Kansas City #1 hard winter wheat (ordinary protein).

Before May 1994, the quarterly *Grain Stocks* report, the monthly *Crop Production* report, as well as the *Annual Crop Production* and *Small Grain Summaries* all were published at 3:00 p.m. E.T.
