Ohio Crop Weather

May 29, 2018

Planting Progress Continues

Despite spotty rain events, warmer temperatures allowed for some field activities to be completed, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. There were 4.0 days suitable for fieldwork in Ohio during the week ending May 27. Some rains stalled planting, but the week was mostly dry. High temperatures allowed producers to get out into the fields. **Corn** and **soybean** planting continued to go strong. **Winter wheat** is also maturing rapidly. **Hay** first cutting is starting to pick up in most areas. Crop conditions are good to excellent. Hay and **pasture** are also in good condition. Other activities this week included spraying, tillage, hauling manure, nitrogen application, and corn side dressing.

Soil Moisture: Week Ending 05/27/18

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	0	6	75	19
Subsoil moisture	0	4	74	22

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal. Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees fahrenheit. Climate normals used are for the 1981-2010 period.

Notice: Please be advised, the Weekly Crop Progress and Condition Report's weather station data table may be discontinued for budget reasons. This includes the possibility of discontinuing the weather graphics. Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. Crop progress and condition data will continue to be available in the Weekly Crop Progress and Condition Report.
