(D) Withheld to avoid disclosing data for individual operations.
November Prices Received Index Up 1.9 Percent

The November Prices Received Index 2011 Base (Agricultural Production), at 108.8, increased 1.9 percent from October and 17 percent from November 2020. At 107.3, the Crop Production Index was up 1.2 percent from last month and 17 percent from the previous year. The Livestock Production Index, at 110.6, increased 2.3 percent from October and 18 percent from November last year. Producers received higher prices during November for cattle, corn, soybeans, and milk but lower prices for lettuce, hogs, turkeys, and dry beans. In addition to prices, the volume change of commodities marketed also influences the indexes. In November, there was increased monthly movement for corn, milk, cotton, and cattle and decreased marketing of soybeans, grapes, wheat, and lettuce.

November Prices Paid Index Up 0.7 Percent

The November Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 118.5, is up 0.7 percent from October 2021 and 8.1 percent from November 2020. Higher prices in November for nitrogen, mixed fertilizer, complete feeds, and feed grains more than offset lower prices for LP gas, feeder pigs, and hay & forages.
