**North Dakota Crop, Livestock, & Weather Report**

**General:** Small grain harvest was in full swing last week while variable amounts of rainfall received across the state, according to the USDA, National Agricultural Statistics Service, North Dakota Field Office. Reporters indicated that while some areas received much needed precipitation, other areas need precipitation especially for row crops and livestock. Statewide, on average, there were 6.4 days suitable for fieldwork. Topsoil moisture supplies were rated 23 percent very short, 44 short, and 33 adequate. Subsoil moisture supplies were rated 14 percent very short, 44 short, 41 adequate, and 1 surplus.

**Crops:** Small grain harvest progressed last week with barley. Durum wheat, spring wheat, and oats reaching 33 percent, 14 percent, 26 percent, and 37 percent harvested, respectively. Seventy-eight percent of canola was turning or beyond, up 22 percentage points from last week. Corn reached 95 percent silking, ahead of 49 percent last year and the five-year (2007-2011) average of 52 percent. Eighty-five percent of dry edible beans were setting pods compared with 22 percent last year and the average of 36 percent. Dry edible peas were 84 percent mature while 34 percent had been harvested as of Sunday. Flaxseed was 50 percent turning, compared with 6 percent last year and 16 percent on average. Lentil harvest was 11 percent complete last week. Potatoes rows filled progressed 12 percentage points to 88 percent, ahead of 52 percent last year and the average of 62 percent. Eighty-eight percent of the soybean crop were setting pods on Sunday, compared with 24 percent last year and 41 percent on average. Sunflower blooming made the greatest progress last week advancing 31 percentage points to 51 percent complete, compared with 10 percent last year and 15 percent on average.

**Livestock:** Reporters noted that water is needed for the regrowth of pasture and livestock water supply. Pasture and range conditions were 8 percent very poor, 30 poor, 38 fair, 23 good, and 1 excellent. Cutting of other hay was 86 percent complete. The second cutting of alfalfa was 52 percent complete. Hay conditions were rated 15 percent very poor, 28 poor, 36 fair, 19 good, and 2 excellent. Stockwater supplies were rated 11 percent very short, 34 short and 55 adequate.
