New England Vegetable and Strawberry Report, 2018 Crop

We are pleased to present the New England Vegetable and Strawberry Report for crops produced in 2018. USDA’s National Agricultural Statistics Service (NASS), Northeast Regional Field Office collects, analyzes, and estimates fruit and vegetable prices and yields at the request of USDA Farm Service Agency (FSA). Funding was provided by the State Departments of Agriculture in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. This data series provides a valuable tool for growers to use in making production and marketing decisions and as a valuable tool for growers to use in making production and marketing decisions. This publication compiles New England vegetable data from 2014 through 2018 into one report. Since total acreage data are not available for most fruit and vegetable crops, data from the 2017 Census of Agriculture are also included. Published prices and yields do not distinguish between organically and conventionally grown products.

The success of this project is credited to the cooperation of growers across New England. We sincerely appreciate their time and effort in supplying crop information. As with all NASS surveys, individual grower information is kept strictly confidential and is exempted from requests under the Freedom of Information Act. The individual reports were used only in combination with other reports to establish State and regional estimates.

Over 2,000 vegetable producer responses were tabulated for this publication. Producers in the six State region were asked to provide acreage, production, and price information for vegetable crops.

</table>

(D) Data withheld to avoid disclosing information for individual farms or insufficient number of reports to set estimate.

1 Number of farms reporting production or yield. Discontinued beginning in 2014.

2 Total tabulated pounds produced per bearing acre harvested.

3 Number of farms reporting a berry price.

4 Average price per pound received at point of first sale. Fresh market average of retail and wholesale sales.

NASS provides accurate, timely, and useful statistics in service to U.S. agriculture. USDA is an equal opportunity provider, employer and lender. (D) Data withheld to avoid disclosing information for individual farms.

1 ME, MA, RI yield and price for all uses including fresh market, processing, seed, and feed.
2 CT, NH, VT yield for fresh market only; price is fresh market average of retail and wholesale sales. Average price is higher than ME, MA, and RI price because the crop is sold by the pound.
3 Revised.
4 Preliminary.

(D) Data withheld to avoid disclosing information for individual farms.

¹ A farm is any place from which $1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.

² The acres of vegetables harvested is the summation of the acres of individual vegetables harvested for fresh market. Vegetable acreage harvested for processing is excluded. All the individual vegetable crops are not shown.

³ Orchard land includes land in bearing and non-bearing fruit trees, vineyards, and nut trees of all ages, including land on which all fruit crops failed. Respondents were instructed not to report abandoned plantings and plantings of fewer than 20 total fruit trees, nut trees, or grapevines.

⁴ Acreage includes area harvested for fresh and processing.
