## **Still time to respond to the 2022 Census of Agriculture** *USDA to follow up with producers who have not yet responded*

**TRENTON, NJ** - Farmers still have time to be counted in the 2022 Census of Agriculture, according to the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS). Although the deadline for submitting the ag census has just passed, NASS will continue to accept completed census questionnaires through the spring to ensure all farmers and ranchers take advantage of the opportunity to be represented in the widely used data.

"My sincere appreciation goes to producers who have already completed the census. We want to partner with New Jersey producers to show the importance of New Jersey agriculture," said NASS New Jersey State Statistician Bruce Eklund. "Advocates of agriculture will use your census data often over these next five years. The time to do your part is now. There is still time for farmers to respond."

NASS will continue to follow up with producers through the spring with mailings, phone calls, and personal visits. Farmers and ranchers are encouraged to complete their ag census either online at [agcounts.usda.gov](http://agcounts.usda.gov) or by mail as soon as possible.

Federal law under Title 7 USC 2204(g) Public Law 105-113 mandates that everyone who received the 2022 Census of Agriculture questionnaire complete and return it, even if they are not currently farming. The same law requires NASS to keep all submissions confidential, use the information for statistical purposes only, and publish aggregate data to prevent disclosing the identity of any individual producer or farm operation.

NASS will release the results of the ag census in early 2024. To learn more about the Census of Agriculture, visit [nass.usda.gov/AgCensus](http://nass.usda.gov/AgCensus). On the website, producers and other data users can access frequently asked questions, past ag census data, special study information, and more. For highlights of these and the latest information, follow USDA NASS on Twitter at [@usda\\_nass](https://twitter.com/usda_nass).

###

*NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate, and useful statistics in service to U.S. agriculture.*

*USDA is an equal opportunity provider, employer, and lender.*
