

Crops

FIELD CROPS

The 2005 crop year got off to a good start due to excellent weather conditions during the planting season. The ideal weather encouraged fieldwork and pushed planting progress ahead of last year. Ample moisture at the end of the season allowed grain yields to be good yet prevented farmers from making dry hay.

Grain Corn

New York production is estimated at 57.0 million bushels, down 6 percent from last year. Area for harvest totaled 460,000 acres, down 8 percent from a year ago. Yields averaged a record high 124 bushels per acre, up 2 bushels from 2004. Production was valued at \$116 million, down 19 percent from 2004.

Silage Corn

Corn cut for silage totaled 8.84 million tons, an increase of 11 percent from last year. Area for harvest increased 11 percent to 520,000 acres. Yields are estimated at 17.0 tons per acre, the same as a year earlier. Production was valued at \$6.48 million, up 11 percent from 2004.

Soybeans

The 2005 soybean crop was estimated at a record high 7.90 million bushels, 18 percent above last year's production. Area harvested, also a record high at 188,000 acres, was up 9 percent from a year ago. Yields averaged 42 bushels per acre, the highest yield on record. The value of the 2005 soybean crop was set at \$41.1 million, up 13 percent from the previous year.

Wheat

Production totaled 5.13 million bushels, down 3 percent from the previous year. Harvested acreage, at 95,000 acres, was down 5 percent from 2004. Winter wheat yields averaged 54 bushels per acre, up 1 bushel a year ago. Winter wheat was valued at \$15.6 million, up 5 percent from a year ago.

Oats

Production, at 4.05 million bushels, was up 25 percent from the previous year. Area harvested, at 75,000 acres, was up 50 percent from last year. The average yield, at 54 bushels per acre, was down 9 bushels from a year ago. Oat production was valued at \$6.48 million, up 11 percent from 2004.

Barley

Production of barley in New York totaled 735,000 bushels, up 39 percent from a year earlier. Acreage harvested for grain totaled 15,000 acres, up 5,000 acres from 2004. The average yield per acre, at 49 bushels, was down 4 bushels from last year. Barley production was valued at \$1.40 million, up 29 percent from the 2004 value.

All Dry Hay

Production was placed at a new record low 2.63 million tons, down 10 percent from last year's 2.92 million tons. Acreage harvested for dry hay during 2005 increased 30 percent to 1.65 million acres. Yield, at 1.59 tons per acre, was 31 percent below a year ago. Value of production, at \$282 million, was down 13 percent from a year ago.

Alfalfa Dry Hay

New York production of alfalfa dry hay was estimated at 945,000 tons, down 28 percent from last year's crop of 1.32 million tons. Area harvested, at 450,000 acres, was 4 percent below last year. Yields averaged 2.10 tons per acre, 25 percent below last year. Alfalfa dry hay production was valued at \$123 million, down 33 percent from the 2004 value of \$183 million.

Potatoes

Production totaled 5.23 million hundredweight (cwt.), up 1 percent from the 5.18 million cwt. produced in 2004. Harvested acreage totaled 20,100 acres, up 900 acres from last year. Yields averaged 260 cwt. per acre, down 10 cwt. from a year ago. The value of potatoes, at \$65.3 million, was up 52 percent from 2004.

Dry Beans

Production totaled 282,000 cwt., up 14 percent from 2004. Acres harvested totaled 23,000 acres, down 500 acres from a year earlier. The average yield, at 1,230 pounds per acre, was up 180 cwt. from last year. Dry beans were valued at \$6.20 million, down 10 percent from the 2004 value of \$6.89 million.

2005 CROP SUMMARY

April

Field work was off to a slow start due to heavy rainfall combined with snow melt which caused flooding. After the water receded, planting activities progressed rapidly as unseasonable warmth and winds dried soils. Oats seeding and corn planting got underway. Potato planting was started. Spring pruning was in full swing in the apple orchards. Warmer weather and winds at the end of the month enabled pastures to start greening up.

May

Fieldwork continued at a furious pace despite wetness early in the month. Grapes were budding despite winter damage. Corn planting was nearly complete, soybeans were two-thirds complete, potatoes were one-half complete and oats seeding neared completion. Vegetable planting was nearly complete. Soil moisture averaged adequate to surplus.

June

Corn and soybean plantings were complete and showed great progress. Alfalfa first cutting was three-quarters complete. Dry Bean planting neared completion. Grapes were in bloom throughout the Lake Erie Grape Belt. Strawberry harvest began.

July

Above normal temperatures and ample moisture enabled fieldwork. Oats harvesting was underway. Winter wheat was one-half harvested. The second cutting of alfalfa was two-thirds complete. Summer squash, lettuce, beets and onions were harvested and sent to market. Pasture conditions reflected slow re-growth.

August

The dry period from early to mid-month gave way to rainfall from end-of-month tropical storms and residuals from hurricanes. Beets and potatoes were being harvested. Corn was rated good to excellent. Oats were 95 percent harvested. Winter wheat harvest was complete. The second cutting of alfalfa was 94 percent complete.

September

Warm, humid weather conditions marked the beginning of the month. Remnants of hurricane Katrina and tropical storm Ophelia during early to mid-month brought heavy rain to much of the region. Soybeans continued to look good. Corn volume was good, ears varied. Potato digging was two-thirds complete. Dry beans were 30 percent harvested. Corn for grain harvest began. Corn silage harvest was underway.

October

October brought wet weather beginning with the remnants of hurricane Rita. Corn silage harvest was nearly complete during the month and grain harvest continued despite the wet fields. Dry bean and soybean harvest was well underway. Apples fell from the trees in heavy rains that also interrupted grape harvest. Cabbage, pumpkin and squash harvesting neared completion.

NEW YORK FEED GRAIN DEFICIT IN 2005

New York feed grain production (*corn, oats, barley*) in 2005 was 3 percent below production in 2004, and 3 percent above the 10 year average. The quantity of grain fed during 2005 increased by less than 1 percent from a year earlier and was 2 percent below the 10 year average. The decreases in grain fed are primarily attributed to a decreased number of dairy cows in the state on average during the year when compared to 2004 and the 10 year average number of cows. The increase in grain production from a year earlier is primarily due to a record high yield for corn.

Feed grain produced in 2005 met 84 percent of the State's feeding requirements. The feed grain deficit fluctuates widely depending primarily on the level of corn produced. Over the past ten years, New York farmers have produced on average 80 percent of the feed needed for the dairy, livestock, and poultry industries in the state.

Table 13. **FEED GRAIN DEFICIT:** New York, 1996-2005

Year	Quantity Produced	Quantity Fed	Quantity of Deficit

2003	1,723	2,270	548
2004	1,975	2,276	301
2005	1,917	2,281	363

VEGETABLES

In 2005, New York saw a spring that started out cool and dry. The summer continued the drought and was also hotter than normal. The dry weather reduced yields on crops like onions, but the hot weather was good for crops that like the heat, such as tomatoes and bell peppers. The fall of 2005 started out dry and ended up wet, with unharvested crops like pumpkins and squash left in the fields.

The value of the Empire State's principle fresh market vegetables totaled \$300 million this year. Fresh market production in 2005 was estimated at 14.6 million hundredweight (cwt.). Planted acreage increased from 82,200 acres in 2004 to 82,900 acres in 2005.

Processing vegetables were valued at \$40.4 million in 2005 and production totaled 326 thousand tons.

Onions

New York onion yields averaged 280 cwt. per acre, 120 cwt. lower than last year. Year 2005 production is estimated at 3.81 million cwt., a 27 percent decrease from last year. Value is down 15 percent, for a total of \$45.7 million.

Cabbage

New York's fresh market cabbage production for 2005, estimated at 4.56 million cwt., is up 23 percent from 2004 production of 3.71 million cwt. New York ranked second in the nation for fresh market cabbage production in 2005.

Pumpkins

Pumpkins showed a value of \$21.9 million. There were 5,300 acres harvested for a production of 795 thousand cwt. Value of production in 2005 decreased 14 percent from 2004. Total value for 2005 was \$21.9 million.

Snap Beans

The value of the 2005 New York fresh market snap bean crop was fifth highest in the nation at \$23.0 million. Total production was 300,000 cwt., up 58 percent from last year due to more acres harvested and much higher yields.

Green Peas

The value of processed green peas fell 3 percent. Production totaled 29,660 tons and total value ended up at \$11.4 million.

Sweet Corn

Sweet corn planted acreage for processing stayed about the same at 19,500 acres. However, harvested acreage fell to 17,600 acres, 1,400 acres less than 2004. Yield was higher at 6.6 tons per acre. Total value was \$9.3 million a 9 percent increase over 2004.

The wet fall weather also affected sales at farm market stands. However, prices for any crops were above 2004, despite the weather conditions.

The value of all New York vegetable production in 2005 totaled \$340 million. New York ranked sixth in the nation for the value of principle fresh market vegetables.

1/ Estimates discontinued.

FRUIT

The value of New York's 2005 tree fruit and grape production totaled \$229 million, down 11 percent from the 2004 value. The value of utilized production was below the previous year for all fruits except grapes, and sweet cherries.

Apples

The 2005 crop in New York was down 19 percent to 1.04 billion pounds. This year's value of utilized apple production, based on packinghouse door equivalent returns, totaled \$170 million. New York ranks second in apple production behind Washington.

Grapes

Production in New York increased 25 percent from 2004 to 178,000 tons. Fresh grapes totaled 3,000 tons while 175,000 tons were crushed by wineries and processors. Grapes utilized for juice accounted for 71 percent of the total grapes processed with the remaining 29 percent going for wine.

The value of the 2005 grape crop is estimated at \$34.3 million, 5 percent above the 2004 crop value. New York ranked third in grape production behind California and Washington.

Tart Cherries

New York's tart cherry crop is estimated at 7.5 million pounds, down 30 percent from the 2004 crop of 10.7 million pounds. The value of utilized production is estimated at \$3.24 million.

Sweet Cherries

New York sweet cherry production, at 800 tons, is down 11 percent from the 900 tons produced in 2004. The 2005 crop is valued at \$1.27 million compared to \$1.25 million a year ago.

Peaches

Peach production for the Empire State is placed at 4,250 tons, down 29 percent from the 2004 level. The value of the 2005 crop, at \$2.83 million, down 33 percent from 2004.

Pears

Production of pears in New York is estimated at 8,500 tons, down 48 percent from the 2004 output of 16,500 tons. The 2005 crop is valued at \$4.09 million, down 24 percent from 2004. New York ranks fourth nationally in pear production.

Strawberries

Production in New York was down 20 percent from 2004 to 5.20 million pounds. The value of utilized production is estimated at \$8.06 million, down 23 percent from the \$10.4 million in 2004. New York ranks seventh in strawberry production. Nationally, the strawberry crop for 2005 was placed at 2.32 billion pounds, up 5 percent from 2004.

Blueberries

Production of blueberries for the Empire State was placed at 1.50 million pounds. The 2005 crop is valued at \$1.96 million. This is a decrease of 16 percent from \$2.32 million in 2004. The U.S. estimate for blueberries is 342 million pounds, up 24 percent from the 275 million pounds produced in 2004.

Red Raspberries

Production totaled 1.40 million pounds, a decrease of 26 percent from 2004. Acreage harvested remained at 450 acres. The value of the crop also decreased to 3.40 million dollars.

Table 21. **FRUIT:** Production and Value of Major Fruits, New York, 1996-2005 ^{1/}

Year	Utilized Production	Value
	<i>Tons</i>	<i>1,000 dollars</i>

FLORICULTURE

New York floriculture production ranked fifth in the nation for total commercial sales in 2005. Value of sales increased from a year earlier for bedding and garden plants and potted flowering plants. The overall value of commercial sales increased 10 percent to \$200 million. Bedding and garden plants continued to be the highest component of the total value of sales at \$111 million. Potted flowering plants were second with a value of sales of \$49.6 million, an increase of 23 percent. Propagative materials ranked third at \$11.5 million, an increase of 40 percent from 2004.

The number of commercial growers decreased for the third consecutive year. During 2005, there were 772 growers.

The open ground area used to produce floriculture crops in the state was down approximately 6 percent to 876 acres. Greenhouse space for operators exceeding the \$10,000 sales level decreased 2 percent to total 25.0 million square feet in 2005. This decrease pushed the total covered area (*greenhouse plus shade and temporary structures*) down to 25.5 million square feet, 2 percent less than 2004.

Nationally, the total wholesale value of floriculture crops grown by operations exceeding the \$100,000 sales level reached \$5.08 billion in 2005, up 2 percent from the revised 2004 total. These operations, which comprise 42 percent of all growers, account for 95 percent of the total value of floriculture crops. Bedding and garden plants wholesale value, at \$2.61 billion, is the largest contributor to the value of production, up 2 percent from the previous year. Potted flowering plants value, at \$809 million, is up 1 percent from 2004. The foliage category is valued at \$721 million for 2005. This is up 5 percent from the revised 2004 estimate. Value of cut flowers, at \$397 million, is down 4 percent, while cut cultivated greens, at \$105 million, is up 2 percent from 2004.

MAPLE

New York maple syrup 2006 production increased 14 percent from 2005. Syrup production is estimated at 253,000 gallons, up from the 222,000 gallons produced in 2005. Only two states, Vermont and Maine, produced more syrup.

The number of taps, 1.53 million, increased 8 percent from last year. Syrup produced per tap averaged 0.165 gallons, up from 0.156 gallons in 2005. The final value of the 2005 crop is \$7.04 million.

The season opened on March 7 and closed on April 3. Most producers were able to tap for about one week straight without the temperature fluctuating to an extreme condition. During that one week, most producers experienced a strong sap flow when the weather was favorable. Excellent production during this one favorable week outweighed poor sap flow encountered during the rest of the season. Throughout the entire maple season, the unusual weather pattern made it difficult for sap flow to be consistent. Producers did not receive continuous cold nights and warm days. There was minimal to no snow received during the maple season and tent caterpillars destroyed some of the maple trees in the northeastern and southeastern parts of the State.

Table 37. **MAPLE SYRUP:** Production and Value, New York, 1996-2006

Crop	Syrup made ^{1/}	Average date		Gallons of sap per gallon of syrup	Average price per gallon	Value of production
		First run made	Last run made			
	<i>1,000 gals.</i>			<i>Gallons</i>	<i>Dollars</i>	<i>1,000 dollars</i>
1996	343	Mar. 5	Apr. 10	40	25.50	8,747
1997	269	Mar. 4	Apr. 7	48	25.10	6,752
1998	263	Feb. 25	Mar. 28	41	26.85	7,062
1999	222	Feb. 27	Apr. 2	43	27.30	6,061
2000	239	Feb. 27	Mar. 24	49	29.00	6,931
2001	220	Mar. 11	Apr. 7	40	29.50	6,490
2002	260	Feb. 22	Mar. 30	44	26.80	6,838
2003	210	Mar. 13	Apr. 9	44	26.80	5,628
2004	255	Mar. 4	Apr. 3	44	28.20	7,191
2005	222	Mar. 13	Apr. 5	41	31.70	7,037
2006	253	Mar. 7	Apr. 3	46	<u>2/</u>	<u>2/</u>

^{1/} Includes syrup later made into sugar. ^{2/} Available June 2007.
