

Ohio Crop Weather

OH-CW2318

June 11, 2018

Planting Progress Back on Track

Planting progress moved closer to five year averages for most crops, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. There were 4.7 days suitable for fieldwork in Ohio during the week ending June 10. Fields and pastures had begun to dry out early in the week followed by rain showers later in the week. Producers who finished planting or who finished applying fertilizers and herbicides to fields during the first part of the week welcomed the rain. **Corn** planting wrapped up for most producers and **soybean** planting moved closer to completion as well. **Oats** were nearly all emerged and the crop reported to be in good to excellent condition increased over the previous week. **Winter wheat** condition remained similar to the previous week while intermittent wet weather proves challenging for those cutting **Hay**.

Soil Moisture: Week Ending 06/10/18

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
Topsoil moisture	0	5	72	23
Subsoil moisture	0	4	73	23

Crop Progress : Week Ending 06/10/18

Crop/Activity	Percent Completed

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal. Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees fahrenheit. Climate normals used are for the 1981-2010 period.

Notice: Please be advised, the Weekly Crop Progress and Condition Report's weather station data table may be discontinued for budget reasons. This includes the possibility of discontinuing the weather graphics. Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. Crop progress and condition data will continue to be available in the Weekly Crop Progress and Condition Report.
