Office of the Commissioner

Dear Friends of Agriculture:

New York has some of the most progressive and hard-working farmers in the country – farmers who are focused on producing high-quality products, while also contributing immensely to the beautiful and productive landscapes and thriving state economy.

Despite declining farm numbers in 2007, New York farmers experienced a good growing season coupled with strong prices for their products, increasing cash receipts 28 percent over the previous year. Due in part to high milk prices dairy farmers received, the industry also had abundant yields in both fresh fruits and vegetables.

Dairy cows were more productive, reaching a record high of 19,303 pounds per cow and total milk production at 12.1 billion pounds. Fresh vegetable production increased 12 percent, along with fruit increasing 15 percent. Apples in particular were at its highest production capacity since 1926 with 1.31 billion pounds (or 31 million bushels) harvested and valued at \$286 million, 14 percent above last year. Grape production increased 16 percent to 180,000 tons with a value of \$49 million, a 22 percent increase from 2006.

You can find all these great statistics, along with other helpful information in the following pages of this annual report. This information is provided by farm families across New York State, and serves as a vital tool for everyone involved in the agricultural community in order to assess industry trends and needs. I appreciate all the time and effort given to publish this information and hope you find value in the information it provides.

Thank you for supporting agriculture in New York State.

Sincerely,

A handwritten signature in cursive script that reads "Patrick Hooker".

Patrick Hooker
Commissioner

New York is an Agricultural State

Agriculture is important to New York State. Agricultural production returned almost \$4.5 billion to the farm economy in 2007. About 25 percent of the state's land area, or 7.50 million acres are used by the 34,200 farms to produce a very diverse array of food products. Here are some of the items in which New York ranks high nationally:

LIVESTOCK PRODUCTS

Dairy and animal production in New York provided \$2.73 billion in receipts to farmers in 2007. That accounts for 61 percent of all cash receipts.

DAIRY PRODUCTS

Milk is New York's leading agricultural product and is produced all across the state. Milk sales account for one-half of total agricultural receipts. Production in 2007 was 12.1 billion pounds with a preliminary value of \$2.38 billion in receipts. New York is the nation's 3rd leading producer and Wyoming is the State's leading county.

MEAT PRODUCTION

New York livestock producers marketed 203 million pounds of meat animals during 2007 bringing in \$119 million in cash receipts. Sales from cattle and calves accounted for \$105 million, hogs and pigs returned \$10.7 million, and sheep and lambs provided \$3.24 million.

POULTRY PRODUCTION

The receipts of New York eggs, ducks, broilers and turkeys plus the receipts for other chickens totaled \$123 million for 2007. Eggs made up \$78.6 million of the total followed by turkeys at \$8.24 million. New York ranks 22nd among all egg producing states.

CROP PRODUCTION

Field crops, fruits and vegetables returned \$1.73 billion in receipts to New York farmers in 2007.

FRUITS

The value of New York's 2007 tree fruit and grape cash receipts totaled \$333 million, up 23 percent from the 2006 value. The value of receipts was above the previous year for all fruits except pears and peaches.

Apples

New York ranks 2nd nationally in apple production with receipts worth about \$249 million in 2007. Three general areas produce most of the apples: along the southern Lake Ontario shore, along the Hudson Valley, and along the upper Lake Champlain Valley. New York's leading varieties are McIntosh, Empire, Red Delicious, and Cortland.

Grapes

Wine and juice grape production place New York 3rd behind California and Washington. The crop was worth \$49.2 million in receipts in 2007. Three-fourths of the production was for juice and one-fourth went into wines. The four major producing areas are Lake Erie area, the Finger Lakes, the Hudson Valley and the eastern end of Long Island.

Tart Cherries

Production in New York ranks 4th in the Nation. Production in 2007 totaled 11.3 million pounds with a cash receipts value of \$4.37 million.

Pears

Production ranked 4th in the nation with 11,000 tons and had a cash receipts value of \$5.12 million.

Strawberries

Strawberries are the 3rd most valuable fruit in New York and places New York 7th in national production. Growers harvested 4.60 million pounds in 2007. The crop returned \$7.59 million in cash receipts to growers.

VEGETABLES

The value of vegetables cash receipts totaled \$648 million in 2007. Fresh market vegetable production ranks 5th and processing vegetable production ranks 7th among all states. Leading crops in New York are cabbage, sweet corn and onions.

Cabbage

New York produced the 2nd largest crop of cabbage in the Nation. Cabbage is principally grown south of Lake Ontario in Monroe, Genesee, Orleans, Ontario, and Niagara counties. New York cabbage is typically stored for sale as fresh during winter months. Value of the fresh market crop in 2007 totaled \$101 million.

Sweet Corn

Produced statewide, sweet corn had a value of receipts of \$72.6 million for fresh market. Concentrations are found in the Lower Hudson Valley and around the Genesee Valley. Production of fresh market sweet corn crop ranked 4th in the nation.

Onions

An important crop with a cash receipt value of \$94.2 million in 2007. Onions are grown in New York's muck soils in Orange, Orleans, Oswego, Madison and Wayne counties. The state ranked 5th in production for 2006.

Snap Beans

Grown in the Central and Western regions for fresh and processing. The 2007 fresh market crop was valued at \$49.7 million. New York ranks 4th in fresh market production.

Other Vegetables

Tomatoes: \$32.5 million, 12th nationally
 Pumpkins: \$22.7 million, 4th nationally
 Cucumbers: \$24.5 million, 6th nationally
 Squash: \$28.4 million, 5th nationally
 Green Peas for Processing: Not published
 Cauliflower: \$53.8 million, 3rd nationally

FIELD CROPS

New York produces a variety of field crops largely in support of its dairy industry. Corn, oats and wheat are most widely grown with soybeans steadily increasing in importance. New York ranks 3rd in corn silage production with a value of \$262 million. Grain corn ranked 22nd with cash receipts of \$191 million. Soybean cash receipts were valued at \$75.2 million. The state placed 8th in oat production, 31st in wheat and 24th for soybeans production. Hay value put New York 22nd and was valued at \$327 million in 2007. Most hay is used on farms and its value is realized through sale of milk and livestock. Fall potatoes receipts reached a value of \$64 million in 2007 and made New York the 11th leading producer.

MAPLE SYRUP

At \$8.02 million, New York ranks 2nd behind Vermont in value. New York also ranks 2nd behind Vermont in 2008 production with 322,000 gallons

FLORICULTURE CROPS

In 2007, New York floriculture products were valued at \$199 million. Bedding and garden plants top the list of commodities. The wholesale value of New York's floriculture output ranks 6th nationally at \$199 million. A variety of crops are produced in 24.8 million square feet of covered area and on 838 acres of open ground. Christmas trees provide about \$21.3 million of sale.

Economic Indicators

FARM INCOME

State estimates of farm income are prepared annually by the Economic Research Service, U.S. Department of Agriculture (USDA). These estimates are based on USDA's annual Agricultural Resource Management Survey and a variety of existing independent data such as cash receipts, government program payments, property taxes, number of farms, land in farms, farm land values, and inventory changes. Farm income data, are shown in table 5.

NET FARM INCOME UP

New York Net Farm Income decreased 22 percent in 2006 to \$869 million (*table 3*). Livestock output value decreased slightly to \$2.05 billion while crop output value increased to \$1.54 billion. Purchased inputs increased to \$1.82 billion while direct government payments decreased 11 percent.

FARMS BY SALES CLASS

Of the estimated 34,200 farms in New York in 2007, only 6,100 or 18 percent of all farms had sales of \$100,000 or more, but they operated 3.77 million acres or 50 percent of all land in farms. New York farms with sales of less than \$10,000 totaled 16,800 or 49 percent of all farms.

Table 1. Number of Farms and Land in Farms, by Sales Class, New York, 1999-2007

Year	Economic Sales Class					Total
	\$1,000-\$9,999	\$10,000-\$99,999	\$100,000-\$249,999	\$250,000-\$499,999	\$500,000 & Over	
	<i>Thousand farms</i>

2005	1.65	2.10	1.35	.85	1.60	7.55
2006	1.75	2.05	1.25	.95	1.50	7.50
2007	1.64	2.09	1.20	1.00	1.57	7.50

FARMS AND FARMLAND UTILIZATION

The number of farms in New York (*places selling \$1,000 or more of agricultural products in a year*) totaled 34,200 in 2007, down from 35,000 in 2006. Land in farms totaled 7.50 million acres. Farmland accounts for 25 percent of the State's total land area.

Total cropland stands at 4.83 million acres and accounts for 64 percent of total land operated. Harvested cropland at 3.72 million acres represents 50 percent of total land operated. Field crops such as corn, hay, haylage and greenchop, small grains, potatoes, soybeans and other field crops account for 93.5 percent of the total cropland harvested. Vegetable crops make up 4.0 percent and fruit crops 2.5 percent.

Estimates of farmland utilization are shown in table 2 below. The estimates are based on annual surveys with over 6,000 farms reporting each year.

Table 2. **FARMS AND FARMLAND:** Number of Farms, Land in Farms and Land Use, New York, 1998-2007

CASH RECEIPTS

Cash receipts from New York farm marketings in 2007 totaled \$4.45 billion, up 28 percent from the 2006 total.

Receipts from livestock and poultry products were \$2.73 billion. Crop sales increased to \$1.73 billion for 2007. Dairy product sales rose to \$2.38 billion, over one-half of the total sales.

Crops

FIELD CROPS

The 2007 crop year got off to a rapid start due to dry weather conditions during the planting season. This weather pushed fieldwork and planting ahead of average. Dry weather continued throughout most of the summer, creating drought conditions, particularly in Western New York.

Grain Corn

New York production is estimated at 69.9 million bushels, up 13 percent from last year. Area for harvest totaled 550,000 acres, up 15 percent from a year ago. Yield per acre was 127 bushels per acre down 2 bushels from last year's record high. Production was valued at \$300 million, up 42 percent from 2006.

Silage Corn

Corn cut for silage totaled 8.42 million tons, an increase of 13 percent from last year. Area for harvest increased 8 percent to 495,000 acres. Yields are estimated at 17.0 tons per acre. Production was valued at \$262 million, up 15 percent from 2006.

Soybeans

The 2007 soybean crop was estimated at 7.71 million bushels, 15 percent below last year's production. Area harvested, a record high at 203,000 acres, was up 3 percent from a year ago. Yields averaged 38 bushels per acre down 8 bushels per acre from last year's record high of 46. The value of the 2007 soybean crop was set at \$75.2 million, up 33 percent from the previous year.

Wheat

Production totaled 4.42 million bushels, down 24 percent from the previous year. Harvested acreage, at 85,000 acres was down 11 percent from 2006. Winter wheat yields averaged 52 bushels per acre, down 9 bushels from a year ago. Winter wheat was valued at \$29.8 million, up 28 percent from a year ago.

Oats

Production, at 3.42 million bushels, was down 31 percent from the previous year. Area harvested, at 60,000 acres was down 10 percent from last year. The average yield, at 57 bushels per acre, was down 17 bushels from a year ago. Oat production was valued at \$7.87 million, down 5 percent from 2006.

Barley

Production of barley in New York totaled 506,000 bushels down 23 percent from a year earlier. Acreage harvested for grain totaled 11,000 acres, down 1,000 acres from 2006. The average yield per acre, at 46 bushels, was down 9 bushels from last year. Barley production was valued at \$1.39 million, up 18 percent from the 2006 value.

All Dry Hay

Production was 2.70 million tons, down 3 percent from last year's 2.79 million tons. Acreage harvested for dry hay during 2007 decreased 11 percent to 1.36 million acres. Yield, at 1.99 tons per acre, was 8 percent above a year ago. Value of production, at \$327 million, was up 4 percent from a year ago.

Alfalfa Dry Hay

New York production of alfalfa dry hay was estimated at 1.01 million tons, up 30 percent from last year's crop of 777,000 million tons. Area harvested, at 420,000 acres was 14 percent above last year. Yields averaged 2.40 tons per acre, up 15 percent from last year. Alfalfa dry hay production was valued at \$156 million, up 38 percent from the 2006 value of \$113 million.

Forage

Forage production is the sum of all dry hay and haylage/greenchop production after converting the haylage/greenchop to a dry equivalent basis. New York's acres harvested at 1,810 are down from last year's by 7 percent.

The average yield, at 2.58 tons per acre, is up from the previous year's 2.56 tons. Production at 4.67 million tons is down 7 percent from a year ago.

Potatoes

Production totaled 5.22 million hundredweight (cwt), down 8 percent from the 5.70 million cwt. produced in 2006. Harvested acreage totaled 18,300 acres, down 700 acres from last year. Yields averaged 285 cwt. per acre, down 15 cwt. from a year ago. The value of potatoes, at \$63.1 million, was down 11 percent from 2006.

Dry Beans

Production totaled 224,000 cwt., down 6 percent from 2006. Acres harvested totaled 16,500 acres, down 1,500 acres from a year earlier. The average yield, at 1,360 pounds per acre, was up 30 lbs. from last year. Dry beans were valued at \$8.56 million, up 38 percent from the 2006 value of \$6.19 million.

2007 CROP SUMMARY

April

Cool, wet weather slowed planting activities. Some field preparation and manure spreading was underway. Oats and corn planting progress began. Onion growers started to recover from flooding rains from mid-April.

May

Crop planting rapidly progressed as the weather turned dry. Corn planting, which started out behind the five year average, not only caught up but surpassed the five year percent planted completion. Progress reached 84 percent as the month ended. By the end of the month haylage, and some dry hay was cut.

June

The last of the field crops were planted and the first cutting of dry hay and haylage was finished. Dry weather started to become a factor in crop development. Corn planting was finished and soybeans were 99 percent planted.

July

Rain was badly needed. Creeks and ponds were either very low or had dried up. Second cutting of hay was very low yielding due to the lack of rain. Small grains were short and maturing early. Scattered showers during the month provided some much needed rain to parts of the state, but not all. Small grains harvesting started.

August

Western and Central New York continued to have drought-like conditions. Eastern New York started to feel the effects of no rain towards the end of the month. Potatoes started to get harvested. Dry weather impact was really showing in the hay yields for Western New York. Winter wheat and oat harvest continued. Some scattered showers moved through the region but may have proved to be too little too late.

September

Harvest began for corn for silage, soybeans, and dry beans. First frost of the season occurred. Corn silage was not weighing up very well due to lighter than normal ears in some counties. Water levels were reported low in Herkimer and St. Lawrence Counties.

October

The corn for grain harvest got underway. Third cutting of alfalfa finished ahead of the five year average. In some areas, a fourth cutting of dry hay was cut. Manure spreading and fall tillage was done. Potato harvesting finished.

Table 7. **FIELD CROPS:** Acres, Yield, Production, and Value, New York, 1998-2007

Crop and Year	Planted	Harvested	Yield per acre	Production	Marketing year average price	Value of production

* May of following year.

NEW YORK FEED GRAIN IN 2007

New York feed grain production (*corn, oats, barley and soybeans*) in 2007 was 7 percent above 2006, and 19 percent above the 10 year average. The increase in grain production from a year earlier is primarily due increased corn production.

Feed grain produced in 2007 met 113 percent of the State's feeding requirements. Over the past ten years, New York farmers have produced on average 84 percent of the feed needed for the dairy, livestock, and poultry industries in the state.

Table 13. FEED GRAIN: New York, 1998-2007

Year	Quantity Produced	Quantity Fed	Quantity of Deficit/Surplus*
		<i>1,000 tons</i>	
1998	2,095	2,328	(233)
1999	1,911	2,278	(367)
2000	1,442	2,379	(936)
2001	1,848	2,310	(462)
2002	1,466	2,323	(857)
2003	1,723	2,270	(548)
2004	1,975	2,276	(301)
2005	1,917	2,278	(361)
2006	2,103	2,007	96
2007	2,255	2,002	253

* Deficit in parenthesis.

VEGETABLES

2007 brought about a wet and cool spring which slowed crop planting. Western and central New York suffered from a dry, hot summer and fall. Eastern New York received needed rain to aide with the heat from June through August. Even with the hot, dry weather increases in production of onions, pumpkins, and acreage resulted.

Sweet corn tied the 2006 record high for yield per acre with 120 cwt.

The value of all New York vegetable production (*fresh and processed*) in 2007 totaled \$422 million. New York ranked fifth in the nation for the value of principal fresh market vegetables.

The value of New York's principal fresh market vegetables totaled \$383 million this year. Fresh market production in 2007 was estimated at 17.2 million hundredweight (cwt.). Planted acres increased from 82,430 acres in 2006 to 86,200 acres in 2007. Harvested acres increased from 76,060 acres in 2006 to 81,450 acres in 2007.

Table 14. VEGETABLES FOR FRESH MARKET

Year	Planted	Harvested	Production	Value
	<i>1,000 acres</i>		<i>1,000 cwt.</i>	<i>Million dol.</i>
1998	71.6	68.7	13,115	202.8
1999	77.3	73.6	13,563	209.9
2000	88.6	79.2	17,169	330.2
2001	96.1	91.5	17,878	334.6
2002	89.2	84.2	14,107	310.1
2003	92.3	86.1	15,095	285.3
2004	80.6	77.6	14,921	281.5
2005	83.0	78.3	14,200	302.0
2006	82.4	76.6	15,347	351.7
2007	86.2	81.4	17,221	382.9

Processing vegetables were valued at \$39.3 million in 2007 and production totaled 221 thousand tons.

Onions

New York onion yields averaged 360 cwt. per acre, up 30 cwt. from last year. Year 2007 production is estimated at 4.43 million cwt., up 15 percent from last year's production total. Value increased \$3.6 million from last year to \$47.4 million in 2007.

Cabbage

New York's fresh market cabbage production for 2007, estimated at 5.79 million cwt. is up from 2006's production of 4.61 million cwt. New York ranked second in the nation for fresh market cabbage production in 2007.

Pumpkins

New York's total value for pumpkins in 2007, estimated at \$22.7 million, is up \$4.1 million from 2006. New York ranked third in the nation in value. There were 7,000 acres harvested for a production of 1.1 million cwt., a production increase of 44 percent from 2006.

Snap Beans

New York ranked fourth in snap bean production in 2007 with 554 thousand cwt. New York also ranked second in snap bean value, \$49.7 million.

Sweet Corn

Fresh market sweet corn acreage was up in 2007. A total of 27,500 acres were harvested, a 3 percent increase from last year. Yields of 120 cwt. per acre tied a record-setting 2006 yield. However, value was down \$3 million from 2006, to \$72.6 million in 2007, because price per cwt. decreased from \$23.50 in 2006 to \$22 in 2007.

FRUIT

The value of New York's 2007 tree fruit and grape production totaled \$368 million, up 14 percent from the 2006 value. The value of utilized production was above the previous year for all fruits except pears and peaches.

Apples

The 2007 crop in New York was up 4 percent to 1.31 billion pounds. This year's value of utilized apple production, based on packinghouse door equivalent returns, totaled \$286 million. New York ranks second in apple production behind Washington.

Grapes

Production in New York increased 16 percent from 2006 to 180,000 tons. Fresh grapes totaled 4,000 tons while 176,000 tons were crushed by wineries and processors. Grapes utilized for juice accounted for 77 percent of the total grapes processed with the remaining 23 percent going for wine.

The value of the 2007 grape crop is estimated at \$49.2 million, 22 percent above the 2006 crop value. New York ranked third in grape production behind California and Washington.

Tart Cherries

New York's tart cherry crop is estimated at 11.3 million pounds, up 31 percent from the 2006 crop of 8.6 million pounds. The value of utilized production is estimated at \$3.87 million.

Sweet Cherries

New York sweet cherry production, at 1,190 tons, is up 24 percent from the 960 tons produced in 2006. The 2007 crop is valued at \$3.52 million compared to \$1.97 million a year ago.

Peaches

Peach production for the Empire State is placed at 6,300 tons, down 10 percent from the 2006 level. The value of the 2007 crop, at \$4.00 million, down 11 percent from 2006.

Pears

Production of pears in New York is estimated at 11,000 tons, down 31 percent from the 2006 output of 16,000 tons. The 2007 crop is valued at \$5.12 million, down 23 percent from 2006. New York ranks fourth nationally in pear production.

Strawberries

Production in New York was up 5 percent from 2006 to 4.60 million pounds. The value of utilized production is estimated at \$7.59 million, up 2 percent from the \$7.48 million in 2006. New York ranks seventh in strawberry production. Nationally, the strawberry crop for 2007 was placed at 2.50 billion pounds, up 4 percent from 2006.

Blueberries

Production of blueberries for the Empire State was at 2.50 million pounds. The 2007 crop is valued at \$3.37 million, a 21 percent increase from \$2.80 million in 2006. The U.S. estimate for blueberries is 283 million pounds, up slightly from 2006.

Red Raspberries

Production totaled 1.75 million pounds, an increase of 9 percent from 2006. Acreage harvested remained at 450 acres. The value of the crop also increased to 5.72 million dollars.

Table 21. **FRUIT:** Production and Value of Major Fruits, New York, 1998-2007 ^{1/}

Year	Utilized Production	Value

FLORICULTURE

New York floriculture production ranked sixth in the nation for total commercial sales in 2007. The overall value of commercial sales for operations with more than \$10,000 in sales decreased 2 percent to \$199 million. Bedding and garden plants continued to be the highest component of the total value of sales at \$110 million. Potted flowering plants were second with a value of sales of \$41.1 million, a decrease of 16 percent. Propagative materials ranked third at \$18.3 million, an increase of 6 percent from 2006.

The number of commercial growers decreased for the fifth consecutive year. During 2007, there were 698 growers. The open ground area used to produce floriculture crops in the state was down 11 percent to 838 acres. Greenhouse space for operators exceeding the \$10,000 sales level decreased 4 percent to total 24.2 million square feet in 2007. This decrease brought the total covered area (*offset by an increase in shade and temporary structures*) down to 24.8 million square feet, 3 percent less than 2006.

Nationally, the total wholesale value of floriculture crops grown by operations with \$100,000 or more of sales in the 15-State program is \$3.94 billion for 2007, up 2 percent from the revised 2006 total. These largest operations account for 96 percent of the total value of floriculture crops, but comprise only 47 percent of all producers. Bedding and Garden plants wholesale value of bedding and garden plants, at \$1.76 billion, is down 3 percent from the previous year. Potted flowering plants for indoor or patio use are valued at \$661 million, 6 percent more than in 2006. The value of 2007 foliage plant production, at \$630 million, is up 19 percent from the previous year. Value of cut flowers, at \$416 million, is up 1 percent, while cut cultivated greens, at \$92.5 million, is down 5 percent from 2006.

MAPLE

New York maple syrup 2008 production increased 44 percent from 2007. Syrup production is estimated at 322,000 gallons, up from the 224,000 gallons produced in 2007. Only Vermont produced more syrup than New York.

The number of taps, 1.48 million, increased slightly from last year. Syrup produced per tap averaged 0.218 gallons, up from 0.152 gallons in 2007. The final value of the 2007 crop is \$7.50 million.

The season opened on March 8 and closed on April 8. Sap quality was excellent and the sugar content was high. Medium syrup accounted for 46 percent of production, with 42 percent light and 12 percent dark. Producers in the North Country reported a below average maple season due to extended cold weather followed by a quick warm up. The weather did not cycle evenly around freezing. Elsewhere around the state, producers had an outstanding season. Ideal weather conditions resulted in good sap flow. Some described the season as almost perfect.

^{1/} Includes syrup later made into sugar. ^{2/} Available June 2009.

MILK PRODUCTION HIGHLIGHTS

Pasture conditions throughout most of New York were good from May through September of 2007. A dry summer encouraged early supplemental feeding of livestock. Overall milk production for 2007 was slightly above the 2006 level.

Total milk production in New York during 2007, at 12.1 billion pounds, was up slightly from 2006. The annual average number of milk cows, at 627,000 head, was down 1.7 percent from the previous year. Annual output per cow averaged 19,303 pounds, up 2.2 percent from 2006.

Cash receipts from the sale of New York milk during 2007 totaled \$2.4 billion, up 47.7 percent from the previous year. The \$19.70 per hundredweight received for all milk sold by New York farmers was up \$6.30, or 47.0 percent, from the \$13.40 received in 2006. Marketing totals include whole milk and producer-separated cream sold to plants and dealers as well as milk sold directly to consumers.

New York dairymen used 32 million pounds of milk on their farms during 2007, unchanged from the previous year. About 93.7 percent of the milk used on farms was fed back to calves. The value of all milk produced, including milk fed back to calves, totaled \$2.4 billion, up 47.7 percent from 2006.

DAIRY PRODUCTS

There were 116 plants producing one or more dairy products during 2007 in New York, 10 percent of the total plants in the nation. Cheese production, excluding cottage cheese, totaled 737 million pounds in 2007, up 5 percent from 2006. New York ranks fourth in cheese production excluding cottage cheese, behind Wisconsin, California, and Idaho respectively, accounting for

8 percent of national production. Italian cheese production of 390 million pounds, which accounted for 53 percent of New York's total cheese output, increased 2 percent from 2006. New York ranks third in the nation in production of Italian cheese.

New York continues to lead the nation in the production of all three cottage cheese categories. Creamed cottage cheese production decreased 1 percent from 2006, cottage cheese curd increased 1 percent, and low-fat cottage cheese increase 4 percent from the previous year. New York output accounted for 29 percent of all lowfat cottage cheese produced nationally in 2007. Butter production decreased 4 percent to 15.4 million pounds; in addition state-wide yogurt production decreased slightly to 236 million pounds. New York production of standard ice cream totaled 28 million gallons, up 2 percent from 2006. Lowfat ice cream production of 6.9 million gallons was 8 percent above 2006 output. Production of milk sherbet increased 6 percent, while water ice production decreased 19 percent.

Livestock and Poultry

LIVESTOCK

New York livestock producers marketed 203 million pounds of meat animals during 2007, down 14 percent from the 2006 total of 236 million pounds. Cattle and calves marketed were down 16 percent from a year earlier. Hogs and pigs were 6 percent lower, and sheep and lambs decreased 20 percent from the poundage sold in 2006. Meat animal cash receipts, totaling \$119 million, were down 31 percent from 2006.

Gross income from livestock during 2007, which includes the sale of meat animals and the value of home consumption, totaled \$122 million, down 30 percent from a year earlier. Cattle and calves accounted for 88 percent of this total.

Calf prices, averaging \$104.00 per hundred pounds liveweight (cwt.) were down 28 percent from 2006. Cattle prices, at an average of \$46.00 per cwt. during 2007, were up 4 percent. Gross income from cattle and calves during 2007 totaled \$160 million, down 10 percent from a year earlier.

Hog and pig prices averaged \$36.60 per cwt. in 2007, down 4 percent from the previous year. Gross income from hogs and pigs during 2007 totaled \$11.1 million, down 1 percent from 2006.

Sheep prices averaged \$48.80 per cwt., down 3 percent from 2006. Lamb prices averaged \$103.00 per cwt., 3 percent lower than during 2006. Gross income from sheep and lambs during 2007 totaled \$3.5 million, up 13 percent from 2006.

HONEY

Honey production from beekeepers with five or more hives in New York totaled 3.19 million pounds during 2007. This total is down 17 percent from the 2006 production of 3.84 million pounds.

The 2007 production was extracted from 56,000 colonies, down 7 percent from the 60,000 colonies in 2006. Honey yield per colony averaged 57 pounds, 11 percent below the 2006 yield. Honey stocks on hand across the State as of December 15, 2007 totaled 1.95 million pounds, a decrease of 21 percent from the 2.46 million pounds a year earlier.

Prices received by beekeepers in New York averaged \$1.42 per pound for all methods of sale during 2007, 9 percent more than the 2006 average price. Value of honey production for the State in 2007 totaled \$4.53 million, compared with \$4.99 million in 2006.

TROUT

New York trout producers sold a total of 72,000 pounds of trout valued at \$441,000 during the 12 months ending December 31, 2007. Total liveweight pounds of production, which includes food-size fish, stockers, and fingerlings, were down 45 percent from a year ago while total dollar value of sales was 18 percent below last year.

The 2007 output included 40,000 pounds of food-size trout averaging \$4.98 per pound in value, 30,000

pounds of stocker trout averaging \$5.98 per pound and 2,000 pounds of fingerlings averaging \$625.00 per 1,000 fish.

Food-size fish averaged 0.8 pound in weight, while stockers averaged 0.3 pounds. Total weight of food-size trout sold was down 44 percent from 2006. Total weight of stocker trout was down 40 percent.

The combined value of New York produced eggs, broilers, and turkeys, and the value of sales for other chickens, was \$82.2 million for the year ending November 30, 2007. This total is up 76 percent from a year earlier. Of the 2007 combined value, 90 percent was derived from eggs and 10 percent was derived from turkeys.

Egg production in New York during the 2007 year totaled 1.13 billion, up slightly from a year earlier. Egg prices were higher, increasing from 42.0 cents in 2006 to 78.7 cents in 2007. The resulting total value of \$73.9 million was 88 percent above the 2006 egg production value of \$39.2 million.

Turkey production in 2007 amounted to 15.0 million pounds, up 1 percent from 2006. The average price of 55 cents per pound was up 5 cents from the 2006 price. Value of production totaled \$8.2 million, up 11 percent from the 2006 level.

Other Agricultural Statistics

PRICES

Annual average prices for New York produced agricultural commodities during this year had livestock and crop prices mostly up. Prices for barley were down while potatoes, hay, wheat, oats, corn for grain, dry beans, and soybeans were up.

New York beef producers and dairy farmers with animals to sell saw average prices increased from a year earlier. Steers and heifers averaged \$74.70 per hundredweight (cwt.) during the year, up 8 percent from 2006, and slaughter cows were up 3 percent to \$44.90 per cwt. over the same period.

The combined price for all slaughter cattle averaged \$47.20 per cwt., up 6 percent from 2006. Calf

prices decreased 32 percent from 2006, down to \$98.70 per cwt. for 2007.

New York pork producers saw prices for hogs average \$39.80 in 2007, up 5 percent from the previous year. Lamb prices were down 12 percent to \$106.00 per cwt.

Table egg prices averaged 77.5 cents per dozen for 2007, up 90 percent from 2006.

Wholesale milk prices received by New York dairy farmers averaged \$19.70 per cwt. during 2007, up 47 percent from 2006, up 24 percent from the 2005 average price.

2007 WEATHER SUMMARY

January

January was the third in a row with above normal temperatures. The state was well on its way to another record-breaking month when the weather pattern changed, bringing more typical winter temperatures for the last half of the month. The cooler temperatures were not enough to offset the warmth, resulting in a statewide departure of 5.1 degrees above normal. Precipitation totals averaged above normal. The statewide total of 3.96 inches was 143% of normal.

February

The pattern of below normal temperatures that began mid-January continued through February. The state average of 16.4 degrees was 8.7 degrees colder than February 2006 and the coldest February since 1993. It was the 15th coldest February in New York since 1895. The state averaged 2.55 inches of precipitation, which was 106% of normal and the wettest February since 2000.

March

March averaged 1.1 degrees cooler than the 1971-2000 normal in the Empire State. Tupper Lake was the cold spot with -33 degrees on the 7th. The state averaged 3.61 inches of precipitation, which was 115% of normal. This was the wettest March since 2001.

April

The April average temperature of 41.6 degrees was 1.9 degrees below normal. This was 4.6 degrees cooler than last year and the coolest April since 2003. The state averaged 5.04 inches of precipitation or 147% of normal. The weather system that drenched southern New York mid-month brought up to a foot of heavy, wet snow to many upstate locations.

May

Average temperature in May was 56.7 degrees. This was 1.4 degrees above the long-term average and 0.3 degrees warmer than last year. May was a dry month, with a statewide rainfall average that was 50% of normal. The total precipitation of 1.83 inches was 1.68 inches less than May 2006 but 0.19 inches greater than May 2005. Overall, New York's precipitation total made this month the 11th driest May since 1895.

June

Average temperature for June was 66.4 degrees. This was 2.5 degrees above the 1971-2000 average and 1.8 degrees warmer than June 2006. The average total rainfall was 3.03 inches or 76% of the normal precipitation amount. It was the driest June since 2004.

July

The average temperature for the month of July was 66.4 degrees. This was 2.5 degrees above the 1971-2000 average. The highest temperature recorded was 97 degrees on the 27th at Willsboro. The lowest was 28 degrees on the 7th at Claryville. The average total rainfall was 3.03 inches or 76% of the normal June precipitation amount. It was the driest June since 2004. Totals ranged from 55% of normal in the Great Lakes climate division to 128% of normal in the Coastal climate division.

August

August's average temperature of 68.4 degrees was 0.9 degrees warmer than 2006, 1.6 degrees above normal. An average of 2.76 inches of precipitation was received. This was 1.64 inches less than the state received in 2006, and the driest August since 2002.

September

September's average temperature of 62.8 degrees was 3.9 degrees above normal. An average of 3.38 inches of precipitation fell. This was the driest September since 1998. Below normal precipitation throughout the summer caused moderate to severe drought conditions in parts of upstate New York. Rainfall in the Northern Plateau climate division for August and September was 50% of normal, making the 2-month period the 2nd driest on record. There were reports of record low reservoir levels, dried up wells and farm ponds.

October

October was the 2nd warmest October in New York since 1895. The average temperature of 55.6 was only 0.2 degrees shy of the warmest October. October's average of 5.13 inches of precipitation was 147% of normal. This was 1.06 inches less than last year and the driest September since 2004.

November

Temperatures in November were just below normal. The state average of 46.4 degrees was 1.1 degrees below normal. It was 6.4 degrees colder than last year and the coldest November since 1997. Precipitation totals averaged 4.21 inches or 113% of normal.

December

Below normal temperatures at the beginning of December were offset by a warm-up during the last week of 2007 to yield an average that was very close to normal. December's average temperature was 26.3 degrees; normal is 26.5 degrees. Precipitation totals averaged 149% of normal. The statewide total of 4.81 inches was 1.50 inches greater than December 2006. It was the wettest December since 1990 and the 8th wettest since 1895.

New York State
COUNTIES BY DISTRICT

County Estimates

County acreage information from the Farm Service Agency also receives consideration in preparing several crop estimates. Annual milk production per cow is based on the combined results of milk production surveys conducted monthly throughout the year.

Also, state and federal milk marketing order data by county are used in estimating cow numbers, rates of production, and total milk produced.

County estimates are published annually by the USDA's National Agricultural Statistics Service, New York Field Office for a number of crops, livestock, and farm land use categories. Acreage, yield, and production estimates are made for corn, oats, wheat, and hay. Livestock estimates include January 1 inventory of cattle, beef cows, and milk cows on farms, plus the annual average number of cows and total milk production. Also included are county estimates of the number of farms and total land in farms.

Several important sources of information provide the basis for these annual county estimates. Preliminary estimates of crops, farm land uses and livestock numbers are developed from a large scale survey at the end of each year in which over 6,000 farmers across the state are contacted.

Revisions, if necessary, are made after considering data that become available after the original estimates are prepared. These include administrative data such as milk marketing receipts and the Census of Agriculture collected every five years.

County estimates prepared by the USDA's National Agricultural Statistics Service, New York Field Office include allowances for farmers not sampled, non-respondents, and inaccessibles. Milk production totals that exceed reported marketings include a small quantity of milk on farms where produced. All county level estimates add to state level data shown elsewhere in this publication.
