

OH-CW3516

Ohio Crop Weather

August 29, 2016

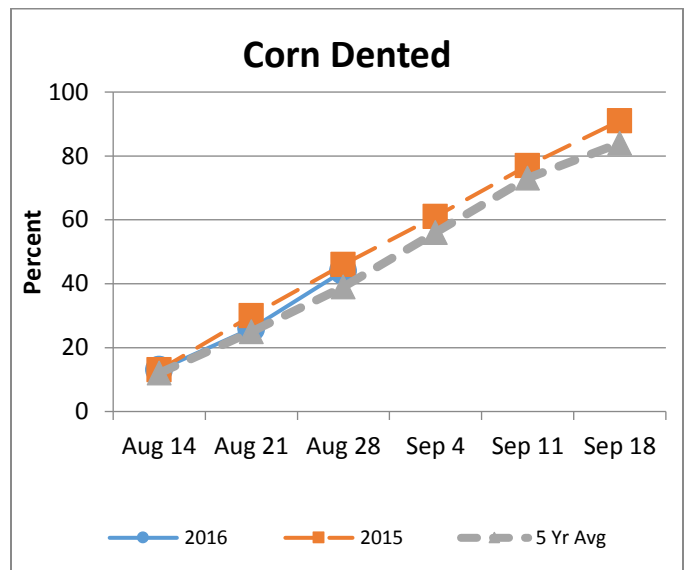

Week Brings Rains, Severe Weather

The state received varied amounts of rain along with strong winds and tornadoes that caused limited damage, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. The week started off dry, helping hay harvest and other field work. Scattered rains moved in by mid-week and lingered through the weekend. Western and northeastern portions of the state benefitted most. There were 5 days available for fieldwork for the week ending August 28th. Disease and insect pressure remained high for **corn** in many areas. Growers reported tip back on ears, the likely result of either unfavorable pollination conditions or early season nitrogen loss. **Soybean** progress continued to track along the five year average. **Hayfields** and **pastures** received a boost where rains were abundant.

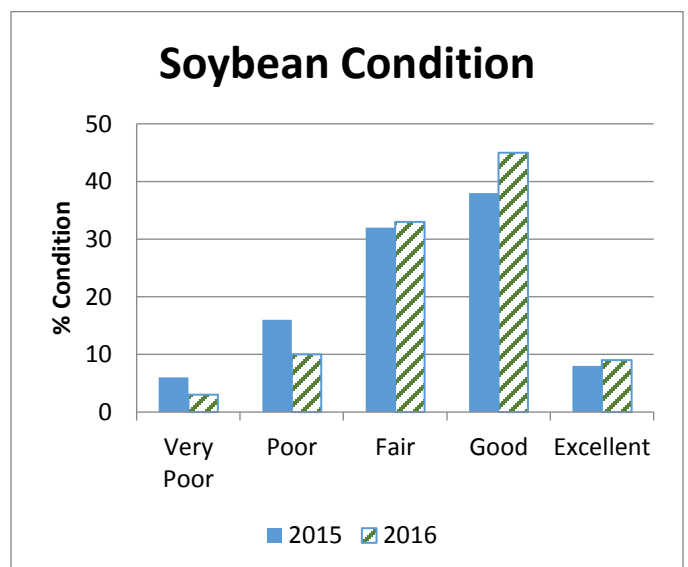

Soil Moisture: Week Ending 08/28/16

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	8	27	58	7
Subsoil moisture	11	29	56	4

Crop Progress : Week Ending 08/28/16

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
