STATE OF NEW YORK
DEPARTMENT OF AGRICULTURE AND MARKETS

10B Airline Drive, Albany, New York 12235

518-457-8876 518-457-3087 (fax)

www.agmkt.state.ny.us

Andrew M. Cuomo
Governor

Darrel J. Aubertine
Commissioner

Dear Friends of Agriculture:

Agriculture remains a vital part of the economy and quality of life in much of New York State. A bright spot in 2010 was a rebound in cash receipts from the sale of New York milk. Those receipts totaled \$2.2 billion, up 31 percent from the previous year. The \$17.40 per hundredweight received for all milk sold by New York farmers was up \$3.80, or 28 percent from 2009.

The value of production of New York's principal field crops during 2010 totaled \$1.01 billion, up 19 percent from 2009.

There was, however, a decrease in the number of farms in New York in 2010 from 2009. The number of farms for 2010 is estimated at 36,300. Land in farms was 7 million acres.

All of this information and more can be found inside this annual compilation of agricultural statistics that allows us to accurately assess the industry and make more informed decisions on how best to assist agriculture in New York State. I appreciate all the time and effort given to collect this information and publish this summary, and hope you find value in the information it provides.

Thank you for supporting agriculture in New York State.

Sincerely,

A handwritten signature in cursive script that reads "Darrel J. Aubertine".

Darrel J. Aubertine
Commissioner

Agriculture is important to New York State. Agricultural production returned almost \$4.7 billion to the farm economy in 2010. About 23 percent of the state's land area or 7.00 million acres are used by the 36,300 farms to produce a very diverse array of food products. Here are some of the items in which New York ranks high nationally:

LIVESTOCK PRODUCTS

Dairy and animal production in New York provided \$2.39 billion value of production to farmers in 2010.

DAIRY PRODUCTS

Milk is New York's leading agricultural product and is produced all across the state. Milk sales account for one-half of total agricultural receipts. Production in 2010 was 12.7 billion pounds with a preliminary value of \$2.2 billion. New York is the nation's 4th leading producer and Wyoming is the State's leading county.

MEAT PRODUCTION

New York livestock producers marketed 289 million pounds of meat animals during 2010 bringing in \$191 million in cash receipts. Sales from cattle and calves accounted for \$183 million, hogs and pigs returned \$9.7 million, and sheep and lambs provided \$4.4 million.

POULTRY PRODUCTION

The receipts of New York eggs, ducks, broilers and turkeys plus the receipts for other chickens totaled \$111 million for 2010. Eggs made up \$66.2 million of the total. New York ranks 20th among all egg producing states.

CROP PRODUCTION

Field crops, fruits and vegetables returned \$2.05 billion in receipts to New York farmers in 2010.

FRUITS

The value of New York's 2010 tree fruit And grape crops totaled \$332 million, up 14 percent from the 2009 value.

Apples

New York ranks 2nd nationally with production worth about \$233 million in 2010. Three general areas produce most of the apples: along the southern Lake Ontario shore, along the Hudson Valley, and along the upper Lake Champlain Valley. New York's leading varieties are McIntosh, Empire, Red Delicious and Golden Delicious.

Grapes

Wine and juice grape production places New York 3rd behind California and Washington. The crop was worth \$68.4 million in 2010. Sixty-eight percent of the production was for juice and 30 percent went into wines and 2 percent for fresh market. The four major producing areas are Lake Erie area, the Finger Lakes, the Hudson Valley and the eastern end of Long Island.

Tart Cherries

Production in New York ranks 4th in the Nation. Production in 2010 totaled 7.8 million pounds with a value of \$1.36 million.

Pears

Production ranked 4th in the nation with 8,300 tons and had a value of \$4.25 million.

Strawberries

Strawberries are the 4th most valuable fruit in New York and placed New York 8th in national production. Growers harvested 3.50 million pounds in 2010. The crop was worth \$6.90 million to growers.

VEGETABLES

The value of vegetable production totaled \$409 million in 2010. Fresh market vegetable production ranks 5th among all states. Leading crops in New York are cabbage, sweet corn and onions.

Cabbage

New York produced the third largest crop of cabbage in the Nation. Cabbage is principally grown south of Lake Ontario in Monroe, Genesee, Orleans, Ontario, and Niagara counties. New York cabbage is typically stored for sale as fresh during winter months. Value of the fresh market crop in 2010 totaled \$74.4 million.

Sweet Corn

Produced statewide, sweet corn had a value of \$71.1 million. Concentrations are found in the Lower Hudson Valley and around the Genesee Valley. Production of fresh market sweet corn crop ranked 4th in the nation.

Onions

An important crop with value of sales of \$54.2 million in 2010. Onions are grown in New York's muck soils in Orange, Orleans, Oswego, Madison and Wayne counties. The State ranked 5th in production for 2010.

Snap Beans

Grown in the Central and Western regions for fresh and processing. The 2010 fresh market and processing crop was valued at \$38.4 million. Fresh production accounted for 64 percent of the total value. New York ranks 4th in fresh market production.

Other Vegetables

Tomatoes: \$28.5 million, 11th nationally
 Pumpkins: \$35.1 million, 2nd nationally
 Cucumbers: \$18.5 million, 7th nationally
 Squash: \$36.8 million, 4th nationally
 Cauliflower: \$3.42 million, 3rd nationally

FIELD CROPS

New York produces a variety of field crops largely in support of its dairy industry. Corn, soybeans and wheat are most widely grown. New York ranks 3rd in corn silage production with a value of \$311 million. Grain corn ranked 17th with production worth \$460 million. Soybeans were valued at \$147 million. The state placed 9th in oat production, 27th in wheat and 22nd for soybeans production. Hay receipts put New York 26th and were valued at \$261 million in 2010. Most hay is used on farms and its value is realized through sale of milk and livestock. Fall potatoes production reached a value of \$69.1 million in 2010 and made New York the 11th leading producer.

MAPLE SYRUP

At \$12.3 million, New York ranks 2nd behind Vermont in value. New York also ranks 2nd behind Vermont in 2011 production with 564,000 gallons

FLORICULTURE CROPS

In 2010, New York floriculture products were valued at \$183 million. Bedding and garden plants top the list of commodities. The wholesale value of New York's floriculture output ranks 7th nationally at \$183 million. A variety of crops are produced in 21.9 million square feet of covered area and on 903 acres of open ground.

New York Is An Agricultural State

Economic Indicators

FARM INCOME

State estimates of farm income are prepared annually by the Economic Research Service, U.S. Department of Agriculture (USDA). These estimates are based on USDA's annual Agricultural Resource Management Survey and a variety of existing independent data such as cash receipts, government program payments, property taxes, number of farms, land in farms, farm land values, and inventory changes. Farm income data, are shown in table 3.

NET FARM INCOME UP

New York Net Farm Income decreased in 2009 to \$553 million (*table 3*). Livestock output value decreased to \$2.03 billion while crop output value decreased to \$1.61 billion. Purchased inputs decreased to \$2.14 billion while direct government payments increased to \$149 million.

FARMS BY SALES CLASS

Of the estimated 36,300 farms in New York in 2010, only 6,600 or 18 percent of all farms had sales of \$100,000 or more, but they operated 3.70 million acres or 53 percent of all land in farms. New York farms with sales of less than \$10,000 totaled 19,000 or 52 percent of all farms.

Table 1. Number of Farms and Land in Farms, by Sales Class, New York, 2002-2010

Year	Economic Sales Class					
	\$1,000- \$9,999	\$10,000- \$99,999	\$100,000- \$249,999	\$250,000- \$499,999	\$500,000 & Over	Total
	<i>Thousand farms</i>					
2002	19.3	11.0	3.90	1.60	1.20	37.0

2009	1.50	1.80	.96	.81	2.03	7.10
2010	1.60	1.70	1.20	.70	1.80	7.00

FARMS AND FARMLAND UTILIZATION

The number of farms in New York (*places selling \$1,000 or more of agricultural products in a year*) totaled 36,300 in 2010, 300 fewer than in 2009. Land in farms totaled 7.00 million acres. Farmland accounts for 23 percent of the State's total land area.

Total cropland stands at 4.21 million acres and accounts for 60 percent of total land operated. Harvested cropland at 3.66 million acres represents 52 percent of total land operated. Field crops such as corn, hay, haylage and greenchop, small grains, potatoes, soybeans and other field crops account for 93.7 percent of the total cropland harvested. Vegetable crops make up 3.9 percent and fruit crops 2.4 percent.

Estimates of farmland utilization are shown in table 2 below. The estimates are based on annual surveys with over 9,000 farms reporting each year.

Crops

FIELD CROPS

Grain Corn

New York production was estimated at 88.5 million bushels, up 11 percent from last year. Area for harvest totaled 590,000 acres, down 1 percent from a year ago. Yield per acre was a record high 150 bushels per acre up 16 bushels from last year. Production was valued at \$460 million, up 44 percent from 2009.

Silage Corn

Corn cut for silage totaled 8.65 million tons, an increase of 2 percent from last year. Area for harvest decreased 3 percent to 455,000 acres. Yields were estimated at 19.0 tons per acre. Production was valued at \$311 million, up 7 percent from 2009.

Soybeans

The 2010 soybean crop was estimated at a record high 13.4 million bushels, 23 percent above last year's production. Area harvested, a record high at 279,000 acres, was up 10 percent from a year ago. Yields increased by 5 bushels per acre from the 2009 crop to average a record high 48 bushels per acre. The value of the 2010 soybean crop was set at \$147 million, up 48 percent from the previous year.

Wheat

Production totaled 6.70 million bushel, down 2 percent from the previous year. Harvested acreage, at 100,000 acres, was down 5 percent from 2009. Winter wheat yields averaged a record high 67 bushels per acre, up 2 bushels from a year ago. Winter wheat was valued at \$40.5 million, up 23 percent from a year ago.

Oats

Production, at 3.89 million bushels, was down 16 percent from the previous year. Area harvested, at 58,000 acres was down 3 percent from last year. The average yield, at 67 bushels per acre, was down 10 bushels from a year ago. Oat production was valued at \$7.97 million, down 10 percent from 2009.

Barley

Production of barley in New York totaled 550,000 bushels up 4 percent from a year earlier. Acreage harvested for grain totaled 10,000 acres, the same as 2009. The average yield per acre, at 55 bushels, was up 2 bushels from last year. Barley production was valued at \$1.71 million, down 8 percent from the 2009 value.

All Dry Hay

Production was 2.42 million tons, down 2 percent from last year's 2.47 million

tons. Acreage harvested for dry hay during 2010 increased 1 percent to 1.38 million acres. Yield, at 1.75 tons per acre, was 4 percent below a year ago. Value of production, at \$261 million, was down 13 percent from a year ago.

Alfalfa Dry Hay

New York production of alfalfa dry hay was estimated at 882 thousand tons, up 10 percent from last year's crop of 805 thousand tons. Area harvested, at 420,000 acres increased by percent from last year. Yields averaged 2.10 tons per acre, down 9 percent from last year. Alfalfa dry hay production was valued at \$110 million, down 4 percent from the 2009 value of \$115 million.

Forage

Forage production is the sum of all dry hay and haylage/ greenchop production after converting the haylage/ greenchop to a dry equivalent basis. New York's acres harvested at 1,950 increased from last year by 7 percent. The average yield at 2.44 tons per acre was down from the previous year's 2.60 tons. Production at 4.76 million tons was up slightly from a year ago.

Potatoes

Production totaled 5.12 million hundredweight (cwt.), up 3 percent from the 4.95 million cwt. produced in 2009. Harvested acreage totaled a record low 16,000 down 500 acres from last year. Yields averaged a record high 320 cwt. per acre, up 20cwt. from a year ago. The value of potatoes, at \$69.1 million, was up 9 percent from 2009.

Dry Beans

Production totaled 282,000 cwt., up 46 percent from 2009. Acres harvested totaled 14,900 acres, down 700 acres from a year earlier. The average yield, at 1,890 pounds per acre was up 650 lbs. from last year. Dry beans were valued at \$7.81 million, up 16 percent from the 2009 value of \$6.76 million.

2010 CROP SUMMARY

April

Warm, dry weather pushed spring field work and planting progress ahead of normal. Oat, corn, and potato plantings were well underway. Pears, sweet cherries, and peaches were all in bloom. Vegetables were planted ahead of normal timelines.

May

Near perfect weather allowed for fieldwork to progress quickly. Haying began at a rapid pace. Scattered frost affected fruit crops. Vegetable planting continued and early vegetables emerged. Oat planting was complete and corn planting was ahead of the 5-year average.

June

Scattered showers and rain slowed haying progress and fieldwork, but helped crop growth progress. Corn planting was completed by month's end. Pea harvest began. Late Blight was confirmed in tomatoes.

July

Temperatures started the month below normal, but quickly became warmer. Severe storms accompanied by hail affected parts of the state. Soybean and dry bean planting finished. Harvest began for potatoes, oats for grain, and most fresh market vegetable crops.

August

Much of the month was dominated by near to above normal temperatures. Winter wheat harvest was completed. Corn silage harvest began at the end of the month. Fruit crops were ripening about 2 weeks ahead of normal.

September

Fieldwork and harvesting activities progressed. Much of the state experienced dry weather with isolated showers and thunderstorms. Oat harvest was completed. By the end of the month, potatoes were about two-thirds harvested, and three-quarters of silage corn was harvested. Over half the apple crop had been picked, and one-third of grapes were harvested.

October

Above normal precipitation started the month as remnants of Tropical Storm Nicole moved up the East Coast. Wet weather slowed silage chopping and dry hay harvest. By month's end, the third cutting of alfalfa hay was completed, silage corn harvest neared completion, grain corn harvest was one-third completed, and soybeans were over half harvested.

Table 8. **FIELD CROPS:** Acres, Yield, Production, and Value, New York, 2001-2010

^{1/} Forage production is the sum of all dry hay production and haylage/greenchop production after converting the haylage/greenchop production to a dry equivalent basis.

NEW YORK FEED GRAIN IN 2010

New York feed grain production (corn, oats, barley and soybeans) in 2010 was 12 percent above production in 2009, and 45 percent above the 10 year average. The increase in grain production from a year earlier is primarily due to increased corn and soybean production.

Feed grain produced in 2010 met 152 percent of the State's feeding requirements. Over the past ten years, New York farmers have produced on average 104 percent of the feed needed for the dairy, livestock and poultry industries in the state. Due to a change in methodology in 2008 previous published annual bulletin feed grain tables are not comparable. All data listed in this publication use the current methodology.

Table 14. **FEED GRAIN:** New York, 2001-2010

Year	Quantity Produced	Quantity Fed	Quantity of Deficit/Surplus*
		<i>1,000 tons</i>	
2001	1,848	1,982	(134)

2009	2,648	1,931	717
2010	2,957	1,946	1,011

* Deficit in parenthesis.

VEGETABLES

In 2010, New York experienced a mild, dry spring. During the summer months, excessive rainfall and heat moved across the state. The planting and harvesting seasons in southeastern and western New York were stressed due to weather conditions. Onions and other crop production were negatively affected while cabbage and sweet corn thrived.

The value of all New York vegetable production in 2010 totaled \$409 million. New York remained fifth in the nation for the value of principal fresh market vegetables.

The value of the Empire State's principal fresh market vegetables totaled \$361 million this year. Fresh market production in 2010 was estimated at 14.2 million hundredweight (cwt.). Planted acreage increased from 68,230 acres in 2009 to 69,890 acres in 2010.

Processing vegetables were valued at \$47.6 million in 2010 and production totaled 245 thousand tons.

Onions

New York onion yields averaged 325 cwt. per acre, down from 415 cwt last year. Year 2010 production is estimated at 3.32 million cwt., down from 2009's 4.28 million cwt. Value is down 18 percent to a total of \$54.2 million.

Cabbage

New York's fresh market cabbage production for 2010, estimated at 4.34 million cwt., is up from 2009's production of 3.42 million cwt. Price per cwt. was \$18.70, 40 cents more than last year. New York ranked third in the nation for fresh market cabbage production in 2010.

Pumpkins

Pumpkins showed a value of \$35.1 million, third in the nation. There were 6,800 acres harvested for a production of 1,462,000 cwt. Value of production in 2010 increased 61 percent from 2009.

Snap Beans

New York is ranked fourth in the nation on value of the 2010 New York fresh market snap bean crop, at \$39.2 million. Harvested acres did not change from 6,700 acres. Yield increased from 40 cwt per acre to 70 cwt per acre. Total production was 469,000 cwt., up 75 percent from last year due to higher yields.

Sweet Corn

Fresh market sweet corn acreage was up in 2010. A total of 22,800 acres were harvested, a 6 percent increase from last year. Yields increased from 100 cwt. per acre in 2009 to 120 cwt. per acre in 2010. Total value was at \$71.1 million, up 22 percent from last year.

FRUIT

The value of New York's 2010 tree fruit and grape production totaled \$322 million, up 12 percent from the 2009 value. The value of utilized production was above the previous year for apples, grapes and peaches.

Apples

The 2010 crop in New York was down 7 percent to 1.26 billion pounds. This year's value of utilized apple production, based on packinghouse door equivalent returns, totaled \$227 million. New York ranks second in apple production behind Washington.

Grapes

Production in New York increased 32 percent from 2009 to 176,000 tons. Fresh grapes totaled 4,000 tons while 172,000 tons were crushed by wineries and processors. Grapes utilized for juice accounted for 70 percent of the total grapes processed with the remaining 30 percent going for wine.

The value of the 2010 grape crop is estimated at \$68.4 million, 44 percent above the 2009 crop value. New York ranked third in grape production behind California and Washington.

Tart Cherries

New York's tart cherry crop is estimated at 7.8 million pounds, down 30 percent from the 2009 crop of 11.2 million pounds. The value of utilized production is estimated at \$1.36 million.

Sweet Cherries

New York sweet cherry production, at 1,000 tons, is down 19 percent from the 1,240 tons produced in 2009. The 2010 crop is valued at \$2.26 million compared to \$2.30 million a year ago.

Peaches

Peach production for the Empire State is placed at 5,900 tons, down 9 percent from the 2009 level. The value of the 2010 crop, at \$7.02 million, is up 30 percent from 2009.

Pears

Production of pears in New York is estimated at 8,300 tons, down 26 percent from the 2009 output of 11,200 tons. The 2010 crop is valued at \$4.25 million, down 12 percent from 2009. New York ranks fourth nationally in pear production.

Strawberries

Production in New York was down 20 percent from 2009 to 3.50 million pounds. The value of utilized production is estimated at \$6.90 million, down 24 percent from the \$9.02 million in 2009. New York ranks ninth in strawberry production.

Blueberries

Production of blueberries for the Empire State was at 2.30 million pounds. The 2010 crop is valued at \$4.52 million, a slight decrease from \$4.56 million in 2009.

Red Raspberries

Production totaled 1.30 million pounds, a decrease of 13 percent from 2009. Acreage harvested remained at 500 acres. The value of the crop decreased to \$3.75 million.

Table 22. **FRUIT:** Production and Value of Major Fruits, New York, 2001-2010 ^{1/}

Year	Utilized Production	Value

FLORICULTURE

New York floriculture production ranked seventh in the nation for total commercial sales in 2010. The overall value of commercial sales for operations with more than \$10,000 in sales increased slightly to \$183 million. Bedding and garden plants continued to be the highest component of the total value of sales at \$103 million. Potted flowering plants were second with a value of sales of \$40.2 million, down 2 percent from previous year. Propagative materials ranked third at \$16.5 million, a decrease of 2 percent from 2009.

During 2010, there were 657 growers. The total covered area for the floriculture crop production was 22.5 million square feet. The total open ground area was 903 acres. However, these data are not comparable to previous years due to the combined data collection efforts of the Census of Horticulture and the Annual Floriculture Survey. The data in 2009 include area used for production of nursery crops as well as floriculture crops.

Nationally, the total wholesale value of floriculture crops grown by operations with \$100,000 or more of sales in the 15-State program is \$3.98 billion for 2010, up 3 percent from the revised 2009 total. These largest operations account for 96 percent of the total value of floriculture crops, but comprise only 44 percent of all producers. Bedding and Garden plants wholesale value of bedding and garden plants, at \$1.91 billion, is up 4 percent from the previous year. Potted flowering plants for indoor or patio use are valued at \$640 million, up 7 percent from 2009. The value of 2010 foliage plant production, at \$471 million, is up 3 percent from the previous year. Value of cut flowers, at \$375 million, is up 4 percent, while cut cultivated greens, at \$78 million, is up 6 percent from 2009.

MAPLE

New York maple syrup 2011 production increased 81 percent from 2010. Syrup production is estimated at 564,000 gallons, up from the 312,000 gallons produced in 2010. Production was the highest it has been since 1947. Only Vermont produced more syrup than New York.

The number of taps, 2.01 million, increased 6 percent from last year, which is the largest number of taps since 1950. Syrup produced per tap averaged 0.280 gallons, up from 0.164 gallons in 2010. The final value of the 2010 crop is \$12.3 million.

The season opened on March 5 and closed on April 7. Medium syrup accounted for 59 percent of production, with 20 percent dark and 21 percent light. The overwhelming majority of maple producers reported a favorable season, although there was some variability by region. In general, temperatures started out favorable for sap flow, followed by a cold spell, and then returned to favorable conditions once more. The abundance of below-freezing nights and above-freezing days resulted in a very long season.

Dairy

MILK PRODUCTION HIGHLIGHTS

Pasture conditions throughout most of New York were rated good from May through September of 2010. Wet weather kept pastures growing steadily throughout the year. Overall milk production for 2010 was 2 percent above the 2009 level.

Total milk production in New York during 2010, at 12.7 billion pounds, was up 2 percent from 2009. The annual average number of milk cows, at 611,000 head, was down 1 percent from the previous year. Annual output per cow averaged 20,807 pounds, up 4 percent from 2009.

Cash receipts from the sale of New York milk during 2010 totaled \$2.2 billion, up 31 percent from the previous year. The \$17.40 per hundredweight received for all milk sold by New York farmers was up \$3.80, or 28 percent, from the \$13.60 received in 2009. Marketing totals include whole milk and producer-separated cream sold to plants and dealers as well as milk sold directly to consumers.

New York dairymen used 32 million pounds of milk on their farms during 2010, unchanged from the previous year. About 93.7 percent of the milk used on farms was fed back to calves. The value of all milk produced, including milk fed back to calves, totaled \$2.2 billion, up 30 percent from 2009.

DAIRY PRODUCTS

There were 108 plants producing one or more dairy products during 2010 in New York, 10 percent of the total plants in the nation. Cheese production, excluding cottage cheese, totaled 743 million pounds in 2010, up 1.9 percent from 2009. New York ranks fourth in cheese production excluding cottage cheese, behind Wisconsin, California, and Idaho respectively, accounting for 7 percent of national production.

^{1/} An operation is any place having one or more head of cattle on hand at any time during the year for 1999-2006. For 2007, an operation is any place having one or more head of cattle on hand December 31, 2007. Annual state level inventory by size group discontinued in 2008. Available from the Census of Agriculture every five years starting in 2007.

Italian cheese production of 367 million pounds, which accounted for 51 percent of New York's total cheese output, decreased 3.6 percent from 2009. New York ranks third in the nation in production of Italian cheese. New York continues to lead the nation in production of all three cottage cheese categories. Creamed cottage cheese production decreased 2 percent from 2009, cottage cheese curd decreased 1 percent, and low-fat cottage cheese decreased 3 percent from the previous year. New York output accounted for 30 percent of all low-fat cottage cheese produced nationally in 2010.

Livestock and Poultry

LIVESTOCK

New York livestock producers marketed 289 million pounds of meat animals during 2010, up 27 percent from the 2009 total of 228 million pounds. Cattle and calves marketed were up 35 percent from a year earlier. Hogs and pigs were 33 percent lower, but sheep and lambs 10 percent above pounds sold in 2009. Meat animal cash receipts, totaling \$191 million, were up 43 percent from 2009.

Gross income from livestock during 2010, which includes the sale of meat animals and the value of home consumption, totaled \$197 million, up 40 percent from a year earlier. Cattle and calves accounted for 93 percent of this total.

Calf prices, averaging \$92.00 per hundred pounds live-weight (cwt.) were up 2 percent from 2009. Cattle prices, at an average of \$60.50 per cwt. during 2010, were up 14 percent. Gross income from cattle and calves during 2010 totaled \$183 million, up 48 percent from a year earlier.

Hog and pig prices averaged \$47.90 per cwt. in 2010, up 36 percent from the previous year. Gross income from hogs and pigs during 2010 totaled \$9.7 million, down 6 percent from 2009.

Sheep prices averaged \$56.50 per cwt., up 32 percent from 2009. Lamb prices averaged \$141.00 per cwt., 22 percent above 2009. Gross income from sheep and lambs during 2010 totaled \$4.4 million, up 29 percent from 2009.

Table 51. **CATTLE & CALF OPERATIONS:**

By Herd Size, New York, 1998-2007 ^{1/}

Year	Herd size					
	1-49	50-99	100-499	500-999	1,000+	Total
	<i>Number of operations</i>					
1998	8,800	3,900	4,500	220	80	17,500

HONEY

Honey production from beekeepers with five or more hives in New York totaled 3.01 million pounds during 2010. This total is up 3 percent from the 2009 production of 2.93 million pounds.

The 2010 production was extracted from 47,000 colonies, up from the 45,000 colonies in 2009. Honey yield per colony averaged 64 pounds, 2 percent below the 2009 yield. Honey stocks on hand across the State as of December 15, 2010 totaled 1.17 million pounds, an increase of 25 percent from the 936 thousand pounds a year earlier.

Prices received by beekeepers in New York averaged \$1.78 per pound for all methods of sale during 2010, 8 percent less than the 2009 average price. Value of honey production for the State in 2010 totaled \$5.35 million, compared with \$5.65 million in 2009.

TROUT

New York trout producers sold a total of 80,000 pounds of trout valued at \$401,000 during the 12 months ending December 31, 2010. Total production pounds, including food-size fish, stockers, and fingerlings, was up 11 percent from a year ago while total sales were 4 percent above last year.

The 2010 output included 56,000 pounds of food-size trout averaging \$4.45 per pound in value, 23,000

pounds of stocker trout averaging \$5.50 per pound, and 1,000 pounds of fingerlings averaging \$626.00 per 1,000 fish.

Food-size fish averaged 1.1 pound in weight, while stockers averaged 0.3 pounds. Total weight of food-size trout sold was up 30 percent from 2009. Total weight of stocker trout was down 12 percent.

Other Agricultural Statistics

PRICES

Annual average prices for New York produced agricultural commodities during this year had livestock and crop prices mostly up. Prices for wheat, oats, corn for grain, soybeans, potatoes, and dry beans were up. The price of hay decreased.

New York beef producers and dairy farmers with animals to sell saw average prices increased from a year earlier. Steers and heifers averaged \$90.60 per hundredweight (cwt.) during the year, up 10 percent from 2009, and slaughter cows was up 18 percent to \$55.60 per cwt. over the same period.

The combined price for all slaughter cattle averaged \$60.50 per cwt., up 14 percent from 2009. Calf prices increased 2 percent from 2009, up to \$92.00 per cwt. for 2010.

New York pork producers saw prices for hogs average \$49.50 in 2010, up 41 percent from the previous year. Lamb prices were up 34 percent at \$141.00 per cwt.

Wholesale milk prices received by New York dairy farmers averaged \$17.40 per cwt. during 2010, up 28 percent from 2009 but down 9 percent from the 2008 average price.

2010 WEATHER SUMMARY

January

After a cold start in most of the Northeast, temperatures during the second half of January moderated, yielding a monthly average that was 1.9 degrees F above normal. Precipitation totals averaged below normal. The average of 2.85 inches was 85% of the normal January amount.

February

The colder than normal conditions experienced at the end of January continued during the first week of February, however, temperatures moderated during the rest of the month, yielding a state average of 24.0 degrees. This was 1.2 degrees above normal. Precipitation totals were quite variable throughout the state – the Coastal division saw its 4th wettest February in 116 years while the Mohawk Valley saw its 9th dries. Overall, the state totaled 2.78 inches, which was 115% of normal.

March

With an average temperature of 38.3 degrees, March 2010 became the 6th warmest in New York since 1895. It was 6.3 degrees warmer than normal. For the second month in a row, precipitation totals averaged above normal, but were quite variable. The St. Lawrence Valley saw its 17th driest March in 116 years while the Coastal division saw its wettest. The state totaled 3.70 inches, which was 118% of normal. Departures ranged from 54% of normal in the St. Lawrence Valley, to 252% of normal in the Coastal climate division.

April

April was the fourth consecutive month with an average temperature that was above normal and the second month in a row that the average temperature was ranked among the top ten warmest since 1895. April was the 2nd warmest in 116 years, with a monthly average of 49.6 degrees. This was 6.1 degrees above normal. The state's precipitation total was 2.08 inches, which was 61 percent of normal. It was New York's 15th driest April since recordkeeping began in 1895 and the driest April since 2001. Two months of below normal precipitation in western portions of the state have led to drought concerns as the growing season begins.

May

May was the fifth consecutive month with above normal temperatures. The monthly average was 3.98 degrees above normal. Precipitation totals were below normal. The state averaged 2.62 inches, or 71% of the normal precipitation amount.

June

Temperatures averaged above normal in June, making this month the sixth in a row with warmer than normal readings. The state averaged 65.7 degrees, which was 1.8

degrees above average. New York averaged above normal rainfall in June. The state total of 5.40 inches was 135% of normal. It was the wettest June since 2006 and the 12th wettest since 1895.

July

July was the sixth warmest July since 1895 and the seventh consecutive month to average warmer than normal. New York's average temperature was 71.9 degrees, which was 3.2 degrees above normal. New temperature records were set during a heat wave in early July that pushed the mercury into the upper 90's and low 100's. Rainfall averaged just above normal. The state average was 4.04 inches, which was 106% of normal. The big weather story this month was the heat wave from July 4th to July 9th. Severe storms, packing strong winds and heavy rain, impacted the state from the 21st to the 25th. Four tornados were confirmed on the 24th and 25th.

August

While August was not as steamy as July, the run of above normal temperatures that began in January continued. With an average temperature of 68.8 degrees, this month was 2.0 degrees above normal. Rainfall totals were above normal for the third month in a row. The state averaged 4.52 inches, which was 177% of the normal amount. Drenching rain on the 22nd and 23rd contributed to monthly totals of 5 inches or more in many locations.

September

September temperatures averaged 2.5 degrees warmer than normal continuing the trend that began in January 2010. The average was 61.4 degrees. Rainfall totals averaged below normal. On average, the state received 3.11 inches or 75% of the normal rainfall amount.

October

October was the tenth month in a row with above normal temperatures. The state's average temperature of 49.0 degrees was 1.2 degrees above normal. Rainfall totals averaged 6.97 inches, which was 200% of normal. It was the wettest October since 2004 and the 4th wettest October in 116 years.

November

November was the 11th consecutive month with above normal temperatures. The monthly average temperature of 38.2 degrees was 0.6 degrees above normal. Precipitation totals were below normal. New York's total was 2.91 inches, which was 78% of normal.

December

The 11-month string of above normal temperatures was broken in December. New York's average this month was 23.5 degrees which was 3.0 degrees below normal. Precipitation totals were variable through the state, but overall, averaged 3.25 inches, which was 100% of normal.

**New York State
COUNTIES BY DISTRICT**

County Estimates

County estimates are published annually by the USDA's National Agricultural Statistics Service, New York Field Office for a number of crops, livestock, and farm land use categories. Acreage, yield, and production estimates are made for corn, soybeans, oats, wheat, and hay. A new publication standard was implemented in 2009 resulting in less counties being published. Livestock estimates include January 1 inventory of cattle, beef cows, and milk cows on farms, plus the annual average number of cows and total milk production. Also included are county estimates of the number of farms and total land in farms. District estimates are made for dry beans.

Several important sources of information provide the basis for these annual county estimates. Preliminary estimates of crops, farm land uses and livestock numbers are developed from a large scale survey at the end of each year in which over 9,000 farmers across the state are contacted.

County acreage information from the Farm Service Agency also receives consideration in preparing several crop estimates. Annual milk production per cow is based on the combined results of milk production surveys conducted monthly throughout the year. Also, state and federal milk marketing order data by county are used in estimating cow numbers, rates of production, and total milk produced.

Revisions, if necessary, are made after considering data that become available after the original estimates are prepared. These include administrative data such as milk marketing receipts and the Census of Agriculture collected every five years.

County estimates prepared by the USDA's National Agricultural Statistics Service, New York Field Office include allowances for farmers not sampled, non-respondents, and inaccessible. Milk production totals that exceed reported marketings include a small quantity of milk used on farms where produced. All county level estimates add to state level data shown elsewhere in this publication.

INTERNET ACCESS

FREE INTERNET SUBSCRIPTIONS

USDA NASS's National and State reports, data, agricultural graphics, and Agency information are available **free** on the Internet. From USDA NASS's Home Page there are several areas that can be accessed for additional information. "Today's Reports" is one of the most popular areas because it contains the reports released for that day as well as the previous work day. The 2007 Census of Agriculture is also available. National reports are generally available within 5 minutes after the release time by accessing USDA NASS's home page at:

www.nass.usda.gov

Information spotlighting New York is available on USDA NASS's New York Field Office home page address at:

www.nass.usda.gov/ny

For free electronic subscriptions, use the following method for either USDA NASS National or State office reports:

A. For subscriptions to USDA NASS National reports:

1. Go to **www.nass.usda.gov**
2. On the right side of the page under "**Receive Reports by E-mail,**" click "**National.**"
3. Next click "**Register**" to create an account.
4. Complete the registration page and click "**Submit Registration**".
5. You will receive an e-mail to verify your e-mail address. When you receive the e-mail, click on the link provided to activate your online subscription.
6. Now you are ready to customize your subscription! Return to www.nass.usda.gov and again click on "**National**" under "**Receive Reports by E-mail.**"
7. Next enter your **e-mail address** and **password**, and then click "**Submit.**"
8. Select the NASS reports you would like to receive via e-mail and click "**Sign-Off.**"

B. For subscriptions to individual State Office reports, including New York:

1. Go to **www.nass.usda.gov**
2. On the right side of the page under "**Receive Reports by E-mail,**" click "**State.**"
3. Next select the reports you wish to receive. To select more than one report, press and hold "**ctrl**" on your keyboard and click on the additional reports.
4. Enter name and e-mail address.
5. Then click "**Submit.**"

QUICK STATS ON LINE DATA BASE

One of NASS's on line features is a data base called "Quick Stats." This data base is available free of charge to all users. It contains historic estimates for all major crop and livestock items. More new items are continually being added. This data is available both at the U.S., State and County level. Most of the data goes back as far as the data series has been in existence. There is a download feature that allows you to download the data to be used in your own data base or spreadsheet. In addition, the 2007 Ag Census is also available through this data base. This feature will allow you to access specific items from the 2007 Ag Census.

To access the NASS Quick Stats:

1. Log onto the following Internet web site: www.nass.usda.gov
2. At this location, click on "Quick Stats"
3. At this point you can select U.S. and State Data, State and County data or Census of Agriculture. Under the U.S. and State Data and State and County Data, there are two types of queries. The top queries will let you get all States and the U.S. or counties in all States. The bottom queries let you select a specific State or specific counties within a State. The different commodities available are in the drop down boxes.
4. Once you have made your selection, you can click the "Get Data" key and it will bring the data download options that are available. If you do not want to view the data on the screen, you can click on the "Get Data – Download Only" button and you will get the same options as above but the data will not be shown on the screen.

CONVERSION FACTORS

LINEAR MEASURE (*LENGTH*)

1 mile	= 5,280 feet or 1,760 yards or 320 rods or 8 furlongs
1 furlong	= 40 rods or 660 feet or 1/8 of a mile
1 rod	= 16 1/2 feet or 5.5 yards
1 yard	= 3 feet
1 foot	= 12 inches

SQUARE MEASURE (*AREA*)

1 square mile (<i>section</i>)	= 640 acres or 259 hectares
1 acre	= 160 square rods or 43,560 square feet or 10 square chains
1 hectare	= 2.47 acres
1 square furlong	= 10 acres
1 square rod	= 30 1/4 square yards
1 square yard	= 9 square feet
1 square foot	= 144 square inches

CUBIC MEASURE (*VOLUME*)

1 cubic yard	= 27 cubic feet
1 cubic foot	= 1,728 cubic inches
1 cord (4' x 4' x 8')	= 128 cubic feet
1 cord foot (4' x 4' x 1')	= 16 cubic feet
2.5 cu. ft. of ear corn	= 1 bushel
1.24 cu. ft. of shelled corn	= 1 bushel

LIQUID MEASURE

1 barrel	= 31 1/2 gallons
1 gallon	= 4 quarts or 3.7853 liters
1 quart	= 2 pints
1 pint	= 16 fluid ounces

DRY MEASURES

1 bushel	= 4 pecks
1 peck	= 8 quarts
1 quart	= 2 pints

WEIGHT (*ORDINARY COMMODITIES*)

1 long ton	= 2,240 pounds
1 short ton	= 2,000 pounds
1 hundredweight (<i>cwt.</i>)	= 100 pounds
1 pound (<i>lb.</i>)	= 16 ounces

COMMODITIES

Wheat	Bushel	= 60 pounds	Apples	Bushel	= 42 pounds
Soybeans	Bushel	= 60 pounds	Peaches	Bushel	= 48 pounds
Corn (shelled)	Bushel	= 56 pounds	Pears	Bushel	= 48 pounds
High Moisture Corn	Bushel	= 65 pounds	Barley	Bushel	= 48 pounds
Grain Sorghum	Bushel	= 56 pounds	Dry Beans	Bushel	= 60 pounds
Rye	Bushel	= 56 pounds	Potatoes	Bushel	= 60 pounds
Oats	Bushel	= 32 pounds
