Released June 9, 2014

Excellent Week for Field Work: New York had an average of 6.0 days suitable for field work. It was another beautiful weather week throughout New York. Most days were sunny and warm with a few rain showers sprinkled throughout different days. Corn and soybean planting is going on at full pace while the weather is nice and early planting are emerging. Farmers are busy cutting and baling hay in fields. Wheat is getting high and most is said to be in good shape. Fruit trees and grapes are looking good with most trees in bloom or past bloom. Overall, it was a great week for farmers to catch up on plantings that were delayed at the beginning of the spring. Field activities for the week include cutting hay, applying fertilizer, plowing and planting of fields, spraying of trees and fixing machinery.

REPORTERS COMMENTS, By County

Reporters are from Extension Service (Ext), Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA), Conservation District (CD), farmers, commodity specialists, or other knowledgeable individuals.

Cortland/Tompkins, Jennifer Doty

A few farms have completed all planting and haylage, while many others still struggle to complete both. Ground is becoming dry, but soaking rain Sunday night should help.

Erie County, Emily Dechow

Clear weather allowed for planting to progress in Erie County.

Franklin County, Jennifer Bosley

Although producers have been 3 to 4 weeks behind, progress has been made in planting. There was quite a bit of first cutting being chopped or baled and wrapped. Pasture conditions are very good.

Genesee/Niagara/Orleans Counties, Nathan Herendeen

Most wheat is pollinated. Wheat has improved. Corn making rapid growth. Corn and soy planting making rapid progress.

Jefferson County, Mike Hunter

Dry field conditions have allowed growers to catch up on corn and soybean planting. Soybean planting is progressing at a rapid rate.

Madison County, Karen Baase

It's dry although the scattered rains showers on Tuesday helped a bit. Haylage harvest is going non-stop. Some dry hay went in last weekend and will continue, but it's been held up with cloudy conditions recently and an occasional brief, spotty shower during the last part of this week.

Madison County, Jessica Pylman

Things were starting to dry out in a majority of areas in Madison County however, Sunday night/Monday morning rains will be a great help. Still some planting going on but the majority of

soybean and corn is planted. There has been a lot of first cutting being baled and chopped this past week.

Oneida County, William Paddock

Awesome week for farmers to work in the fields. Many progressive producers stopped planting and went doing haylage and baleage the past two weeks and then have returned to finish planting. Hay looks pretty good overall and not hearing of very much winterkill at all. Pastures are doing great as well. Farmers got a great deal done this past week.

Ontario County, Joann Rogers

Ontario County producers had another productive week of planting vegetables, corn and soybeans; harvesting haylage and baling dry hay and baling rye straw. Winter wheat is heading out and the field corn is emerging.

Otsego County, Lisa Knapp

Planting continues along with getting some dry hay harvested.

Schuyler/ Seneca Counties, Kathy Mastellar

A week of nice weather resulted in a lot of ground being planted, but there is still more to go. Prevented planted decisions will be made this week due to a prediction of rain for most days.

Suffolk County, Alice Wise

In Long Island vineyards, growers are shoot thinning and lifting catch wires. Bloom is not too far off.

Suffolk County, Susan Gawlik

Planting continues and crops are catching up after some warm sunny days this past week.
