FARMS AND LAND IN FARMS

ARIZONA

The number of farms and ranches in Arizona in 2022 totaled 18,800, down 200 farms or 1 percent from the 2021 estimate. Total land in farms in Arizona, at 26.1 million acres, declined less than half of 1 percent from the 2021 estimate. The average size of farm was 1,388 acres, compared with 1,379 acres the previous year.

COLORADO

The number of farms and ranches in Colorado in 2022 totaled 38,800, down 200 operations from the 2021 estimate. Total land in farms in Colorado, at 31.8 million acres, was unchanged from the 2021 estimate. The average size of farm was 820 acres, compared with 815 acres the previous year.

MONTANA

The number of farms and ranches in Montana in 2022 totaled 27,100, unchanged from the 2021 estimate. Total land in farms in Montana, at 57.9 million acres, was also unchanged from the 2021 estimate. The average size of farm was 2,137 acres, compared with 2,137 acres the previous year.

NEW MEXICO

The number of farms and ranches in New Mexico in 2022 totaled 24,100, down 600 operations from the 2021 estimate. Total land in farms in New Mexico, at 40.0 million acres, was unchanged from the 2021 estimate. The average size of farm was 1,660 acres, compared with 1,619 acres the previous year.

UTAH

The number of farms and ranches in Utah in 2022 totaled 17,900, unchanged from the 2021 estimate. Total land in farms in Utah, at 10.9 million acres, was up 2 percent from the 2021 estimate. The average size of farm was 609 acres, compared with 598 acres the previous year.

WYOMING

The number of farms and ranches in Wyoming in 2022 totaled 11,900, down 300 operations from the 2021 estimate. Total land in farms in Wyoming, at 28.5 million acres, was down 2 percent from the 2021 estimate. The average size of farm was 2,395 acres, compared with 2,377 acres the previous year.

UNITED STATES

The number of farms in the United States for 2022 is estimated at 2,002,700, down 9,350 farms from 2021. The number of farms increased in all sales classes except the \$1,000-\$9,999 and \$10,000-\$99,999 sales classes. In 2022, 50.8 percent of all farms had less than \$10,000 in sales and 81.4 percent of all farms had less than \$100,000 in sales. In 2022, 7.5 percent of all farms had sales of \$500,000 or more.

Total land in farms, at 893,400,000 acres, decreased 1,900,000 acres from 2021. The biggest change for 2022 is that producers in Sales Class \$100,000 - \$249,999 operated 1,620,000 fewer acres than in 2021. In 2022, 30.0 percent of all farmland was operated by farms with less than \$100,000 in sales, while 41.2 percent of all farmland was operated by farms with sales of \$500,000 or more.

The average farm size for 2022 is 446 acres, up from 445 acres the previous year. Average farm size increased in the \$1,000,000 or more sales class and decreased or remained unchanged in all other sales classes.

USDA's definition of a farm is "any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the year." Government payments are included in sales. Ranches, institutional farms, experimental and research farms, and Indian Reservations are included as farms. Places with the entire acreage enrolled in the Conservation Reserve Program (CRP), Wetlands Reserve Program (WRP), and other government conservation programs are counted as farms.

The definition of a farm was first established in 1850 and has changed nine times since. The current definition was first used for the 1974 Census.

Land in farms consists of agricultural land used for crops, pasture, or grazing. Also included is woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. Land in farms includes acres in CRP, WRP, and other government conservation programs. Land in farms includes land owned and operated as well as land rented from others. Land used rent-free is included as land rented from others. All grazing land, except land used under government permits on a per-head basis, is included as land in farms provided it was part of a farm or ranch. Land under the exclusive use of a grazing association is reported by the grazing association and included as land in farms. All land in American Indian reservations used for growing crops or grazing livestock is included as land in farms. Land in reservations not reported by individual American Indians or non-Native Americans is reported in the name of the cooperative group that used the land. In many instances, the entire American Indian reservation is reported as one farm.

Economic sales classes are based on the gross value of agricultural products sold. Government program payments are also included.

Point Farms are places that did not have \$1,000 of reported sales for the year, but had sufficient crops and livestock to normally have sales of \$1,000 or more.
