NORTH DAKOTA CROP PROGRESS AND CONDITION

FARGO, ND June 24, 2013 – For the week ending June 23, 2013, strong storms late in the week in the central and eastern portions of the state caused localized flooding and crop damage, according to the USDA’s National Agricultural Statistics Service, North Dakota Field Office. The additional precipitation brought the small amount of planting that was still occurring essentially to a close for many crops. Statewide, there were 4.7 days suitable for fieldwork. Topsoil moisture supplies rated 0 percent very short, 1 short, 62 adequate and 37 surplus. Subsoil moisture supplies rated 0 percent very short, 2 short, 69 adequate and 29 surplus. Other activities that occurred during the week included haying and applying pesticides.

**Field Crops Report:** Spring wheat seeding was 91 percent complete, behind last year at 100 and 98 average. Emerged was 79 percent, behind last year at 100 and 96 average. Jointed was at 21 percent, behind last year at 97 and 61 average. Condition rated 1 percent very poor, 2 poor, 22 fair, 60 good, and 15 excellent.

Durum wheat seeding was 93 percent complete, behind 100 for 2012 but near 91 average. Emerged was 81 percent, behind last year at 100 and 88 average. Jointed was at 15 percent, behind last year at 94 and 46 average. Condition rated 0 percent very poor, 2 poor, 21 fair, 71 good, and 6 excellent.
