USDA to forecast cranberry production

HARRISBURG, PA – The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will conduct a forecast survey for 2023 cranberry production during August 2023. This survey can be completed by mail, phone, or online at agcounts.usda.gov.

“The information from this survey directly impacts our regions’ growers by providing a forecast of production throughout the country,” said King Whetstone, director of the NASS Northeastern Regional Field Office. “States with cranberry growers participating in this survey include Massachusetts, New Jersey, Oregon, and Wisconsin.”

In these surveys, NASS asks participants to answer a variety of questions about cranberries. For their convenience, survey participants have the option to respond online. As with all NASS surveys, all information from respondents is kept confidential as required by federal law. NASS safeguards the confidentiality of all responses and publishes only state and national level data, ensuring that no individual producer or operation can be identified.

NASS will compile, analyze, and publish survey results in the August 11, 2023 *Crop Production* report. All previous publications are available online at nass.usda.gov/Publications. For more information on NASS surveys and reports, call the NASS Northeastern Regional Field Office at (800) 498-1518.
