United States Summary

Corn Planted Acreage Up 3 Percent from 2018

Soybean Acreage Down 10 Percent

All Wheat Acreage Down 5 Percent

Corn: The 2019 corn planted area for all purposes is estimated at 91.7 million acres, up 3 percent from last year. Growers expect to harvest 83.6 million acres for grain, up 2 percent from last year.

Soybeans: The 2019 soybean planted area is estimated at 80.0 million acres, down 10 percent from last year. Compared with last year, planted acreage is down in all 29 major producing States. Area for harvest, forecast at 79.3 million acres, is down 10 percent from 2018.

All wheat planted area for 2019 is estimated at 45.6 million acres, down 5 percent from 2018. This represents the lowest all wheat planted area on record since records began in 1919. The 2019 winter wheat planted area, at 31.8 million acres, is down 2 percent from last year but up 1 percent from the previous estimate. Of this total, about 22.7 million acres are Hard Red Winter, 5.54 million acres are Soft Red Winter, and 3.55 million acres are White Winter. Area planted to other spring wheat for 2019 is estimated at 12.4 million acres, down 6 percent from 2018. Of this total, about 12.0 million acres are Hard Red Spring wheat. Durum planted area for 2019 is estimated at 1.40 million acres, down 32 percent from the previous year.

Oats: Area seeded to oats for the 2019 crop year is estimated at 2.55 million acres, down slightly from 2018 for comparable States. Compared with last year, planted acreage is down or unchanged in 13 of the 23 major producing States. Decreases of 20,000 acres or more are estimated in California, North Dakota, South Dakota, Michigan, Nebraska, and Texas. Area for harvest, forecast at 909,000 acres, is up 10 percent from 2018 for comparable States.

Barley: Producers seeded 2.86 million acres of barley for the 2019 crop year, up 12 percent from the previous year. Harvested area, forecast at 2.33 million acres, is up 18 percent from 2018.

Nine percent of the Nation's barley acreage had reached the heading stage by June 23, sixteen percentage points behind the previous year and 21 percentage points behind the 5-year average. On June 23, seventy-two percent of the Nation's barley acreage was reported in good to excellent condition, eleven percentage points behind the same time last year.

Winter wheat: The 2019 winter wheat planted area is estimated at 31.8 million acres, down 2 percent from last year but up 1 percent from the previous estimate. This represents the second lowest planted acreage on record for the United States. Of the total acreage, about 22.7 million acres are Hard Red Winter, 5.54 million acres are Soft Red Winter, and 3.55 million acres are White Winter. Record low planted acreages are estimated in Nebraska, New Jersey, and Ohio.

Area harvested for grain is forecast at 24.9 million acres, down 1 percent from the previous forecast but up 1 percent from last year. This will represent the second lowest harvested acreage on record for the United States. Harvested acres are down from last year across much of the Great Plains, the primary wheat-producing area, and much of the soft red wheat producing area due to the reduction in planted acreage. Record low harvested acreage is expected in New Jersey, Ohio, and Virginia.

Hay: Producers intend to harvest 52.8 million acres of all hay in 2019, down less than 1 percent from 2018. If realized, this will represent the lowest total hay harvested area since 1908. The decrease in acreage is due to a 1 percent decrease in all other hay (excluding alfalfa) acreage compared to 2018. Acres of alfalfa and alfalfa mixtures are expected to be up 1 percent compared with 2018.

Record low all hay harvested area is expected in California, Illinois, Maine, Michigan, New York, Ohio, Pennsylvania, Vermont, Washington, and West Virginia in 2019.

Tobacco: United States all tobacco area for harvest in 2019 is expected to be 235,820 acres, down 19 percent from 2018. If realized, this will be the lowest tobacco acres harvest on record. Flue-cured tobacco, at 159,000 acres, is 20 percent below 2018 and accounts for 67 percent of this year's total expected tobacco acreage. Total light air-cured tobacco type area, at 53,100 acres, is down 15 percent from 2018. The burley portion of light-air cured tobacco, at 52,100 acres, is down 15 percent from last year.

Fire-cured tobacco, at 14,620 acres, is down 23 percent from 2018. Dark air-cured tobacco, at 6,900 acres, is down 30 percent from last year. Cigar filler tobacco, at 2,200 acres, is down 8 percent from the previous year.

Potatoes: Area planted to potatoes in 2019 is estimated at 967,500 acres of potatoes, up slightly from 2018 for comparable States. Harvested area is forecast at 959,600 acres, slightly above comparable States from the previous year. Idaho's winter lasted longer than the previous year and slowed the development of potatoes in areas of the State. As of June 16, seventy-five percent of the potato crop had emerged, behind the 5-year average of 92 percent. Winter and spring precipitation in Washington was good. North Dakota's planting began in late April, ahead of the 2018 pace but behind the 5-year average. It advanced ahead of the 5-year average half-way through the planting season. Beginning in 2019, potato estimates were discontinued in Alaska, Illinois, Kansas, Maryland, Missouri, Montana, New Jersey, New York, North Carolina, and Virginia.
