Eliot Spitzer
Governor

Patrick Hooker
Commissioner

June 2007

Dear Friends of Agriculture:

In 2006, New York farmers were faced with a perfect storm of skyrocketing fuel costs, high property taxes, rising feed costs, and several devastating weather disasters. However, despite these challenges, agriculture continues to be one of the most vital industries to the upstate New York economy.

New York has more than 35,000 family farms committed to the land they work and the crops they grow. These dedicated individuals not only generate revenue and jobs for rural communities, they contribute immensely to the quality of life by maintaining productive open spaces and providing wholesome farm fresh products for all to enjoy.

In order to accurately assist our farm operations, we rely on this annual compilation of agricultural statistics that include valuable information on production, economic returns, inventory, and historical numbers that are essential in assessing industry trends and needs. Provided by farm families across New York State, this information serves as a vital tool for everyone involved in the agricultural community. I appreciate all the time and effort given to publish this information and hope you find value in the information it provides.

Thank you for supporting agriculture in New York State.

Sincerely,

Patrick Hooker
Commissioner

New York is an Agricultural State

Agriculture is important to New York State. Agricultural production returned over \$3.4 billion to the farm economy in 2006. About 25 percent of the state's land area, or 7.50 million acres are used by the 35,000 farms to produce a very diverse array of food products. Here are some of the items in which New York ranks high nationally:

LIVESTOCK PRODUCTS

Dairy and animal production in New York provided \$1.98 billion in receipts to farmers in 2006. That accounts for 57 percent of all cash receipts.

DAIRY PRODUCTS

Milk is New York's leading agricultural product and is produced all across the state. Milk sales account for one-half of total agricultural receipts. Production in 2006 was 12.1 billion pounds with a preliminary value of \$1.61 billion. New York is the nation's 3rd leading producer and Wyoming is the State's leading county.

MEAT PRODUCTION

New York livestock producers marketed 228 million pounds of meat animals during 2006 bringing in \$172 million in cash receipts. Sales from cattle and calves accounted for \$157 million, hogs and pigs returned \$11.4 million, and sheep and lambs provided \$2.59 million.

POULTRY PRODUCTION

The receipts of New York eggs, ducks, broilers and turkeys plus the receipts for other chickens totaled \$92.4 million for 2006. Eggs made up \$39.5 million of the total followed by broilers at \$11.3 million. New York ranks 22nd among all egg producing states.

CROP PRODUCTION

Field crops, fruits and vegetables returned \$1.50 billion to New York farmers in 2006.

FRUITS

Apples

New York ranks 2nd nationally with receipts worth about \$197 million in 2006. Three general areas produce most of the apples: along the southern Lake Ontario shore, along the Hudson Valley, and along the upper Lake Champlain Valley. New York's leading varieties are McIntosh, Empire, Rome, Idared, and Red Delicious.

Grapes

Wine and juice grape production place New York 3rd behind California and Washington. The crop was worth \$37.0 million in receipts in 2006. Three-fourths of the production was for juice and one-fourth went into wines. The four major producing areas are Lake Erie area, the Finger Lakes, the Hudson Valley and the eastern end of Long Island.

Tart Cherries

Production in New York ranks 4th in the Nation. Production in 2006 totaled 10.4 million pounds with a value of \$3.24 million.

Pears

Production ranked 4th in the nation with 8,500 tons and had a value of \$6.69 million.

Strawberries

Strawberries are the 3rd most valuable fruit in New York and places New York 7th in national production. Growers harvested 5.20 million pounds in 2006. The crop returned \$7.48 million to growers.

VEGETABLES

The value of vegetables totaled \$554 million in 2006. Fresh market vegetable production ranks 5th and processing vegetable production ranks 6th among all states. Leading crops in New York are cabbage, sweet corn and onions.

Cabbage

New York produced the 2nd largest crop of cabbage in the Nation. Cabbage is principally grown south of Lake Ontario in Monroe, Genesee, Orleans, Ontario, and Niagara counties. New York cabbage is typically stored for sale as fresh during winter months. Value of the fresh market crop in 2006 totaled \$64.1 million.

Sweet Corn

Produced statewide, sweet corn had a value of receipts of \$84.5 million. Concentrations are found in the Lower Hudson Valley and around the Genesee Valley. Production of fresh market sweet corn crop ranked 4th in the nation with receipts worth \$75.6 million. Production of sweet corn for processing ranked 5th in the nation and was worth \$8.91 million.

Onions

An important crop with receipts of \$46.2 million in 2006. Onions are grown in New York's muck soils in Orange, Orleans, Oswego, Madison and Wayne counties. The state ranked 6th in production for 2006.

Snap Beans

Grown in the Central and Western regions for fresh and processing. The 2006 fresh market and processing crop was valued at \$48.1 million. Fresh production accounted for 76 percent of the total value. New York ranks 3rd in fresh market production and 2nd in the nation for production of snap beans for processing.

Other Vegetables

Tomatoes: \$30.8 million, 13th nationally
Pumpkins: \$18.8 million, 6th nationally
Cucumbers: \$26.4 million, 5th nationally
Squash: \$28.3 million, 5th nationally
Green Peas for Processing: \$13.4 million, 4th nationally
Cauliflower: \$2.81 million, 3rd nationally

FIELD CROPS

New York produces a variety of field crops largely in support of its dairy industry. Corn, oats and wheat are most widely grown with soybeans steadily increasing in importance. New York ranks 3rd in corn silage production with a value of \$228 million.

Grain corn ranked 18th with cash receipts of \$89.0 million. Soybean cash receipts were valued at \$47.2 million. The state placed 6th in oat production, 27th in wheat and 22nd for soybeans production. Hay receipts put New York 23rd and was valued at \$109 million in 2006. Most hay is used on farms and its value is realized through sale of milk and livestock. Fall potatoes receipts reached a value of \$67.6 million in 2006 and made New York the 14th leading producer.

MAPLE SYRUP

At \$8.02 million, New York ranks 2nd behind Vermont in value and 3rd with 224,000 gallons produced behind Vermont and Maine in 2006.

FLORICULTURE CROPS

In 2005, New York floriculture products were valued at \$200 million. Bedding and garden plants top the list of commodities. The wholesale value of New York's floriculture output ranks 5th nationally at \$200 million. A variety of crops are produced in 24.5 million square feet of covered area and on 963 acres of open ground. Christmas trees provide about \$21.3 million of sale.

Economic Indicators

FARM INCOME

State estimates of farm income are prepared annually by the Economic Research Service, U.S. Department of Agriculture (USDA). These estimates are based on USDA's annual Agricultural Resource Management Survey and a variety of existing independent data such as cash receipts, government program payments, property taxes, number of farms, land in farms, farm land values, and inventory changes. Farm income data, are shown in table 5.

NET FARM INCOME UP

New York Net Farm Income increased 12 percent in 2005 to \$1.11 billion (*table 3*). Livestock output value increased slightly to \$2.31 billion and crop output value decreased 1 percent to \$1.29 billion. Purchased inputs increased 7 percent to \$1.75 billion while direct government payments increased 74 percent.

FARMS BY SALES CLASS

Of the estimated 35,000 farms in New York in 2006, only 5,700 or 16 percent of all farms had sales of \$100,000 or more, but they operated 3.70 million acres or 49 percent of all land in farms. New York farms with sales of less than \$10,000 totaled 18,600 or 53 percent of all farms.

Table 1. Number of Farms and Land in Farms, by Sales Class, New York, 1998-2006

Year	Economic Sales Class					
	\$1,000- \$9,999	\$10,000- \$99,999	\$100,000- \$249,999	\$250,000- \$499,999	\$500,000 & Over	Total
<i>Thousand farms</i>

2004	1.75	2.10	1.30	.90	1.55	7.60
2005	1.65	2.10	1.35	.85	1.60	7.55
2006	1.75	2.05	1.25	.95	1.50	7.50

FARMS AND FARMLAND UTILIZATION

The number of farms in New York (places selling \$1,000 or more of agricultural products in a year) totaled 35,000 in 2006, down from 35,600 in 2005. Land in farms totaled 7.50 million acres. Farmland accounts for 25 percent of the State's total land area.

Total cropland stands at 4.81 million acres and accounts for 64 percent of total land operated. Harvested cropland at 3.65 million acres represents 49 percent of total land operated. Field crops such as corn, hay, haylage and greenchop, small grains, potatoes, soybeans and other field crops account for 94.0 percent of the total cropland harvested. Vegetable crops make up 3.4 percent and fruit crops 2.6 percent.

Estimates of farmland utilization are shown in table 2 below. The estimates are based on annual surveys with over 6,000 farms reporting each year.

Table 2. **FARMS AND FARMLAND:** Number of Farms, Land in Farms and Land Use, New York, 1997-2006

Item	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006

CASH RECEIPTS

Cash receipts from New York farm marketings in 2006 totaled \$3.48 billion, down from the 2005 total.

Receipts from livestock and poultry products were \$1.98 billion. Crop sales increased to \$1.50 billion for 2006. Dairy product sales fell to \$1.61 billion, nearly one-half of the total sales.

Crops

FIELD CROPS

The 2006 crop year got off to a slow start due to wet weather conditions during the planting season. This weather slowed fieldwork and pushed planting progress behind average. Wet weather continued throughout most of the summer, making haying activities difficult but providing ample moisture for crops such as corn and soybeans. Harvest was a challenge.

Grain Corn

New York production is estimated at 61.9 million bushels, up 9 percent from last year. Area for harvest totaled 480,000 acres, up 4 percent from a year ago. Yield per acre was a record high 129 bushels, pushing production up 9 percent from last year. Production was valued at \$204 million, up 56 percent from 2005.

Silage Corn

Corn cut for silage totaled 8.28 million tons, a decrease of 6 percent from last year. Area for harvest decreased 12 percent to 460,000 acres. Yields are estimated at 18.0 tons per acre, the highest yield on record. Production was valued at \$2.28 million, unchanged from 2005.

Soybeans

The 2006 soybean crop was estimated at a record high 9.11 million bushels, 15 percent above last year's production. Area harvested, also a record high at 198,000 acres, was up 5 percent from a year ago. Yields averaged 46 bushels per acre, the highest yield on record. The value of the 2006 soybean crop was set at \$49.6 million, up 21 percent from the previous year.

Wheat

Production totaled 5.80 million bushels, up 13 percent from the previous year. Harvested acreage, at 95,000 acres, was the same as 2005. Winter wheat yields averaged 61 bushels per acre, up 7 bushel a year ago. Winter wheat was valued at \$20.0 million, up 17 percent from a year ago.

Oats

Production, at 4.96 million bushels, was up 22 percent from the previous year. Area harvested, at 67,000 acres, was down 11 percent from last year. The average yield, at a record high 74 bushels per acre, was up 20 bushels from a year ago. Oat production was valued at \$7.93 million, up 19 percent from 2005.

Barley

Production of barley in New York totaled 660,000 bushels, down 10 percent from a year earlier. Acreage harvested for grain totaled 12,000 acres, down 3,000 acres from 2005. The average yield per acre, at 55 bushels, was up 6 bushels from last year. Barley production was valued at \$1.29 million, down 3 percent from the 2005 value.

All Dry Hay

Production was 2.79 million tons, up 6 percent from last year's 2.63 million tons. Acreage harvested for dry hay during 2006 decreased 8 percent to 1.52 million acres. Yield, at 1.84 tons per acre, was 16 percent above a year ago. Value of production, at \$314 million, was up 11 percent from a year ago.

Alfalfa Dry Hay

New York production of alfalfa dry hay was estimated at 777,000 tons, down 18 percent from last year's crop of 945,000 million tons. Area harvested, at 350,000 acres, was 18 percent below last year. Yields averaged 2.10 tons per acre, the same as last year. Alfalfa dry hay production was valued at \$113 million, down 9 percent from the 2005 value of \$124 million.

Forage

Forage production is the sum of all dry hay and haylage/greenchop production after converting the haylage/greenchop to a dry equivalent basis. New York's acres harvested at 1,950 are down from last year's by 15 percent. The average yield, at 2.56 tons per acre, is up from the previous year's 2.09 tons. Production at 4,996 tons is up 5 percent from a year ago.

Potatoes

Production totaled 5.70 million hundredweight (cwt.), up 9 percent from the 5.23 million cwt. produced in 2005. Harvested acreage totaled 19,000 acres, down 1,100 acres from last year. Yields averaged 300 cwt. per acre, up 15 cwt. from a year ago. The value of potatoes, at \$70.7 million, was up 11 percent from 2005.

Dry Beans

Production totaled 239,000 cwt., down 15 percent from 2005. Acres harvested totaled 18,000 acres, down 5,000 acres from a year earlier. The average yield, at 1,330 pounds per acre, was up 100 cwt. from last year. Dry beans were valued at \$5.98 million, down 1 percent from the 2005 value of \$6.04 million.

2006 CROP SUMMARY

April

Field work got off to a good start as the snow melted and dry weather continued. Oat and corn plantings got underway. Fruit growers were finishing up their pruning and fertilizing in orchards. A late frost at the end of the month damaged fruit trees and grape vines.

May

The first two weeks were dry and allowed for the spring planting to progress, but the last two weeks of the month were marked by frequent rainfalls that hindered the finishing of the planting. Blueberries and strawberries were in full bloom by the end of the month, and the first cutting of hay occurred in some parts of the state.

June

Wet weather continued to slow plantings and the crops that were planted began to suffer from too much rain. The rain continued off and on making it rough to harvest dry hay. Dry beans were 67% planted and corn planting was finished by the end of the month.

July

Rainfall continued into July as several areas of the state developed flooding problems. Dry hay harvesting proved to be a problem but the yields were up for the winter wheat and oats that were gathered. There were some areas with first cutting hay that was still standing. Tomato, onion, and snap bean harvesting started.

August

Dry weather prevailed throughout the month which allowed farmers to catch up on their harvesting, but by the end of the month several areas of the state needed some rain. The winter wheat and oats were harvested this month. Half of the potato, sweet corn, and onion crops were harvested. Two-thirds of the snap beans were also picked this month. The apple harvest had also begun.

September

Farmers saw some much needed rain in September, but this slowed the progress on harvesting the crops. This month also saw the first frost of the season. During the month, most of the tomato, onion, sweet corn, and snap bean crops were done being harvested. The apples, potatoes, and silage corn harvest advanced to one-half complete. Honey producers harvested most of their product by the middle of the month, and grape harvesting had begun for several varieties.

October

As farmers finished up the fall harvest, the Buffalo region received the first snow of the year. There was still some dry hay being harvested in parts of the state, and the grain corn harvest began. The potato, silage, and apple harvest was nearly completed by the end of the month.

NEW YORK FEED GRAIN DEFICIT IN 2006

New York feed grain production (*corn, oats, barley and soybeans*) in 2006 was 10 percent above production in 2005, and 13 percent above the 10 year average. The quantity of grain fed during 2006 was slightly higher than 2005 and was 1 percent below the 10 year average. The increase in grain production from a year earlier is primarily due to a record high yield for corn. Oats, barley, and soybeans all had increases in yields from the previous years.

Feed grain produced in 2006 met 92 percent of the State's feeding requirements. The feed grain deficit fluctuates widely depending primarily on the level of corn produced. Over the past ten years, New York farmers have produced on average 80 percent of the feed needed for the dairy, livestock, and poultry industries in the state.

Table 13. FEED GRAIN DEFICIT: New York, 1997-2006

Year	Quantity Produced	Quantity Fed	Quantity of Deficit
	<i>1,000 tons</i>		
1997	2,073	2,367	294
1998	2,095	2,328	233
1999	1,911	2,278	367
2000	1,442	2,378	936
2001	1,848	2,310	462
2002	1,466	2,323	857
2003	1,723	2,270	548
2004	1,975	2,276	301
2005	1,917	2,281	363
2006	2,103	2,287	184

VEGETABLES

2006 started out well for vegetable producers with a warm winter and a mild spring. However, the rains began in central and eastern New York in May and continued on into the fall. Western New York fared better in the spring, but wetter weather moved into that area in July and also continued into the fall. In addition, the state saw some excessively hot weather in July. The combination of heat and rain negatively affected crops such as onions, but 2006 also gave New York record-high yields on sweet corn and tomatoes.

Cucumbers, tomatoes, and fresh market and processing snap beans sold for record-high prices in 2006.

The value of all New York vegetable production in 2006 totaled \$376 million. New York ranked fifth in the nation for the value of principal fresh market vegetables.

The value of the Empire State's principal fresh market vegetables totaled \$339 million this year. Fresh market production in 2006 was estimated at 15.1 million hundredweight (cwt.). Planted acreage increased from 81,200 acres in 2005 to 82,430 acres in 2006.

Processing vegetables were valued at \$37.3 million in 2006 and production totaled 228 thousand tons.

Onions

New York onion yields averaged 330 cwt. per acre, up 50 cwt. from last year. Year 2006 production is estimated at 3.86 million cwt., up slightly from last year. Value is down 9 percent to a total of \$43.8 million due to a decrease in quality because of heat and heavy rains.

Table 14. PRINCIPAL VEGETABLES FOR FRESH MARKET

Year	Planted	Harvested	Production	Value
	<i>1,000 acres</i>		<i>1,000 cwt.</i>	<i>Million dol.</i>
1997	67.7	64.3	12,893	172.1
1998	71.6	68.7	13,115	202.8
1999	77.3	73.6	13,563	209.9
2000	88.6	79.2	17,169	330.2
2001	96.1	91.5	17,878	334.6
2002	89.2	84.2	14,107	310.1
2003	92.3	86.1	15,095	285.3

2006	82.4	75.0	15,065	338.6

Table 15. PRINCIPAL VEGETABLES FOR PROCESSING

Year	Planted	Harvested	Production	Value
	<i>1,000 acres</i>		<i>1,000 tons</i>	<i>Million dol.</i>
1997	90.1	87.6	510.4	43.3
1998	90.2	84.9	459.8	49.8
1999	77.5	75.7	420.8	45.3
2000	82.1	77.6	389.3	42.6
2001	78.2	74.2	377.3	42.5
2002	57.9	55.8	202.9	27.5
2003	59.5	53.3	247.6	34.3
2004	59.4	57.4	210.8	33.3
2005	61.4	58.7	214.8	33.6
2006	60.1	54.5	227.7	37.3

Cabbage

New York's fresh market cabbage production for 2006, estimated at 4.62 million cwt., is up slightly from 2005's production of 4.61 million cwt. New York ranked second in the nation for fresh market cabbage production in 2006.

Pumpkins

Pumpkins showed a value of \$18.8 million, third in the nation. There were 5,500 acres harvested for a production of 798 thousand cwt. Value of production in 2006 decreased 14 percent from 2005. The cool summer and torrential rains in New York decreased the yield and quality of the pumpkins harvested.

Snap Beans

New York is now ranked second in the nation on value of the 2006 New York fresh market snap bean crop, at \$48.1 million. Total production was 587,000 cwt., up 95 percent from last year due to more acres harvested and much higher yields.

Green Peas

The 2006 value of processed green peas increased 17 percent due to increased yields. Production totaled 38,700 tons and total value ended up at \$13.4 million. Yield increased from 1.5 tons per acre to 2.2 tons per acre.

Sweet Corn

Fresh market sweet corn acreage was down in 2006. A total of 26,800 acres were harvested, a 5 percent decrease from last year. However, yields increased, giving producers a record-setting 120 cwt. per acre, a 26 percent increase from last year. Because of increase in yield, total value ended up at \$75.6 million, up 25 percent from last year.

1/ Estimates not available.

FRUIT

The value of New York's 2006 tree fruit and grape production totaled \$317 million, up 40 percent from the 2005 value. The value of utilized production was above the previous year for all fruits except tart cherries and strawberries.

Apples

The 2006 crop in New York was up 20 percent to 1.25 billion pounds. This year's value of utilized apple production, based on packinghouse door equivalent returns, totaled \$248 million. New York ranks second in apple production behind Washington.

Grapes

Production in New York decreased 13 percent from 2005 to 155,000 tons. Fresh grapes totaled 3,000 tons while 150,000 tons were crushed by wineries and processors. Grapes utilized for juice accounted for 68 percent of the total grapes processed with the remaining 32 percent going for wine.

The value of the 2006 grape crop is estimated at \$37.0 million, 8 percent above the 2005 crop value. New York ranked third in grape production behind California and Washington.

Tart Cherries

New York's tart cherry crop is estimated at 10.4 million pounds, up 39 percent from the 2005 crop of 7.5 million pounds. The value of utilized production is estimated at \$3.24 million.

Sweet Cherries

New York sweet cherry production, at 960 tons, is up 20 percent from the 800 tons produced in 2005. The 2006 crop is valued at \$1.97 million compared to \$1.27 million a year ago.

Peaches

Peach production for the Empire State is placed at 7,000 tons, up 65 percent from the 2005 level. The value of the 2006 crop, at \$4.49 million, up 59 percent from 2005.

Pears

Production of pears in New York is estimated at 16,000 tons, up 88 percent from the 2005 output of 8,500 tons. The 2006 crop is valued at \$6.69 million, up 64 percent from 2005. New York ranks fourth nationally in pear production.

Strawberries

Production in New York was down 15 percent from 2005 to 4.4 million pounds. The value of utilized production is estimated at \$7.48 million, down 7 percent from the \$8.06 million in 2005. New York ranks seventh in strawberry production. Nationally, the strawberry crop for 2006 was placed at 2.40 billion pounds, up 4 percent from 2005.

Blueberries

Production of blueberries for the Empire State was at 2.20 million pounds. The 2006 crop is valued at \$2.80 million, a 42 percent increase from \$1.96 million in 2005. The U.S. estimate for blueberries is 2.76 million pounds, up 16 percent from the 2.39 million pounds produced in 2005.

Red Raspberries

Production totaled 1.60 million pounds, an increase of 14 percent from 2005. Acreage harvested remained at 450 acres. The value of the crop also increased to 4.80 million dollars.

Table 21. **FRUIT:** Production and Value of Major Fruits, New York, 1997-2006 ^{1/}

Year	Utilized Production	Value
	<i>Tons</i>	<i>1,000 dollars</i>

FLORICULTURE

New York floriculture production ranked fifth in the nation for total commercial sales in 2005. Value of sales increased from a year earlier for bedding and garden plants and potted flowering plants. The overall value of commercial sales increased 10 percent to \$200 million. Bedding and garden plants continued to be the highest component of the total value of sales at \$111 million. Potted flowering plants were second with a value of sales of \$49.6 million, an increase of 23 percent. Propagative materials ranked third at \$11.5 million, an increase of 40 percent from 2004.

The number of commercial growers decreased for the third consecutive year. During 2005, there were 772 growers.

The open ground area used to produce floriculture crops in the state was down approximately 6 percent to 876 acres.

Greenhouse space for operators exceeding the \$10,000 sales level decreased 2 percent to total 25.0 million square feet in 2005. This decrease pushed the total covered area (*greenhouse plus shade and temporary structures*) down to 25.5 million square feet, 2 percent less than 2004.

Nationally, the total wholesale value of floriculture crops grown by operations exceeding the \$100,000 sales level reached \$5.08 billion in 2005, up 2 percent from the revised 2004 total. These operations, which comprise 42 percent of all growers, account for 95 percent of the total value of floriculture crops. Bedding and garden plants wholesale value, at \$2.61 billion, is the largest contributor to the value of production, up 2 percent from the previous year. Potted flowering plants value, at \$809 million, is up 1 percent from 2004. The foliage category is valued at \$721 million for 2005. This is up 5 percent from the revised 2004 estimate. Value of cut flowers, at \$397 million, is down 4 percent, while cut cultivated greens, at \$105 million, is up 2 percent from 2004.

MAPLE

New York maple syrup 2007 production decreased 11 percent from 2006. Syrup production is estimated at 224,000 gallons, down from the 253,000 gallons produced in 2006. Only two states, Vermont and Maine, produced more syrup.

The number of taps, 1.47 million, decreased 4 percent from last year. Syrup produced per tap averaged 0.152 gallons, down from 0.165 gallons in 2006. The final value of the 2006 crop is \$8.02 million.

The season opened on March 11 and closed on April 9. Sap quality was poor and the syrup darkened early. Producers reported making some medium amber, but mostly dark, and little to no light amber. Most producers reported a poor maple season due to the extended warm and cold periods. During the maple season producers experienced some snow late in January, then a long warm spell, followed by an abundance of snow. Most producers reported having two good runs before snow was too deep around April 18th. Unfortunately when the warm weather arrived, there were no freezing temperatures in the evening. Budding occurred earlier than usual. Even though vacuums were used by many producers, many still had minimal sap. Some producers even stated without vacuums they would not have had a season. The inconsistent weather pattern made it difficult for sap flow to be consistent.

MILK PRODUCTION HIGHLIGHTS

Pasture conditions throughout most of New York were good from May through September of 2006. A wetter than normal summer helped pasture conditions across the state. Overall milk production for 2006 was slightly below the 2005 level.

Total milk production in New York during 2006, at 12.0 billion pounds, was down slightly from 2005. The annual average number of milk cows, at 638,000 head, was down 2 percent from the previous year. Annual output per cow averaged 18,879 pounds, up 1 percent from 2005.

Cash receipts from the sale of New York milk during 2006 totaled \$1.61 billion, down 16 percent from the previous year. The \$13.40 per hundredweight received for all milk sold by New York farmers was down \$2.50, or 16 percent, from the \$15.90 received in 2005. Marketing totals include whole milk and producer-separated cream sold to plants and dealers as well as milk sold directly to consumers.

New York dairymen used 32 million pounds of milk on their farms during 2006, down 24 percent from the previous year. About 94 percent of the milk used on farms was fed back to calves. The value of all milk produced, including milk fed back to calves, totaled \$1.61 billion, down 16 percent from 2005.

DAIRY PRODUCTS

There were 106 plants producing one or more dairy products during 2006 in New York, 10 percent of the total plants in the nation. Cheese production, excluding cottage cheese, totaled 669 million pounds in 2006, up 5 percent from 2005. New York ranks fourth in cheese production excluding cottage cheese, behind Wisconsin, California, and Idaho respectively, accounting for 7 percent of national production.

Italian cheese production of 383 million pounds, which accounted for 57 percent of

Table 39. MILK COW OPERATIONS: By Herd Size, New York, 1997-2006

2005	2.0	7.5	25.5	18.5	46.5
2006	2.5	8.0	24.0	20.0	45.5

New York's total cheese output, decreased 3 percent from 2005. New York ranks third in the nation in production of Italian cheese.

New York continues to lead the nation in the production of all three cottage cheese categories. Creamed cottage cheese production decreased 2 percent from 2005, cottage cheese curd decreased 5 percent, and low-fat cottage cheese decreased slightly from the previous year. New York output accounted for 29 percent of all low-fat cottage cheese produced nationally in 2006. Butter production decreased 2 percent to 16 million pounds; in addition statewide yogurt production increased 2 percent to 237 million pounds. New York production of standard ice cream totaled 27.0 million gallons, down 4 percent from 2005. Lowfat ice cream production of 6.2 million gallons was 15 percent above the 2005 output. Production of milk sherbet increased 16 percent, while water ice production decreased 4 percent.

ANNUAL NEW YORK CHEESE PRODUCTION
(Excluding Cottage Cheese)

Livestock and Poultry

LIVESTOCK

New York livestock producers marketed 236 million pounds of meat animals during 2006, down 4 percent from the 2005 total of 246 million pounds. Cattle and calves marketed were down 4 percent from a year earlier. Hogs and pigs were slightly higher, and sheep and lambs decreased 21 percent from the poundage sold in 2005. Meat animal cash receipts, totaling \$172 million, were down 9 percent from 2005.

Gross income from livestock during 2006, which includes the sale of meat animals and the value of home consumption, totaled \$175 million, down 10 percent from a year earlier. Cattle and calves accounted for 91 percent of this total.

Calf prices, averaging \$145.00 per hundred pounds liveweight (cwt.) were up 4 percent from 2005. Cattle prices, at an average of \$44.40 per cwt. during 2006, were down 11 percent. Gross income from cattle and calves during 2006 totaled \$160 million, down 10 percent from a year earlier.

Hog and pig prices averaged \$38.00 per cwt. in 2006, down 12 percent from the previous year. Gross income from hogs and pigs during 2006 totaled \$11.7 million, down 12 percent from 2005.

Sheep prices averaged \$46.10 per cwt., down 10 percent from 2005. Lamb prices averaged \$106.00 per cwt., 12 percent lower than during 2005. Gross income from sheep and lambs during 2006 totaled \$3.1 million, down 21 percent from 2005.

HONEY

Honey production from beekeepers with five or more hives in New York totaled 3.84 million pounds during 2006. This total is down 12 percent from the 2005 production of 4.38 million pounds.

The 2006 production was extracted from 60,000 colonies, unchanged from the 60,000 colonies in 2005. Honey yield per colony averaged 64 pounds, 12 percent below the 2005 yield. Honey stocks on hand across the State as of December 15, 2006 totaled 2.46 million pounds, an increase of 6 percent from the 2.32 million pounds a year earlier.

Prices received by beekeepers in New York averaged \$1.38 per pound for all methods of sale during 2006, 13 percent more than the 2005 average price. Value of honey production for the State in 2006 totaled \$5.30 million, compared with \$5.34 million in 2005.

TROUT

New York trout producers sold a total of 130,000 pounds of trout valued at \$540,000 during the 12 months ending December 31, 2006. Total liveweight pounds of production, which includes food-size fish, stockers, and fingerlings, were down 2 percent from a year ago while total dollar value of sales was 7 percent above last year.

The 2006 output included 72,000 pounds of food-size trout averaging \$3.79 per pound in value, 50,000 pounds of stocker trout averaging \$3.98 per pound and 8,000 pounds of fingerlings averaging \$339.00 per 1,000 fish.

Food-size fish averaged 1.0 pound in weight, while stockers averaged .40 pound. Total weight of food-size trout sold was down 13 percent from 2005. Total weight of stocker trout was up 8 percent.

The combined value of New York produced eggs, broilers, and turkeys, and the value of sales for other chickens, was \$48.5 million for the year ending November 30, 2006. This total is down 4 percent from a year earlier. Of the 2006 combined value, 81 percent was derived from eggs, 4 percent from broilers, and 15 percent from turkeys.

Egg production in New York during the 2006 year totaled 1.13 billion, down slightly from a year earlier. Egg prices were higher, increasing from 36.9 cents in 2005 to 42.1 cents in 2006. The resulting total value of \$39.5 million was 14 percent above the 2005 egg production value of \$34.7 million.

Turkey production in 2006 amounted to 14.9 million pounds, up 6 percent from 2005. The average price of 49 cents per pound was up 3 cents from the 2005 price. Value of production totaled \$7.29 million, up 13 percent from the 2005 level.

Other Agricultural Statistics

PRICES

Annual average prices for New York produced agricultural commodities during this year had livestock prices mostly down and crop prices up. Prices for potatoes and barley were down while wheat, oats, corn for grain, dry beans, and soybeans were up. Hay prices were unchanged.

New York beef producers and dairy farmers with animals to sell saw average prices decreased from a year earlier. Steers and heifers averaged \$68.90 per hundredweight (cwt.) during the year, down 6 percent from 2005, and slaughter cows also down 7 percent to \$43.50 per cwt. over the same period.

The combined price for all slaughter cattle averaged \$44.40 per cwt., down 12 percent from 2005. Calf prices increased 4 percent from 2005, up to \$145.00 per cwt. for 2006. At the National level,

annual average prices for all slaughter cattle combined averaged 2 percent lower in 2006.

New York pork producers saw prices for hogs average \$38.00 in 2006, down 2 percent from the previous year. Lamb prices were down 12 percent to \$120.00 per cwt.

Table egg prices averaged 40.7 cents per dozen for 2006, up 41 percent from 2005. At the U.S. level, hog prices averaged 8 percent lower and lamb prices were down 13 percent from previous year. The National average for table egg prices during 2006 were 16 percent higher than during 2005.

Wholesale milk prices received by New York dairy farmers averaged \$13.40 per cwt. during 2006, down 16 percent from 2005, down 20 percent from the 2004 average price.

2006 WEATHER SUMMARY

January

After a cooler-than-normal month in December, January 2006 temperatures rebounded, with the month averaging 9.8 degrees warmer than the 1971-2000 normal. This was the fifth warmest January on record and the warmest since 1990. The state averaged 4.00 inches of precipitation, which was 134% of normal. This was the wettest January since 1999 and the thirteenth wettest in 112 years of record.

February

February averaged 2.4 degrees warmer than normal. This was warmer than February of each of the last three years, but only the 27th warmest in 112 years of record. The state averaged 2.03 inches of precipitation, which was 84% of normal.

March

The March statewide average temperature of 31.9 degrees was exactly normal. The warmest temperature this month was 80 degrees at Rochester and Sodus Center on the 31st. Highmarket was the cold spot with -19 degrees on March 1st. The state averaged 1.77 inches of precipitation, or 57% of normal. March 2006 was the driest March since 1995 and the 13th driest on record.

April

The April statewide average temperature of 46.2 degrees was 2.7 degrees above normal. The warmest temperature this month was 86 degrees at Dobbs Ferry on the 19th. Copenhagen and Highmarket were the cold spots with lows of 15 degrees on April 10th. The state average 3.20 inches of precipitation, or 93% of normal. Three months of below normal precipitation and very little snow melt raised drought concerns during April.

May

The May temperature average of 56.4 degrees was 1.0 degrees above normal. The warmest temperature this month was 96 degrees at Chemung on the 31st. Franklinville, Salamanca and Freeville reported the coldest temperature for the month, 23 degrees on the 7th. Rainfall averaged 3.51 inches which was 95% of normal. This was the 4th consecutive month with below normal statewide precipitation totals.

June

June was the third consecutive month with above normal temperatures. The statewide average temperature was 65.2 or 1.2 degrees above normal. The big story this month was the rain event at the end of June that contributed to monthly totals well above normal for most of the state. The statewide average of 7.40 inches was the 2nd wettest. The Eastern Plateau and Hudson Valley had their wettest June on record, with 11.36 and 9.42 inches, respectively. Thirteen counties in central New York were declared disaster areas due to the flooding.

July

July was the 8th warmest July on record in New York State and the fourth consecutive month with above normal temperatures. With an average temperature of 71.7 degrees, this July was 3.0 degrees warmer than normal. Wet weather continued in part of the state during July. It was the second wettest July in the Great Lakes division and the 3rd wettest in the Central Lakes division. Overall the state received an average of 5.27 inches of rain, which was 138% of the July normal.

August

The August average temperature of 67.5 degrees was 0.8 degrees above normal, making August the fifth consecutive month with above normal temperatures. New York received an average of 4.40 inches of precipitation. Data indicates that the summer of 2006 (*June, July and August*) was the wettest since records began in 1895. The 3-month statewide precipitation average was 16.86 inches. The previous record of 16.26 inches occurred in 1903.

September

September's average temperature of 58.7 degrees was 0.2 degrees below normal, ending the 5-month stretch of above normal temperatures. New York received an average of 4.50 inches of precipitation. This was also the 4th consecutive month with above normal precipitation.

October

Temperatures were slightly cooler than normal. October's statewide average temperature of 47.2 degrees was 0.6 degrees below normal. October was the fifth consecutive month with above normal precipitation. The statewide total of 6.19 inches was 178% of normal. This month was the 7th wettest since 1895. A record-breaking lake effect storm dumped up to 22 inches of heavy, wet snow during a time of year more noted for fall foliage viewing. Thousand lost power as trees, still in leaf, and power lines yielded to the weight of the snow.

November

This was the warmest November since 2001 and the warmest November in New York State since records began in 1895. The average temperature of 42.8 was 5.2 degrees above the 1971-2000 normal. Precipitation totals averaged below normal. The statewide total of 3.45 inches was 92% of normal.

December

This month was the warmest December since records began in 1895. The average temperature of 34.9 was 8.5 degrees above normal. Precipitation totals averaged near normal. The total of 3.31 inches was 102% of normal. Snow totals were light this month, mainly due to the warm temperature.

New York State
COUNTIES BY DISTRICT

County Estimates

County estimates are published annually by the USDA's National Agricultural Statistics Service, New York Field Office for a number of crops, livestock, and farm land use categories. Acreage, yield, and production estimates are made for corn, oats, wheat, and hay. Livestock estimates include January 1 inventory of cattle, beef cows, and milk cows on farms, plus the annual average number of cows and total milk production. Also included are county estimates of the number of farms and total land in farms.

Several important sources of information provide the basis for these annual county estimates. Preliminary estimates of crops, farm land uses and livestock numbers are developed from a large scale survey at the end of each year in which over 6,000 farmers across the state are contacted. County acreage information from the Farm Service Agency also receives consideration in preparing several crop estimates. Annual milk production per cow is

based on the combined results of milk production surveys conducted monthly throughout the year.

Also, state and federal milk marketing order data by county are used in estimating cow numbers, rates of production, and total milk produced.

Revisions, if necessary, are made after considering data that become available after the original estimates are prepared. These include administrative data such as milk marketing receipts and the Census of Agriculture collected every five years.

County estimates prepared by the USDA's National Agricultural Statistics Service, New York Field Office include allowances for farmers not sampled, non-respondents, and inaccessibles. Milk production totals that exceed reported marketings include a small quantity of milk used on farms where produced. All county level estimates add to state level data shown elsewhere in this publication.
