Released May 9, 2022

Weather Summary

The average lows for Nevada ranged from 23 degrees in Ely to 62 degrees in Las Vegas. The average highs ranged from 75 degrees in Elko to 97 degrees in Las Vegas. Precipitation for Nevada ranged from 0.06 inches in Elko to 0.16 inches in Winnemucca.

Crops Summary

Days Suitable for Fieldwork: 6.7 days. Topsoil Moisture: 20% very short, 20% short, and 60% adequate. Subsoil Moisture: 10% very short, 40% short, and 50% adequate. Pasture and Range Condition: 25% Very Poor, 15% Poor, 45% Fair, and 15% Good. Warmer temperatures in the northwest allowed for better growing conditions for the crops. However, the week turned colder and windy. There was little to no precipitation in most parts of the states, except in some areas of the northeast, which reported upwards of half an inch of precipitation.

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil.
