NORTH DAKOTA CROP PROGRESS AND CONDITION

Fargo, ND – For the week ending May 29, 2016, much needed rain was received across the State, according to the USDA’s National Agricultural Statistics Service. Reported rainfall totals ranged from a quarter inch to two inches, replenishing topsoil moisture and helping seed germination. There were some isolated reports of crops being drowned out because of too much rain. Producers were busy spraying weeds in emerged small grain fields. Temperatures ranged from two degrees below normal in the western part of the State to eight degrees above normal in the east. There were 4.6 days suitable for fieldwork. Topsoil moisture supplies rated 1 percent very short, 15 short, 78 adequate, and 6 surplus. Subsoil moisture supplies rated 1 percent very short, 17 short, 80 adequate, and 2 surplus.
