Temperatures averaged below normal across most of the state. There were measurable amounts of precipitation across most of the state for the week. Weekly rainfall averaged 3.43 inches north, 3.42 inches central, and 4.11 inches south. The heaviest 24 hour total reported was 3.11 inches at Freehold on September 2, 2006 to September 3, 2006. Agricultural producers continued harvesting where conditions permitted. Producers applied sprays for disease treatment. Planting of fall cover crops began in some southern localities. Harvest of potatoes, sweet corn, tomatoes, cantaloupe, eggplant, peppers, and cucumbers progressed. There was some splitting of cantaloupes, and some rot in peppers and cucumbers in the northern district. Reporters in the northern district also reported pumpkin loss due to phytophthora. Mowing and baling of hay continued. Hay condition was rated mostly fair to good. Corn and soybean development continued to progress. Corn and soybean condition was rated poor to good condition. Peach and apple harvest continued, with apples and peaches rated mostly good condition. There was some splitting of peaches reported in the northern district. Pasture was rated poor to excellent condition.

**Rainfall Improved Moisture Condition**

**JERSEY FRESH AVAILABILITY FOR SEPTEMBER 5, 2006**

- **Arugula & Cilantro** – A fair to good quality and quantity of products are being harvested.
- **Baby Arugula & Baby Spinach** - Harvesting in good quality and volume.
- **Basil** – Harvesting a fair to good quantity and quality of product.
- **Beets** – A good volume of good quality product is available.
- **Cabbage** – Harvesting good quantities of very good quality product.
- **Dill & Parsley** – A fair volume of fair to good quality product available.
- **Cucumbers/Pickles** – Harvesting a fair to good quantity and quality of Cukes and Pickles (Kirby cucumbers).
- **Eggplant** – Harvesting a fair volume of excellent quality product. Quality not affected by the rain though harvesting efforts have been.
- **Escarole/Endive** – Just starting the harvest of fair to good quality product. It will take at least a week or more for volume.
- **Greens** - Good quantities of fair to good quality Collards, Kale, Kohlrabi, Mustard, Dandelions, and Swiss Chard.
- **Leeks & Green Onions** – Harvesting in good quality and quantity.
- **Nectarines** – The Fantasia variety is finishing up. Fruit quality, including size, is good.
- **Peaches** – Encore, our most heavily planted yellow peach variety, is being harvested in fair volume along with the Laural variety. For white peaches, Lady Nancy is finishing up as Snow Giant is being harvested in fair volume. Fruit quality, including size and color, is good for all varieties. We’ll have a decreasing volume of good quality peaches for at least another week.
- **Peppers** – Harvesting a good volume of fair to good quality product though some growers have had some weather related quality issues and harvesting abilities. We also have an excellent assortment of great quality hot peppers available.
- **Squash** – Many new fields have begun harvesting recently. Harvesting fair to good quantities of good quality yellow, zucchini, butternut, acorn and spaghetti squash.
- **Tomatoes** – Wet fields and erratic harvesting ability have caused a wide range in quantity and quality this week.
- **Sweet Corn** – Harvesting a good volume of fair to good quality corn. Quantity and quality varies now due to Fall insect pressures.
