

Ohio Crop Weather

OH-CW1516

April 11, 2016

Week marked by precipitation and cold temperatures

Farmers were kept out of their fields this week due to continued precipitation and cold temperatures. There were 0.6 days suitable for fieldwork for the week ending April 10th according to Cheryl Turner, Ohio State Statistician of the USDA's National Agricultural Statistics Service. Some areas saw up to 3 inches of snow during the weekend, continuing the pattern of cold temperatures. The percentage of the State with surplus topsoil and subsoil moisture continued to climb. Winter wheat continues to look excellent despite the temperatures. Oat emergence is on pace with the average, largely due to early plantings before the rains started. Some livestock are having respiratory issue due to the cold weather. There have been reports of damage to the Peach crop as well as other stone fruit due to the freezes.
