This report contains corn, soybean, and wheat price reactions to the USDA Crop Production and Grain Stock reports. This publication summarizes a larger report, Price Reactions after USDA Crop Reports, March 2022, which is available at www.nass.usda.gov.

Each year, estimates of corn, soybean, and wheat production are published in the monthly Crop Production reports.

Corn estimates are included in the August, September, October, and November Crop Production reports and the January Crop Production Annual Summary.

Soybean estimates are published in the August, September, October, and November Crop Production reports and in the January Crop Production Annual Summary.

Wheat estimates are published in the May, June, July, and August Crop Production reports and the September Small Grains Annual Summary.

Estimates of corn, soybean and wheat stocks are published in the Grain Stocks report issued in March, June, September, and January.

The prices in this report for corn, soybeans, and wheat represent sales from producers to first buyers at major markets, as reported by the USDA Agricultural Marketing Service (AMS). The price data series used for each commodity is described below:

<table>
<thead>
<tr>
<th>Commodity</th>
<th>AMS Market News Price Used</th>
</tr>
</thead>
<tbody>
<tr>
<td>Corn</td>
<td>The closing cash price for Southern Iowa #2 yellow corn.</td>
</tr>
<tr>
<td>Soybeans</td>
<td>The average price paid at Southern Iowa points by processors.</td>
</tr>
<tr>
<td>Wheat</td>
<td>The closing cash price for Kansas City #1 hard winter wheat (ordinary protein).</td>
</tr>
</tbody>
</table>

Before May 1994, the quarterly Grain Stocks report, the monthly Crop Production report, as well as the Annual Crop Production and Small Grain Summaries all were published at 3:00 p.m. E.T.
