

**CRANBERRIES**

Cranberry production in Massachusetts totaled nearly 1.5 million barrels in 2007, a 22 percent decrease from the previous year's production. Growers harvested 13,700 acres, 300 fewer than in 2006. The crop yield averaged 108.6 barrels per acre, a reduction of 26.8 barrels per acre from a year earlier. Lack of rainfall during August and the first half of September reduced the

potential size of the crop. Although berry size was below average in the state due to prolonged lack of moisture, fruit quality was above average. Massachusetts 2007 preliminary price for fresh cranberries averaged \$59.80 per barrel and processed cranberries averaged \$42.20 per barrel.
