Week ending November 26, 2017

Issued weekly on the internet, April - November
by the Northeastern Regional Field Office of NASS

nassrfooner@nass.usda.gov

Released November 27, 2017

Good week for field work: New York averaged 4.5 days suitable for field work.

Temperatures ranged from 3 degrees above normal to 6 degrees below normal. Weekly precipitation ranged from 0 to 1.37 inches. The season is wrapping up with some areas still harvesting corn last week due to muddy, wet fields and slow maturation. That said, corn yields have been described as excellent. Soybeans wrapped up in most areas and winter wheat progressed. Long Island vineyards prepared blocks for pruning and began some renovations for next spring.

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal.

Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees Fahrenheit. Climate normals used are for the 1981-2010 period.

Effective with this release, the weather data source has been changed. The basic format of the data tables has not changed, but the data content will be based on newer historical datasets used for average calculations and changes in methodology subroutines for missing data.

REPORTERS COMMENTS, By County

Reporters are from Extension Service (Ext), Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA), Conservation District (CD), farmers, commodity specialists, or other knowledgeable individuals.

Broome County; Maria Heath:

Weather was very conducive to grain harvesting.

Cayuga County; Colleen Cargile, Cayuga County FSA:

There are still some corn and soybeans to be harvested and until the temperatures stay below freezing and allow the ground to freeze up, harvesting may be quite difficult.

Genesee/ Niagara/ Orleans Counties; Nathan R Herendeen:

Corn grain harvest continued with difficult harvest conditions- mud and wet fields. Yields have been excellent. Winter wheat showing "fall yellows" - likely yellow virus and fall rust but not likely to be a problem in spring or hurt winter survival. Wheat is generally excellent as it goes into winter dormancy.

Livingston County; Dean R Pendergast:

Some soybeans remained to be harvested. Corn harvest was moving along well.

Ontario County; Joann Rogers, County Executive Director FSA:

Fall harvest continued with most soybeans harvested. Corn for grain continues. Some reports came in regarding cracked grain corn.

Schuyler/ Seneca Counties; Kathy Mastellar, CED, Seneca/Schuyler FSA:

Corn harvest continued. Fields are wet and muddy. A few soybeans remain because they were still green.

Suffolk County; Alice V Wise:

Long Island vineyard crews are preparing blocks for pruning. Some vineyards are renovating blocks in preparation for planting next spring.
