Estimates made by the Ohio Field Office are based on information supplied by farmers and agri-businesses. These estimates are the result of the data collected on probability designed surveys. Considerable information is collected from farmers randomly selected for telephone or personal interviews. Data for county estimates are collected from a large mail survey and, where available, check data are used to the extent possible. Our sincere thanks are also extended to the office staff, field and telephone interviewers of the Ohio Field Office.

2006 LIVESTOCK, DAIRY AND POULTRY SUMMARY

Highlights of Ohio's livestock statistics for 2006 include: cattle inventories dropping to 1.26 million head; dairy cow numbers increasing by 1,000 head; total milk production rose 2 percent over 2005 production; sheep breeding stock numbers declined 3 percent and wool production dropped 5 percent from 2005. Other 2006 highlights include: hog inventories were the highest since 1998; egg production increased slightly over 2005 production; broiler numbers were up 6 percent over 2005; turkey numbers fell 15 percent from 2005 and honey production was 24 percent lower than 2005.

Cattle and calf inventories, at 1.26 million on January 1, 2007, dropped 20,000 head from last year and 40,000 head from 2005. Beef cow inventories were down marginally and remained virtually unchanged from 2006. Steers were up 3 percent while calves and replacement heifers made up the bulk of the decreased inventory.
