NORTH DAKOTA CROP PROGRESS AND CONDITION

FARGO, ND August 5, 2013 – For the week ending August 4, 2013, some western and extreme northern and southern areas of the state received significant rainfall while most central and eastern areas received little to no moisture, according to the USDA’s National Agricultural Statistics Service. Average temperatures remained cool across the state last week. The cooler temperatures have been good for small grain development, but warmer weather and additional moisture is needed to help row crops. Harvest of winter wheat began last week in some southern areas. Statewide, there were 6.4 days suitable for fieldwork. Topsoil moisture supplies rated 7 percent very short, 32 short, 56 adequate, and 5 surplus. Subsoil moisture supplies rated 5 percent very short, 27 short, 63 adequate, and 5 surplus.

**Field Crops Report:** Spring wheat headed was 98 percent, behind 100 last year and 99 average. Turning color was 54 percent, well behind last year at 98 and 62 average. Ripe was 7 percent. Condition rated 1 percent very poor, 4 poor, 21 fair, 65 good, and 9 excellent.
