² Beginning in 2016, Total Production and Utilized Production were estimated for each crop. In previous years, estimates were made for Production, which represented the portion of the crop that was harvested and sold. This most closely represents the Utilized Production in the current report and can be used for comparison.

³ Beginning in 2016, Harvested Not Sold estimates were added to the estimating program. This represents the difference between Total Production (the amount of the crop harvested from the field) and Utilized Production (the amount of the crop that was sold).
