

Ohio Crop Weather

Harvest Nearly Complete

Tillage and fall spraying activities are underway with most grain harvest complete, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. There were 6.3 days available for fieldwork for the week ending November 13. **Winter Wheat** and cover crops are progressing well with the benefit of above normal temperatures and adequate soil moisture. Moisture levels of corn harvested during the week decreased one percentage point to 17 percent.

Special Note:

NASS will be conducting our End-of-Season surveys on crops and hogs during the first two weeks in December. As farmers wrap up the 2016 growing season, NASS will conduct a series of surveys to determine final State and county acreage, yield, and production for crops, as well as grain storage capacity and grain stocks on hand. We are also asking pork producers about this year's farrowings, pig crop and current inventory. County level acreage, yield and production estimates are used by the Risk Management Agency to administer its crop insurance programs. All participating farmers should respond. Your information is important and helps ensure accurate results.
