

Ohio Crop Weather

OH-CW1616

April 18, 2016

Field work limited as fields dry out

Topsoil and subsoil moisture declined this week due to less precipitation and warmer temperatures over the weekend, though field work was still limited by soggy fields. There were 1.9 days suitable for fieldwork for the week ending April 17th according to Cheryl Turner, Ohio State Statistician of the USDA's National Agricultural Statistics Service. Oat planting progressed behind the 5-year average, but ahead of 2015. Corn planting remains at zero percent planted. Winter wheat maturity is ahead of schedule, and the crop continues to look great. Some damage to fruit trees is anticipated due to the recent drop in temperatures, but the extent is unknown at this time. While planting was very limited this week, growers continued prep work for the season. Other activities this week included tillage, spraying, hauling manure, and installing tile.

Soil Moisture: Week Ending 04/17/16

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	0	1	61	38
Subsoil moisture	0	1	71	28

Crop Progress : Week Ending 04/17/16

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork ..	1.9	0.6	-	-
Corn Planted			1	4
Winter Wheat Jointing	36	22	1	17
Oats Planted	21	8	12	27
Oats Emerged	6	3	1	8

- Represents zero.

Crop Condition: Week Ending 04/17/16
