

Ohio Crop Weather

OH-CW3117

July 31, 2017

Growers Get Break from Rains

Cooler and drier conditions allowed producers to complete some field work and harvest **hay**, straw, **wheat** and **oats**, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. There were 4.4 days suitable for fieldwork for the week ending July 30th. The dry weather was ideal for hay cutting, and the drying of soils made for better growing conditions. Many parts of the state experienced good conditions for the pollination of **corn**. Crop conditions remain steady, but **soybeans** are showing stress from earlier floods. There is still a great deal of variability in crop conditions. Central and southern Ohio received more rain on average, and minor localized flooding was observed in these areas. Aerial spraying of fungicide took place in areas where field access was still an issue. Harvest of commercial fruit and vegetable crops continued.

Soil Moisture: Week Ending 07/30/17

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
