

**2012 Cash Receipts**

New England cash receipts from farm marketings totaled \$2.702 billion in 2012, a decrease of \$67 million from the revised 2011 value. Cash receipts from milk sales, at \$795 million, remain the top contributor to overall sales. Greenhouse and nursery sales, at \$560 million, were the next largest cash contributor. Cash receipts from these two commodities comprised 50 percent of all farm sales in the 6-State region in 2012. Cash receipts were lower for greenhouse and nursery crops, apples, cranberries, wild blueberries, and milk but higher for other fruits and vegetables, poultry, aquaculture, cattle and calves, and other livestock.

Crop sales in New England in 2012 were estimated at \$1.372 billion, 1 percent below sales generated the previous year. The greenhouse and nursery industry remains New England's top contributor to crop sales, comprising 41 percent of the total. Fall potatoes were the second largest contributor accounting for 11 percent of all crop sales.

New England cash receipts generated from livestock, livestock products, poultry, and aquaculture in 2012 also totaled \$1.330 billion, 4 percent below 2011 but 14 percent higher than 2010. This decline is due mainly to lower milk sales and prices. Cash receipts from milk sales in New England totaled \$795 million, 9 percent below the previous year. Dairy producers received an average of \$19.75 per cwt for milk produced, \$2.04 per cwt less than a year earlier. Sales from chickens, eggs, turkeys and all other poultry totaled \$162 million, an increase of 7 percent from 2011 sales of \$151 million. Although fewer eggs were produced in the four major States, prices averaged 9.6 cents/dozen higher than in 2011. Cattle cash receipts were up 8 percent over 2011: improved prices received from marketings more than offset reduced sales.

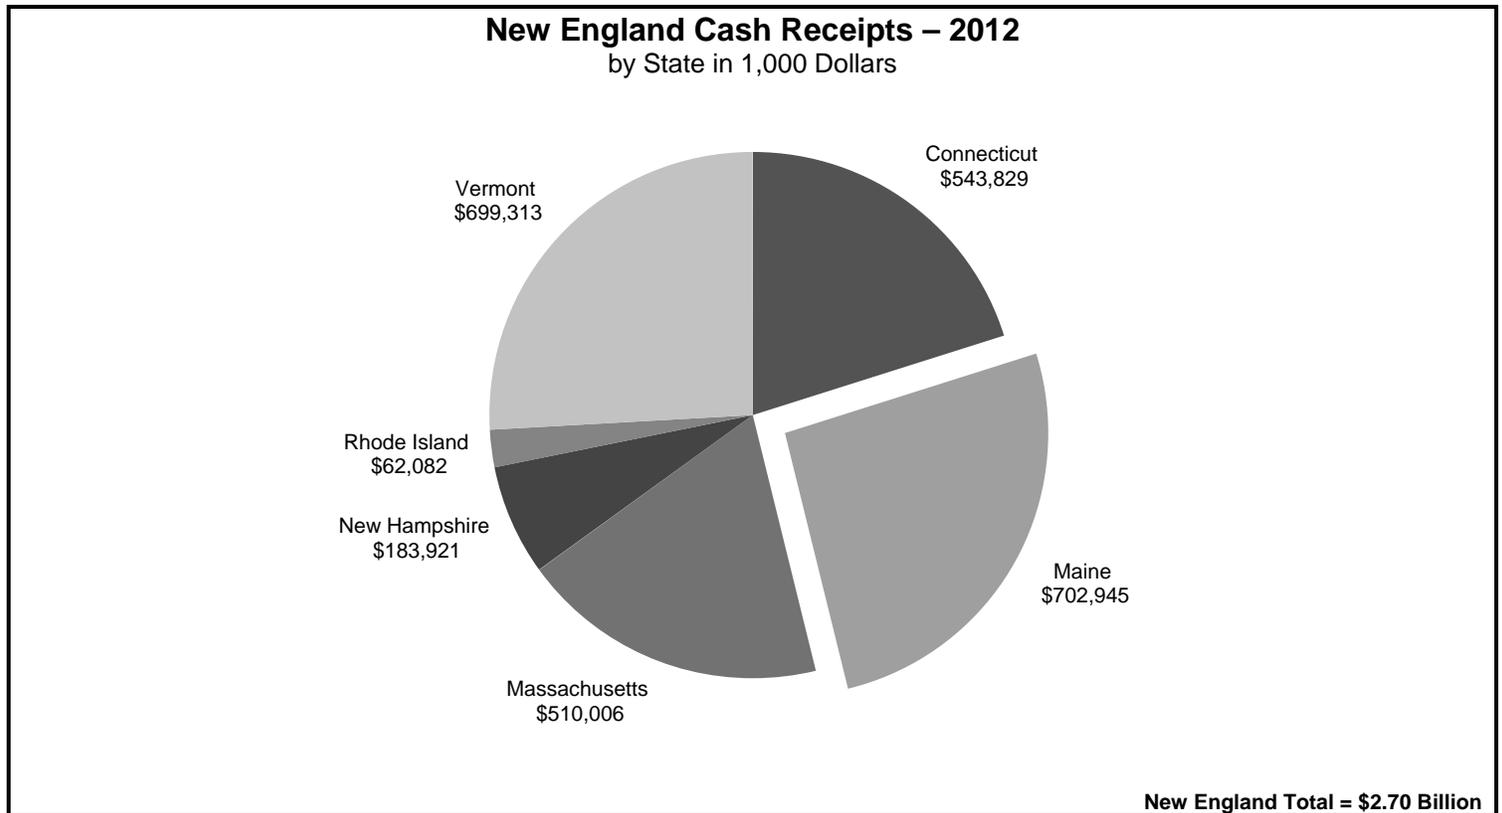

Maine earned first place in the region due to its diversity in agriculture cash receipts generated from fall potatoes, milk, poultry, aquaculture and wild blueberries. Total cash receipts from all agricultural commodities produced in the State totaled \$703 million, less than 1 percent below the previous year. Sales generated from fall potatoes remained the top individual contributor to the State's cash receipts total. The value of Maine potatoes marketed in 2012 totaled \$141 million, 5 percent below 2011. Milk sales followed at \$124 million,

down 7 percent from a year earlier. A total of 609 million pounds of milk were utilized in 2012, with returns to producers averaging \$20.40 per cwt.. Preliminary aquaculture cash receipts were placed at \$78.7 million for 2012, up slightly from \$78.0 million in 2011. Poultry cash receipts were placed at \$69.9 million, up 7 percent. Wild blueberry sales contributed \$69.1 million, 5 percent below the previous year. Wild blueberry processing prices averaged \$0.75 per pound, down \$0.15 per pound from 2011.

Vermont was second in the region with \$699 million in the State, 8 percent below the previous year. The value of milk sales totaled \$501 million, 8 percent below a year earlier. Vermont milk sales remained the top individual contributor accounting for 72 percent of Vermont's total cash receipts. Dairy producers in Vermont received on average \$19.60 per cwt for the 2.554 billion pounds sold.

Connecticut was third in the region with \$544 million in cash receipts, up less than 1 percent from 2011. Cash receipts from greenhouse and nursery products were estimated at \$236 million, 43 percent of the State's cash receipts total. Milk sales were the next largest contributor to Connecticut's cash receipts, with \$70 million in total revenue generated. Monies received from milk were down 11 percent from the previous year due to decreased prices received.

Massachusetts followed with \$510 million in total 2012 cash receipts, less than 1 percent below the previous year. Greenhouse and nursery sales remained the top contributor to Massachusetts' total cash receipts, with sales estimated at \$156.3 million. Cranberries, at \$99.8 million, were the next largest contributor to the State's cash receipts total. Growers marketed fewer barrels but higher prices received limited cranberry receipts to 4 percent below the previous year. New Hampshire's cash receipts totaled \$184 million in 2012, with greenhouse and nursery sales and milk comprising 58 percent of all receipts. Decreases in pounds of milk marketed and lower milk prices kept milk value 13 percent below the previous year. Rhode Island's greenhouse and nursery industry dominated the State's agricultural cash receipts, comprising \$33.3 million of the total \$62.1 million generated in 2012.
