<http://www.agmkt.state.ny.us>

David Paterson
Governor

Patrick Hooker
Commissioner

Dear Friends of Agriculture:

Agriculture remains a critical component to the economy and quality of life across rural New York State. In 2009, despite difficult economic conditions both on and off the farm, New York's farm community's resilience has been clear. Farm numbers and land worked remained unchanged from the year before: New York still is home to 36,600 farmers working 7.1 million acres.

While production in many sectors of the industry, such as vegetables, grapes and the number of cows milked, did slow, the greatest change in 2009 was the prices received by farmers. Milk sales still represent over half of the agricultural receipts in the State even as the price farmers received for their product dropped from \$19.20 to \$13.60 per hundredweight over the year. Prices for fresh fruit and vegetables also declined.

All of this information and more appears inside this annual compilation of agricultural statistics. This bulletin allows all New Yorkers to assess the industry and make more informed decisions on how best to assist agriculture in New York State. I appreciate all the time and effort given to collect this information and publish this summary, and hope you too will find value in the information it provides.

Thank you for supporting agriculture in New York State.

Sincerely,

A handwritten signature in black ink that reads "Patrick Hooker". The signature is written in a cursive style.

Patrick Hooker
Commissioner

New York is an Agricultural State

Agriculture is important to New York State. Agricultural production returned almost \$4.7 billion to the farm economy in 2009. About 23 percent of the state's land area, or 7.10 million acres are used by the 36,600 farms to produce a very diverse array of food products. Here are some of the items in which New York ranks high nationally:

LIVESTOCK PRODUCTS

Dairy and animal production in New York provided \$1.82 billion value of production to farmers in 2009.

DAIRY PRODUCTS

Milk is New York's leading agricultural product and is produced all across the state. Milk sales account for one-half of total agricultural receipts. Production in 2009 was 12.4 billion pounds with a preliminary value of \$1.7 billion. New York is the nation's 3rd leading producer and Wyoming is the State's leading county.

MEAT PRODUCTION

New York livestock producers marketed 228 million pounds of meat animals during 2009 bringing in \$134 million in cash receipts. Sales from cattle and calves accounted for \$124 million, hogs and pigs returned \$10.3 million, and sheep and lambs provided \$3.2 million.

POULTRY PRODUCTION

The receipts of New York eggs, ducks, broilers and turkeys plus the receipts for other chickens totaled \$82.4 million for 2009. Eggs made up \$66.4 million of the total. New York ranks 20th among all egg producing states.

CROP PRODUCTION

Field crops, fruits and vegetables returned \$2.49 billion in receipts to New York farmers in 2009.

FRUITS

The value of New York's 2009 tree fruit and grape crops totaled \$305 million, down 11 percent from the 2008 value.

Apples

New York ranks 2nd nationally with production worth about \$224 million in 2009. Three general areas produce most of the apples: along the southern Lake Ontario shore, along the Hudson Valley, and along the upper Lake Champlain Valley. New York's leading varieties are McIntosh, Empire, Red Delicious and Golden Delicious.

Grapes

Wine and juice grape production places New York 3rd behind California and Washington. The crop was worth \$48.3 million in 2009. Sixty-six percent of the production was for juice and 34 percent went into wines. The four major producing areas are Lake Erie area, the Finger Lakes, the Hudson Valley and the eastern end of Long Island.

Tart Cherries

Production in New York ranks 4th in the Nation. Production in 2009 totaled 11.2 million pounds with a value of \$2.46 million.

Pears

Production ranked 4th in the nation with 11,200 tons and had a value of \$4.85 million.

Strawberries

Strawberries are the 3rd most valuable fruit in New York and places New York 9th in national production. Growers harvested 4.40 million pounds in 2009. The crop was worth \$9.02 million to growers.

VEGETABLES

The value of vegetable production totaled \$325 million in 2009. Fresh market vegetable production ranks 5th among all states. Leading crops in New York are cabbage, sweet corn and onions.

Cabbage

New York produced the third largest crop of cabbage in the Nation. Cabbage is principally grown south of Lake Ontario in Monroe, Genesee, Orleans, Ontario, and Niagara counties. New York cabbage is typically stored for sale as fresh during winter months. Value of the fresh market crop in 2009 totaled \$54.5 million.

Sweet Corn

Produced statewide, sweet corn had a value of \$58.3 million. Concentrations are found in the Lower Hudson Valley and around the Genesee Valley. Production of fresh market sweet corn crop ranked 5th in the nation.

Onions

An important crop with value of sales of \$67.6 million in 2009. Onions are grown in New York's muck soils in Orange, Orleans, Oswego, Madison and Wayne counties. The state ranked 5th in production for 2009.

Snap Beans

Grown in the Central and Western regions for fresh and processing. The 2009 fresh market and processing crop was valued at \$38.4 million. Fresh production accounted for 61 percent of the total value. New York ranks 4th in fresh market production.

Other Vegetables

Tomatoes: \$32.7 million, 9th nationally
Pumpkins: \$21.8 million, 2nd nationally
Cucumbers: \$16.1 million, 4th nationally
Squash: \$23.0 million, 4th nationally
Cauliflower: \$2.4 million, 3rd nationally

FIELD CROPS

New York produces a variety of field crops largely in support of its dairy industry. Corn, soybeans and wheat are most widely grown. New York ranks 3rd in corn silage production with a value of \$290 million. Grain corn ranked 21st with production worth \$315 million. Soybeans were valued at \$97.8 million. The state placed 7th in oat production, 31st in wheat and 25th for soybeans production. Hay receipts put New York 27th and was valued at \$310 million in 2009. Most hay is used on farms and its value is realized through sale of milk and livestock. Fall potatoes production reached a value of \$62 million in 2009 and made New York the 11th leading producer.

MAPLE SYRUP

At \$17.8 million, New York ranks 2nd behind Vermont in value. New York also ranks 2nd behind Vermont in 2010 production with 312,000 gallons

FLORICULTURE CROPS

In 2009, New York floriculture products were valued at \$171 million. Bedding and garden plants top the list of commodities. The wholesale value of New York's floriculture output ranks 7th nationally at \$171 million. A variety of crops are produced in 23.4 million square feet of covered area and on 2,589 acres of open ground.

Economic Indicators

FARM INCOME

State estimates of farm income are prepared annually by the Economic Research Service, U.S. Department of Agriculture (USDA). These estimates are based on USDA's annual Agricultural Resource Management Survey and a variety of existing independent data such as cash receipts, government program payments, property taxes, number of farms, land in farms, farm land values, and inventory changes. Farm income data, are shown in table 5.

NET FARM INCOME UP

New York Net Farm Income increased in 2008 to \$1.15 billion (*table 3*). Livestock output value decreased to \$2.61 billion while crop output value increased to \$2.05 billion. Purchased inputs increased to \$2.43 billion while direct government payments increased to \$69 million.

FARMS BY SALES CLASS

Of the estimated 36,600 farms in New York in 2009, only 6,800 or 19 percent of all farms had sales of \$100,000 or more, but they operated 3.80 million acres or 54 percent of all land in farms. New York farms with sales of less than \$1,000 totaled 18,900 or 52 percent of all farms.

Table 1. **Number of Farms and Land in Farms, by Sales Class, New York, 2001-2009**

Year	Economic Sales Class					Total
	\$1,000-\$9,999	\$10,000-\$99,999	\$100,000-\$249,999	\$250,000-\$499,999	\$500,000 & Over	
	<i>Thousand farms</i>					
2001	19.8	11.0	4.00	1.60	1.10	37.5

2007	1.60	1.80	1.00	.90	1.90	7.20
2008	1.40	1.70	.96	.85	2.19	7.10
2009	1.50	1.80	.96	.81	2.03	7.10

FARMS AND FARMLAND UTILIZATION

The number of farms in New York (*places selling \$1,000 or more of agricultural products in a year*) totaled 36,600 in 2009, the same as in 2008. Land in farms totaled 7.10 million acres. Farmland accounts for 23 percent of the State's total land area.

Total cropland stands at 4.23 million acres and accounts for 60 percent of total land operated. Harvested cropland at 3.65 million acres represents 51 percent of total land operated. Field crops such as corn, hay, haylage and greenchop, small grains, potatoes, soybeans and other field crops account for 93.6 percent of the total cropland harvested. Vegetable crops make up 3.9 percent and fruit crops 2.5 percent.

Estimates of farmland utilization are shown in table 2 below. The estimates are based on annual surveys with over 12,000 farms reporting each year.

Table 2. **FARMS AND FARMLAND:** Number of Farms, Land in Farms and Land Use, New York, 2000-2009

Item	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009

Crops

FIELD CROPS

Grain Corn

New York production was estimated at 79.7 million bushels, down 13 percent from last year. Area for harvest totaled 595,000 acres, up 7 percent from a year ago. Yield per acre was a record high 134 bushels per acre down 10 bushels from last year. Production was valued at \$315 million, down 21 percent from 2008.

Silage Corn

Corn cut for silage totaled 8.46 million tons, a decrease of 5 percent from last year. Area for harvest increased 6 percent to 470,000 acres. Yields were estimated at 18.0 tons per acre. Production was valued at \$290 million, down 18 percent from 2008.

Soybeans

The 2009 soybean crop was estimated at a record high 10.9 million bushels, 5 percent above last year's production. Area harvested, a record high at 254,000 acres, was up 12 percent from a year ago. Yields decreased by 3 bushels per acre from the 2008 crop to average 43 bushels per acre. The value of the 2009 soybean crop was set at \$97.8 million, down 9 percent from the previous year.

Wheat

Production totaled 6.83 million bushel, down 18 percent from the previous year. Harvested acreage, at 105,000 acres, was down 14 percent from 2008. Winter wheat yields averaged 63 bushels per acre, up 10 bushels from a year ago. Winter wheat was valued at \$32.1 million, down 32 percent from a year ago.

Oats

Production, at 4.62 million bushels, was up 9 percent from the previous year. Area harvested, at 60,000 acres was down 6 percent from last year. The average yield, at 77 bushels per acre, was up 11 bushels from a year ago and ties the record set in 1985. Oat production was valued at \$9.7 million, down 25 percent from 2008.

Barley

Production of barley in New York totaled 530,000 bushels up 13 percent from a year earlier. Acreage harvested for grain totaled 10,000 acres, up 1,000 acres from 2008. The average yield per acre, at 53 bushels, was up 1 bushel from last year. Barley production was valued at \$1.86 million, down 17 percent from the 2008 value.

All Dry Hay

Production was 2.47 million tons, down 8 percent from last year's 2.69

million tons. Acreage harvested for dry hay during 2009 increased 3 percent to 1.36 million acres. Yield, at 1.82 tons per acre, was 11 percent below a year ago. Value of production, at \$310 million, was down 10 percent from a year ago.

Alfalfa Dry Hay

New York production of alfalfa dry hay was estimated at 805 thousand tons, down 15 percent from last year's crop of 945 thousand tons. Area harvested, at 350,000 acres was the same as last year. Yields averaged 2.30 tons per acre, down 15 percent from last year. Alfalfa dry hay production was valued at \$115 million, down 32 percent from the 2008 value of \$170 million.

Forage

Forage production is the sum of all dry hay and haylage/ greenchop production after converting the haylage/ greenchop to a dry equivalent basis. New York's acres harvested at 1,830 was the same as last year's. The average yield at 2.60 tons per acre was down from the previous year's 2.73 tons. Production at 4.76 million tons was down 5 percent from a year ago.

Potatoes

Production totaled 4.95 million hundredweight (cwt.), down 13 percent from the 5.70 million cwt. produced in 2008. Harvested acreage totaled a record low 16,500 down 1,300 acres from last year. Yields averaged a record high 300 cwt. per acre, down 20cwt. from a year ago. The value of potatoes, at \$61.9 million, was down 33 percent from 2008.

Dry Beans

Production totaled 193,000 cwt., down 40 percent from 2008. Acres harvested totaled 15,600 acres, down 1,200 acres from a year earlier. The average yield, at 1,240 pounds per acre was down 690 lbs. from last year. Dry beans were valued at \$8.88 million, down 51 percent from the 2008 value of \$18.1 million.

2009 CROP SUMMARY

April

Dry, warm spring weather accelerated planting activities. Field preparation and manure spreading was underway. Half of the oats were planted and corn was beginning to be sewn by month's end. Vegetable planting began earlier than usual.

May

Cool, wet weather conditions slowed planting process at the end of May. Frost from the mid-month affected fruit trees, grapes, and strawberries. Corn, oats, potatoes, and soybean planting all finished the month ahead of the five year average. By the end of the month some dry hay was beginning to be cut. Vegetables began to emerge.

June

After a week of near perfect weather, the state endured a series of both cold fronts and wet conditions. This limited field work. Storm systems allowed several rounds of showers, hindering haying activities. In the last week of the month, severe thunderstorms crossed western and central New York producing wind damage and hail across eastern and southern parts of the state.

July

Scattered showers and lower than normal temperatures continued to obstruct crop development. Warmer weather moved into the region, but farmers were still hindered by scattered showers in their planting and haying efforts.

On average, less than 4 days were suitable for fieldwork each week. Dry bean plantings were finished.

August

Temperatures averaged above normal across the state. Warmer weather was a boon for corn development, soybean flowering, and soybean pod fill. Severe weather and flash flooding occurred later in the month as Hurricane Bill remained off the east coast.

September

Warm, dry weather promoted crop maturity and allowed dry hay harvest to continue. Fieldwork and harvesting activities progressed under near perfect weather conditions. By the end of the month, oat harvest had finished and potatoes were about two-thirds harvested. Silage corn harvest passed the one-third mark. Apples were two-thirds picked and grapes one-quarter harvested.

October

Damaging, non-thunderstorm wind gusts were observed across the Empire State. Scattered showers slowed silage chopping and hindered dry hay harvest. The third cutting of alfalfa hay was completed, silage corn harvest neared completion, grain corn harvest gained momentum, and soybean harvest reached about one-third finished. Few fieldwork days were lost during the month.

NEW YORK FEED GRAIN IN 2009

New York feed grain production (corn, oats, barley and soybeans) in 2009 was 11 percent above production in 2008, but 30 percent above the 10 year average. The increase in grain production from a year earlier is primarily due to increased corn and soybean production.

Feed grain produced in 2009 met 136 percent of the State's feeding requirements. Over the past ten years, New York farmers have produced on average 100 percent of the feed needed for the dairy, livestock and poultry industries in the state. Due to a change in methodology in 2008 previous published annual bulletin feed grain tables are not comparable. All data listed in this publication use the current methodology.

Table 14. **FEED GRAIN:** New York, 2000-2009

Year	Quantity Produced	Quantity Fed	Quantity of Deficit/Surplus*
	<i>1,000 tons</i>		
2000	1,442	2,049	(607)
2001	1,848	1,982	(134)

2008	2,973	1,915	1,058
2009	2,648	1,953	695

* Deficit in parenthesis.

VEGETABLES

In 2009, New York received multiple storms during the late spring and early summer months. Excessive rainfall fell across the state, most notably effecting the planting and harvesting seasons in southeastern and western New York. Onions, cabbage, sweet corn, and other crops production were negatively effected by the weather.

The value of all New York vegetable production in 2009 totaled \$325 million. New York remained fifth in the nation for the value of principal fresh market vegetables..

The value of the Empire State's principal fresh market vegetables totaled \$300 million this year. Fresh market production in 2009 was estimated at 12.3 million hundredweight (cwt.). Planted acreage decreased from 68,710 acres in 2008 to 68,230 acres in 2009.

Processing vegetables were valued at \$47.6 million in 2009 and production totaled 208 thousand tons.

Onions

New York onion yields averaged 415 cwt. per acre, up from 410 cwt last year. Year 2009 production is estimated at 4.28 million cwt., up from 2008's 4.14 million cwt. Value is up 15 percent to a total of \$67.6 million.

Cabbage

New York's fresh market cabbage production for 2009, estimated at 3.50 million cwt., is down from 2008's production of 5.61 million cwt. Price was \$17.00 per cwt. \$2.00 more than previous year. New York ranked third in the nation for fresh market cabbage production in 2009.

Pumpkins

Pumpkins showed a value of \$21.8 million, second in the nation. There were 6,000 acres harvested for a production of 750,000 cwt. Value of production in 2009 decreased 43 percent from 2008.

Snap Beans

New York is ranked fourth in the nation on value of the 2009 New York fresh market snap bean crop, at \$23.6 million. Harvested acres increased from 6,600 to 6,700 acres. Yield decreased from 73 cwt per acre to 40 cwt per acre. Total production was 268,000 cwt., down 44 percent from last year due to lower yields.

Sweet Corn

Fresh market sweet corn acreage was down in 2009. A total of 21,500 acres were harvested, a 6 percent decrease from last year. Yields decreased from 125 cwt. per acre in 2008 to 100 cwt. per acre in 2009. Total value was at \$58.3 million, down 21 percent from last year.

FRUIT

The value of New York's 2009 tree fruit and grape production totaled \$290 million, down 18 percent from the 2008 value. The value of utilized production was below the previous year for all fruits except pears, peaches, and berries.

Apples

The 2009 crop in New York was up 9 percent to 1.38 billion pounds. This year's value of utilized apple production, based on packinghouse door equivalent returns, totaled \$209 million. New York ranks second in apple production behind Washington.

Grapes

Production in New York decreased 23 percent from 2008 to 133,000 tons. Fresh grapes totaled 2,000 tons while 128,000 tons were crushed by wineries and processors. Grapes utilized for juice accounted for 66 percent of the total grapes processed with the remaining 34 percent going for wine.

The value of the 2009 grape crop is estimated at \$48.3 million, 18 percent below the 2008 crop value. New York ranked third in grape production behind California and Washington.

Tart Cherries

New York's tart cherry crop is estimated at 11.2 million pounds, up 17 percent from the 2008 crop of 9.6 million pounds. The value of utilized production is estimated at \$2.46 million.

Sweet Cherries

New York sweet cherry production, at 1,240 tons, is up 18 percent from the 1,050 tons produced in 2008. The 2009 crop is valued at \$2.30 million compared to \$3.24 million a year ago.

Peaches

Peach production for the Empire State is placed at 6,500 tons, up 18 percent from the 2008 level. The value of the 2009 crop, at \$5.41 million, is up 13 percent from 2008.

Pears

Production of pears in New York is estimated at 11,200 tons, up 9 percent from the 2008 output of 10,300 tons. The 2009 crop is valued at \$4.85 million, up 2 percent from 2008. New York ranks fourth nationally in pear production.

Strawberries

Production in New York was down 2 percent from 2008 to 4.40 million pounds. The value of utilized production is estimated at \$9.02 million, up 21 percent from the \$7.43 million in 2008. New York ranks ninth in strawberry production. Nationally, the strawberry crop for 2009 was placed at 2.80 billion pounds, up 11 percent from 2008.

Blueberries

Production of blueberries for the Empire State was at 2.40 million pounds. The 2009 crop is valued at \$4.56 million, an 11 percent increase from \$4.11 million in 2008. The U.S. estimate for blueberries is 368 million pounds, up 5 percent from 2008.

Red Raspberries

Production totaled 1.50 million pounds, a decrease of 17 percent from 2008. Acreage harvested remained at 500 acres. The value of the crop increased to \$4.05 million.

Table 22. **FRUIT:** Production and Value of Major Fruits, New York, 2000-2009 ^{1/}

Year	Utilized Production	Value
	<i>Tons</i>	<i>1,000 dollars</i>

FLORICULTURE

New York floriculture production ranked seventh in the nation for total commercial sales in 2009. The overall value of commercial sales for operations with more than \$10,000 in sales decreased 16 percent to \$171 million. Bedding and garden plants continued to be the highest component of the total value of sales at \$98.6 million. Potted flowering plants were second with a value of sales of \$32.5 million, down 23 percent from previous year. Propagative materials ranked third at \$16.8 million, a decrease of 15 percent from 2008.

During 2009, there were 677 growers. The total covered area for the floriculture crop production was 23.4 million square feet. The total open ground area was 2,589 acres. However, these data are not comparable to the 2008 revised area of 24 million square feet and 1,382 acres, respectively, due to the combined data collection efforts of the Census of Horticulture and the Annual Floriculture Survey. The data in 2009 include area used for production of nursery crops as well as floriculture crops.

Nationally, the total wholesale value of floriculture crops grown by operations with \$100,000 or more of sales in the 15-State program is \$3.69 billion for 2009, down 6 percent from the revised 2008 total. These largest operations account for 96 percent of the total value of floriculture crops, but comprise only 45 percent of all producers. Bedding and Garden plants wholesale value of bedding and garden plants, at \$1.81 billion, is down 2 percent from the previous year. Potted flowering plants for indoor or patio use are valued at \$632 million, down 5 percent from 2008. The value of 2009 foliage plant production, at \$454 million, is down 11 percent from the previous year. Value of cut flowers, at \$359 million, is down 14 percent, while cut cultivated greens, at \$74 million, is down 19 percent from 2008.

MAPLE

New York maple syrup 2010 production decreased 29 percent from 2009. Syrup production is estimated at 312,000 gallons, down from the 439,000 gallons produced in 2009. Only Vermont produced more syrup than New York.

The number of taps, 1.90 million, increased 4 percent from last year. Syrup produced per tap averaged 0.164 gallons, down from 0.240 gallons in 2009. The final value of the 2009 crop is \$17.8 million.

The season opened on March 4 and closed on March 27. Sugar content was below average. Medium syrup accounted for 45 percent of production, with 39 percent dark and 16 percent light. The overwhelming majority of maple producers reported a poor season, although there was some variability by region. In general, temperatures started out too cold for sap flow and quickly turned too warm. The lack of below-freezing nights and above-freezing days resulted in a very short season. Producers tapping early took advantage of a few earlier than normal runs. Producers using a vacuum system fared better than those on gravity tubing or buckets.

Dairy

MILK PRODUCTION HIGHLIGHTS

Pasture conditions throughout most of New York were rated good from May through September of 2009. Wet weather kept pastures growing steadily throughout the year. Overall milk production for 2009 was slightly below the 2008 level.

Total milk production in New York during 2009, at 12.4 billion pounds, was down slightly from 2008. The annual average number of milk cows, at 619,000 head, was down 1 percent from the previous year. Annual output per cow averaged 20,071 pounds, up 1 percent from 2008.

Value of sales of New York milk during 2009 totaled \$1.7 billion, down 3.0 percent from the previous year. The \$13.60 per hundredweight received for all milk sold by New York farmers was down \$5.60, or 29 percent, from the \$19.20 received in 2008. Marketing totals include whole milk and producer-separated cream sold to plants and dealers as well as milk sold directly to consumers.

New York dairymen used 32 million pounds of milk on their farms during 2009, unchanged from the previous year. About 93.7 percent of the milk used on farms was fed back to calves. The value of all milk produced, including milk fed back to calves, totaled \$1.7 billion, down 29 percent from 2008.

DAIRY PRODUCTS

There were 112 plants producing one or more dairy products during 2009 in New York, 10 percent of the total plants in the nation. Cheese production, excluding cottage cheese, totaled 728 million pounds in 2009, up 1.8 percent from 2008. New York ranks fourth in cheese production excluding cottage cheese, behind Wisconsin, California, and Idaho respectively, accounting for 7 percent of national production.

^{1/} An operation is any place having one or more head of cattle on hand at any time during the year for 1999-2006. For 2007, an operation is any place having one or more head of cattle on hand December 31, 2007. Annual state level inventory by size group discontinued in 2008. Available from the Census of Agriculture every five years starting in 2007.

Italian cheese production of 381 million pounds, which accounted for 52 percent of New York's total cheese output, decreased 1.1 percent from 2008. New York ranks third in the nation in production of Italian cheese. New York continues to lead the nation in production of all three cottage cheese categories. Creamed cottage cheese production increased 24 percent from 2008, cottage cheese curd increased 16 percent, and low-fat cottage cheese increased 7 percent from the previous year. New York output accounted for 31 percent of all low-fat cottage cheese produced nationally in 2009. Yogurt production increased 12 percent to 252 million pounds. New York production of standard ice cream totaled 31 million gallons, down 2 percent from 2008. Low-fat ice cream production of 6 million gallons was up 2 percent from 2008. Production of milk sherbet decreased 6 percent, while water ice production decreased 27 percent.

ANNUAL NEW YORK CHEESE PRODUCTION (Excluding Cottage Cheese)

Livestock and Poultry

LIVESTOCK

New York livestock producers marketed 228 million pounds of meat animals during 2009, down 15 percent from the 2008 total of 269 million pounds. Cattle and calves marketed were down 18 percent from a year earlier. Hogs and pigs were 7 percent higher and sheep and lambs were 7 percent below pounds sold in 2008. Meat animal cash receipts, totaling \$134 million, were down 19 percent from 2008.

Gross income from livestock during 2009, which includes the sale of meat animals and the value of home consumption, totaled \$141 million, down 19 percent from a year earlier. Cattle and calves accounted for 90 percent of this total.

Calf prices, averaging \$90.00 per hundred pounds live-weight (cwt.) were down 10 percent from 2008. Cattle prices, at an average of \$53.00 per cwt. during 2009, were up 2 percent. Gross income from cattle and calves during 2009 totaled \$124 million, down 21 percent from a year earlier.

Hog and pig prices averaged \$35.20 per cwt. in 2009, down 2 percent from the previous year. Gross income from hogs and pigs during 2009 totaled \$10.3 million, up 4 percent from 2008.

Sheep prices averaged \$45.90 per cwt., up 2 percent from 2008. Lamb prices averaged \$105.00 per cwt., 1 percent above 2008. Gross income from sheep and lambs during 2009 totaled \$3.2 million, down 4 percent from 2008.

Table 51. **CATTLE & CALF OPERATIONS:**
By Herd Size, New York, 1998-2007 ^{1/}

Year	Herd size					
	1-49	50-99	100-499	500-999	1,000+	Total

HONEY

Honey production from beekeepers with five or more hives in New York totaled 3.06 million pounds during 2009. This total is down 13 percent from the 2008 production of 3.50 million pounds.

The 2009 production was extracted from 50,000 colonies, down from the 47,000 colonies in 2008. Honey yield per colony averaged 65 pounds, 7 percent below the 2008 yield. Honey stocks on hand across the State as of December 15, 2009 totaled 978 thousand pounds, a decrease of 22 percent from the 1.26 million pounds a year earlier.

Prices received by beekeepers in New York averaged \$1.83 per pound for all methods of sale during 2009, 22 percent more than the 2008 average price. Value of honey production for the State in 2009 totaled \$5.59 million, compared with \$5.78 million in 2008.

^{1/} For apiaries with 5 or more colonies.

TROUT

New York trout producers sold a total of 72,000 pounds of trout valued at \$386,000 during the 12 months ending December 31, 2009. Total production pounds, including food-size fish, stockers, and fingerlings, was down 55 percent from a year ago while total sales were 54 percent below last year.

The 2009 output included 43,000 pounds of food-size trout averaging \$4.89 per pound in value, 26,000

pounds of stocker trout averaging \$4.59 per pound, and 3,000 pounds of fingerlings averaging \$453.00 per 1,000 fish.

Food-size fish averaged 1.0 pound in weight, while stockers averaged 0.4 pound. Total weight of food-size trout sold was down 53 percent from 2008. Total weight of stocker trout was down 66 percent.

1/ The number of operations will no longer be published on an annual basis. State level numbers will only be published in conjunction with the Census of Agriculture every five years.

POULTRY

The combined value of New York produced eggs and the value of sales for other chickens, was \$74.1 million for the year ending November 30, 2009.

Egg production in New York during the 2009 year totaled 1.19 billion, up 2 percent from a year earlier. Egg prices were lower, decreasing from 99.6 cents in 2008 to 66.9 cents in 2009. The resulting total value of \$66.4 million was 31 percent below the 2008 egg production value of \$96.9 million.

Other Agricultural Statistics

PRICES

Annual average prices for New York produced agricultural commodities during this year had livestock and crop prices mostly down. Prices for wheat, oats, corn for grain, soybeans, potatoes, hay, and dry beans were down.

New York beef producers and dairy farmers with animals to sell saw average prices decreased from a year earlier. Steers and heifers averaged \$81.90 per hundredweight (cwt.) during the year, down 5 percent from 2008, and slaughter cows was down 1 percent to \$47.00 per cwt. over the same period.

The combined price for all slaughter cattle averaged \$53.00 per cwt., up 2 percent from 2008. Calf

prices decreased 10 percent from 2008, down to \$90.00 per cwt. for 2009.

New York pork producers saw prices for hogs average \$35.20 in 2009, down 2 percent from the previous year. Lamb prices were up slightly at \$105.00 per cwt.

Table egg prices averaged 65.8 cents per dozen for 2009, down 34 percent from 2008.

Wholesale milk prices received by New York dairy farmers averaged \$13.60 per cwt. during 2009, down 29 percent from 2008 and down 31 percent from the 2007 average price.

2009 WEATHER SUMMARY

January

Below normal temperatures in January chilled the state. The temperature average of 15.2 degrees was 5.4 degrees below normal. The coldest temperature was -31 degrees, recorded at Newcomb on the 16th. Precipitation totals were below normal. The state average of 2.52 inches was 84% of the normal. Many areas saw snow totals that were 10 to 20 inches above normal.

February

The below normal temperatures experienced in January continued during the first week of February, however, temperatures moderated during the rest of the month, yielding an average that was 1 degree warmer than last year and 2.1 degrees above the 30-year norm. With only 1.68 inches of precipitation, February 2009 was the driest February since 2004 and the 16th driest February since 1895. On average the state received 70% of the normal precipitation amount.

March

Temperatures averaged 33.1 degrees in March. This was 1.1 degree above normal. It was the third month in a row with below normal precipitation. The 2.79 inches that fell this month was 89% of normal.

April

April was the third consecutive month with above normal temperatures. The state average of 46.3 degrees was 2.8 degrees above normal. An early season heat wave during the last week of the month was a major contributor to the above normal monthly average. Several records were set during the event. Precipitation totals averaged below normal for the fourth month in a row. New York's April total averaged 2.52 inches, or 74% of the normal.

May

May was the fourth consecutive month with above normal temperatures. The state average of 55.7 degrees was only 0.4 degrees above normal. Precipitation totals averaged above normal. Total averaged 4.58 inches, or 124% of normal.

June

The first month of climatological summer was not very summer-like, the state average temperature was 62.9 degrees, which was 1.0 degree below normal. New York received 128% of the normal June rainfall. The total was 5.12 inches. Departures ranged from 68% of normal in the St. Lawrence Valley to 213% of normal in the Coastal division. It was the 3rd wettest June since 1895 in the Coastal division. The wet conditions were a result of lots of rainy days rather than few extraordinary events.

July

New York saw its 4th coolest July since recordkeeping began in 1895. The state average of 65.8 degrees was 2.9 degrees below normal. July was the third consecutive month with above normal rainfall. The total of 5.57 inches made month the 10th wettest in 115 years. Departures ranged from 101% of normal in the Mohawk Valley to 190% in the Hudson Valley. Albany set a new record for the month, 9.91 inches.

August

After two cooler than normal months, temperatures in August averaged 1.8 degrees above normal. New York's average was 68.5 degrees. With 131% of the normal rainfall, August averaged above normal rainfall for the 4th consecutive month. The total was 5.06 inches. It was the 9th wettest August in 115 years. Departures ranged from 66% of normal in the Coastal Division to 189% of normal in the Western Plateau.

September

Average temperature during September was 59.1 degrees. This was 0.2 degrees above normal. The state rainfall total of 2.54 inches was 61% of the normal September rainfall amount. It was the 24th driest in 115 years.

October

After two warmer-than-normal months, below normal temperatures returned in October. The state average of 46.4 degrees was 1.3 degrees below normal. After a dry September, wet conditions returned to New York in October. The state's precipitation total of 4.36 inches was 125% of normal.

November

November's temperatures averaged well above normal, making this month the 8th warmest since 1895. The state average of 42.2 degrees was 4.6 degrees above normal. New York's precipitation total of 2.06 inches was only 55% of normal. It was the driest November since 1988.

December

New York's average temperature during December was 25.4 degrees, which was 1.1 degree below normal. Precipitation totals averaged above normal. The state total of 3.65 inches was 113 percent of the normal. A major snowstorm hit the Northeast on Saturday and Sunday, Dec 19th and 20th bringing up to 27 inches of snow to eastern Long Island and around a foot to the New York metro region.

^{1/} Excludes American Indian Reservation land.

County Estimates

County estimates are published annually by the USDA's National Agricultural Statistics Service, New York Field Office for a number of crops, livestock, and farm land use categories. Acreage, yield, and production estimates are made for corn, soybeans, oats, wheat, and hay. A new publication standard was implemented in 2009 resulting in less counties being published. Livestock estimates include January 1 inventory of cattle, beef cows, and milk cows on farms, plus the annual average number of cows and total milk production. Also included are county estimates of the number of farms and total land in farms. District estimates are made for dry beans and barley.

Several important sources of information provide the basis for these annual county estimates. Preliminary estimates of crops, farm land uses and livestock numbers are developed from a large scale survey at the end of each year in which over 12,000 farmers across the state are contacted.

County acreage information from the Farm Service Agency also receives consideration in preparing several crop estimates. Annual milk production per cow is based on the combined results of milk production surveys conducted monthly throughout the year. Also, state and federal milk marketing order data by county are used in estimating cow numbers, rates of production, and total milk produced.

Revisions, if necessary, are made after considering data that become available after the original estimates are prepared. These include administrative data such as milk marketing receipts and the Census of Agriculture collected every five years.

County estimates prepared by the USDA's National Agricultural Statistics Service, New York Field Office include allowances for farmers not sampled, non-respondents, and inaccessible. Milk production totals that exceed reported marketings include a small quantity of milk on farms where produced. All county level estimates add to state level data shown elsewhere in this publication.

INTERNET ACCESS

FREE INTERNET SUBSCRIPTIONS

USDA NASS's National and State reports, data, agricultural graphics, and Agency information are available **free** on the Internet. From USDA NASS's Home Page there are several areas that can be accessed for additional information. "Today's Reports" is one of the most popular areas because it contains the reports released for that day as well as the previous work day. The 2007 Census of Agriculture is also available. National reports are generally available within 5 minutes after the release time by accessing USDA NASS's home page at:

www.nass.usda.gov

Information spotlighting New York is available on USDA NASS's New York Field Office home page address at:

www.nass.usda.gov/ny

For free electronic subscriptions, use the following method for either USDA NASS National or State office reports:

A. For subscriptions to USDA NASS National reports:

1. Log onto the following Internet web site: www.nass.usda.gov
2. At this location, click on "Publications" under Statistical Information.
3. Click on "Subscribe E-mail National" button.
4. Click on the link that says "Go to the subscription page".
5. Follow the instructions that appear on the screen.

B. For subscriptions to individual State Office reports, including New York:

1. Repeat steps 1 and 2 above.
2. Click on "Subscribe E-mail State" button.
3. Follow the instructions that appear on the screen. There is a list of all reports available from the various states. Reports from New York that are available via this subscription process are:
 - a. NEW YORK CROP WEATHER
 - b. NEW YORK FARM STATISTICS
 - c. NEW YORK PRESS RELEASES
 - d. NEW YORK ALL REPORTS

QUICK STATS ON LINE DATA BASE

One of NASS's on line features is a data base called "Quick Stats." This data base is available free of charge to all users. It contains historic estimates for all major crop and livestock items. More new items are continually being added. This data is available both at the U.S., State and County level. Most of the data goes back as far as the data series has been in existence. There is a download feature that allows you to download the data to be used in your own data base or spreadsheet. In addition, the 2007 Ag Census is also available through this data base. This feature will allow you to access specific items from the 2007 Ag Census.

To access the NASS Quick Stats:

1. Log onto the following Internet web site: www.nass.usda.gov
2. At this location, click on "Quick Stats"
3. At this point you can select U.S. and State Data, State and County data or Census of Agriculture. Under the U.S. and State Data and State and County Data, there are two types of queries. The top queries will let you get all States and the U.S. or counties in all States. The bottom queries let you select a specific State or specific counties within a State. The different commodities available are in the drop down boxes.
4. Once you have made your selection, you can click the "Get Data" key and it will bring the data download options that are available. If you do not want to view the data on the screen, you can click on the "Get Data – Download Only" button and you will get the same options as above but the data will not be shown on the screen.

CONVERSION FACTORS

LINEAR MEASURE (*LENGTH*)

1 mile	= 5,280 feet or 1,760 yards or 320 rods or 8 furlongs
1 furlong	= 40 rods or 660 feet or 1/8 of a mile
1 rod	= 16 1/2 feet or 5.5 yards
1 yard	= 3 feet
1 foot	= 12 inches

SQUARE MEASURE (*AREA*)

1 square mile (<i>section</i>)	= 640 acres or 259 hectares
1 acre	= 160 square rods or 43,560 square feet or 10 square chains
1 hectare	= 2.47 acres
1 square furlong	= 10 acres
1 square rod	= 30 1/4 square yards
1 square yard	= 9 square feet
1 square foot	= 144 square inches

CUBIC MEASURE (*VOLUME*)

1 cubic yard	= 27 cubic feet
1 cubic foot	= 1,728 cubic inches
1 cord (4' x 4' x 8')	= 128 cubic feet
1 cord foot (4' x 4' x 1')	= 16 cubic feet
2.5 cu. ft. of ear corn	= 1 bushel
1.24 cu. ft. of shelled corn	= 1 bushel

LIQUID MEASURE

1 barrel	= 31 1/2 gallons
1 gallon	= 4 quarts or 3.7853 liters
1 quart	= 2 pints
1 pint	= 16 fluid ounces

DRY MEASURES

1 bushel	= 4 pecks
1 peck	= 8 quarts
1 quart	= 2 pints

WEIGHT (*ORDINARY COMMODITIES*)

1 long ton	= 2,240 pounds
1 short ton	= 2,000 pounds
1 hundredweight (<i>cwt.</i>)	= 100 pounds
1 pound (<i>lb.</i>)	= 16 ounces

COMMODITIES

Wheat	Bushel	= 60 pounds	Apples	Bushel	= 42 pounds
Soybeans	Bushel	= 60 pounds	Peaches	Bushel	= 48 pounds
Corn (shelled)	Bushel	= 56 pounds	Pears	Bushel	= 48 pounds
High Moisture Corn	Bushel	= 65 pounds	Barley	Bushel	= 48 pounds
Grain Sorghum	Bushel	= 56 pounds	Dry Beans	Bushel	= 60 pounds
Rye	Bushel	= 56 pounds	Potatoes	Bushel	= 60 pounds
Oats	Bushel	= 32 pounds
