Ohio Crop Weather

August 1, 2016

Rains Bypass Dry Areas

Isolated areas received varied amounts of rainfall, which helped **corn** and **soybean** progress, while other areas are still experiencing severe dry conditions, according to Cheryl Turner, Ohio State Statistician of the USDA's National Agricultural Statistics Service. There were 6.0 days available for fieldwork for the week ending July 31st. **Oat** harvest continued to progress well ahead of the five year average. Corn, soybeans, **hay**, and **pasture** conditions all declined from previous week. Concern for corn during pollination remained high. Livestock producers reported feeding hay, and noted that the prospects for the 2016 hay crop were declining.
