SEPTEMBER MILK PRODUCTION

NEW MEXICO: Milk production in New Mexico during July totaled 695 million pounds, up 2.4 percent from July 2010. Production per cow averaged 2,105 pounds for July, 10 pounds above July 2010. The number of milk cows on New Mexico farms was 330,000 head, 6,000 more than July 2010.

UNITED STATES: Milk production in the 23 major States during July totaled 15.4 billion pounds, up 0.8 percent from July 2010. June revised production at 15.4 billion pounds, was up 1.3 percent from June 2010. The June revision represented a decrease of 5 million pounds or less than 0.1 percent from last month's preliminary production estimate. Production per cow in the 23 major States averaged 1,824 pounds for July, 5 pounds below July 2010. The number of milk cows on farms in the 23 major States was 8.47 million head, 93,000 head more than July 2010, and 8,000 head more than June 2011.

1/ Includes dry cows; excludes heifers not yet fresh. 2/ Excludes milk sucked by calves.

23 States also include FL, MI, MN, MO, PA, VA, VT

SEPTEMBER CROP PRODUCTION

NEW MEXICO: Sorghum for grain production is forecast at 2.9 million bushels with yields of 59.0 bushels per acre. This compares to 4.5 million bushels in 2010 with yields of 66.0 bushels per acre. **Peanut** harvested acreage in 2011 is forecast at 7,000 acres with total production of 21 million pounds. This compares to 10,000 harvested acres in 2010 with total production of 21.7 million pounds. **Upland** cotton yields in 2010 are forecast at 1,005 pounds per acre with 43,000 harvested acres bringing total production to 90,000 bales. American-Pima harvested acreage is forecast at 3,000 acres with yields of 928 pounds per acre and total production at 5.8 thousand bales.

UNITED STATES: Corn production is forecast at 12.5 billion bushels, down 3 percent from the August forecast but up fractionally from 2010. If realized, this will be the third largest

production total on record for the United States. Based on conditions as of September 1, yields are expected to average 148.1 bushels per acre, down 4.9 bushels from the August 1 forecast and down 4.7 bushels from 2010. If realized, this will be the lowest average yield in the United States since 2005. **Soybean** production is forecast at 3.09 billion bushels, up 1 percent from August but down 7 percent from last year. Based on September 1 conditions, yields are expected to average 41.8 bushels per acre, up 0.4 bushel from last month but down 1.7 bushels from last year. Area for harvest in the United States is forecast at 73.8 million acres, unchanged from August but down 4 percent from 2010. **All cotton** production is forecast at 16.6 million 480-pound bales, up fractionally from last month but down 9 percent from last year. Yield is expected to average 807 pounds per harvested acre, down 5 pounds from last year. Upland cotton production is forecast at 15.8 million 480-pound bales, down 10 percent from 2010. American Pima production, forecast at 737,200 bales, was carried forward from last month.

U.S. CANADIAN CATTLE INVENTORY DOWN 1 PERCENT

UNITED STATES: All cattle and calves in the United States and Canada combined totaled 113.9 million head on July 1, 2011, down 1 percent from the 115.1 million on July 1, 2010. All cows and heifers that have calved, at 45.8 million head, were down 1 percent from a year ago. All cattle and calves in the United States as of July 1, 2011, totaled 100.0

million head, 1 percent below the 101.1 million on July 1, 2010. All cows and heifers that have calved, at 40.6 million head, were down 1 percent from a year ago. All cattle and calves in Canada as of July 1, 2011, totaled 13.9 million head, down 1 percent from the 14.0 million on July 1, 2010. All cows and heifers that have calved, at 5.18 million, were down 2 percent from a year ago.

CROP SUMMARY FOR THE WEEK ENDING September 18, 2011

NEW MEXICO: Alfalfa conditions were mostly fair to good; fourth cutting 100% complete; fifth cutting 84% complete; sixth cutting 30% complete. Corn was mostly fair; 98% dough; 78% dent; 22% mature. Corn silage was 74% harvested. Cotton was mostly poor to fair; 100% setting bolls; 72% bolls opening. Sorghum ranged from mostly very poor to fair; 90% headed; 40% turning color. Winter wheat 41% planted. Peanuts were mostly fair; 100% pegging. Chile was mostly fair; green 85% harvested. Pecan conditions were mostly good. Apples were mostly good; 50% harvested. Cattle conditions were mostly poor. Sheep conditions were mostly poor. Range and pasture conditions were mostly very poor. Days suitable for fieldwork were 6.3. Topsoil moisture was 41% very short, 45% short and 14% adequate. Wind damage was 15% light and 1% moderate; 8% wind damage to cotton to date and 5% wind damage to sorghum to date. Hail damage was 2% light; 1% hail damage to cotton, 1% hail damage to corn and 1% hail damage to sorghum to date.

Seven Day Observed Precipitation September 19, 2011

Additional Comments: Santa Fe: Isolated showers were received throughout the course of the week once again in various areas of the county. Temperatures have been dropping especially at night. Curry: Spotted showers but no large amounts. A tint of green is spotty at best. Good to moderate rainfall in the area this week but not sufficient to negate drought conditions. Some wheat will be planted in the area when the ground dries sufficiently. Some area of rangeland may see some grass heading and improve conditions for winter grazing but much more needed and time is short before normal frost. Corn harvest in progress but most going as silage. Hay producers baling fifth cutting and there will be some damage from the rains. Demand very strong and hay being loaded as quickly as it is baled. DeBaca: Precipitation received throughout the county - .25 to 1.5 inches scattered on 9/14/2011. This rain will really help out the dry pastures but may be a little late to make much grass growth this growing season. Eddy: Parts of the county received much needed rain over the weekend, up to 1.97" of rain. Otero: The pistachio harvest is complete.

WEATHER SUMMARY

A cold front and a low pressure system moved through New Mexico by mid week increasing showers and thunderstorms. Highest total rainfall amounts included 2.05 inches at Tucumcari, 1.75 at Raton, 1.35 at Tatum and 1.16 inches at Chama. Low temperatures ranged from the mid 50s across the northeast corner to the mid 60s to 70s across the state behind this front. Most of the state had near normal temperatures with the exception of the northern portion of the state which was a few degrees below normal.

CATTLE ON FEED

UNITED STATES: Cattle and calves on feed for slaughter market in the United States for feedlots with capacity of 1,000 or more head totaled 10.6 million head on August 1, 2011. The inventory was 8 percent above August 1, 2010. This is the third highest August 1 inventory since the series began in 1996. Placements in feedlots during July totaled 2.15 million, 22 percent above 2010. This is the highest placement total for the month of July since the series began in 1996. Net placements were 2.09 million head. During July, placements of

cattle and calves weighing less than 600 pounds were 625,000, 600-699 pounds were 405,000, 700-799 pounds were 498,000, and 800 pounds and greater were 625,000. Marketings of fed cattle during July totaled 1.91 million, slightly above 2010. This is the second lowest fed cattle marketings for the month of July since the series began in 1996. Other disappearance totaled 67,000 during July, 40 percent above 2010.
