New York farmers and ranchers: time is running out to complete the 2017 Census of Agriculture *NASS conducting phone and in-person follow-up*

ALBANY, NY - Apr 26, 2018 – The U.S. Department of Agriculture’s (USDA) National Agricultural Statistics Service (NASS) is reminding New York farmers and ranchers that the window is closing on the opportunity to participate in the 2017 Census of Agriculture. To date, NASS has received more than 1.5 million completed questionnaires, of which almost 26,000 are from New York. But both the national and New York return rates are currently lower than at this point in the 2012 Census. NASS is encouraging New York producers who have not returned their completed Census questionnaires to do so as soon as possible to avoid phone and in-person follow-up.

“NASS is grateful for the response from producers to date, but it is important that the others who received a Census questionnaire join their neighbors, colleagues, friends, and family in being part of the Census count,” said Blair Smith, State Statistician of the USDA’s National Agricultural Statistics Service, New York Field Office.

“If you produced and sold \$1,000 or more of agricultural product in 2017, or normally would have produced and sold that much, we need to hear from you,” said Smith. “If you’re a landowner who leases your land to a producer, we need to hear from you. If you received a census but do not fit this definition of a farm, please write your status on the form and send it back.”

Smith noted that NASS has already begun to follow up with producers who have not yet completed the questionnaire.

“We sent the questionnaire to many potential farmers and ranchers who may not be familiar with it. The follow-up will give them and other producers the opportunity to ask questions,” said Smith. “Some farmers and ranchers were waiting until they gathered their tax documents before completing the Census; having that information handy will certainly make filling out the questionnaire faster and easier.”

The Census of Agriculture is the only comprehensive source of agriculture data for every state and county in the nation. Census data are used by policymakers, trade associations, researchers, agribusinesses, educators, and many others. The information helps inform decisions on farm policy, rural development, and new farm technologies. It also aids in the creation and funding of loans and insurance

programs and other forms of assistance, as well as in the cultivation of the next generation of farmers and ranchers.

The Census differs from other NASS surveys. It provides important demographic information and data on certain commodities, such as horses, bison, and Christmas trees that would not otherwise be available. Revisions to the questionnaire in 2017 include new queries about military veteran status, decision-making on the farm, and food marketing practices.

New York producers can respond to the 2017 Census of Agriculture online at www.agcounts.usda.gov or by mail. The same law, Title 7 USC 2204(g) Public Law 105-113, that requires response also requires NASS to keep all information confidential, to use the data only for statistical purposes, and to only publish in aggregate form to prevent disclosing the identity of any individual producer or farm operation. NASS will release Census results in February 2019.
