

OH-CW2518

Ohio Crop Weather

June 25, 2018

Summer Season Starts with More Rain

Soybean fields have been planted and were on par with historical emergence despite extensive rain, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. There were 2.8 days suitable for fieldwork in Ohio during the week ending June 24. Some parts of the State received up to 6 inches of rain which produced flooding and ponding in low lying fields and pastures. Last week's continued wet weather made **Hay** cutting very difficult and forced some second cutting stands to pass ideal maturity. **Corn** was completely emerged; up from 96% last week. **Winter wheat** was 45% mature. Harvest was expected to begin in most areas this week as fields dry out. **Oats** were 82% headed last week and condition decreased slightly to 72% of the crop in good to excellent condition due to recent wet weather.

Soil Moisture: Week Ending 06/24/18

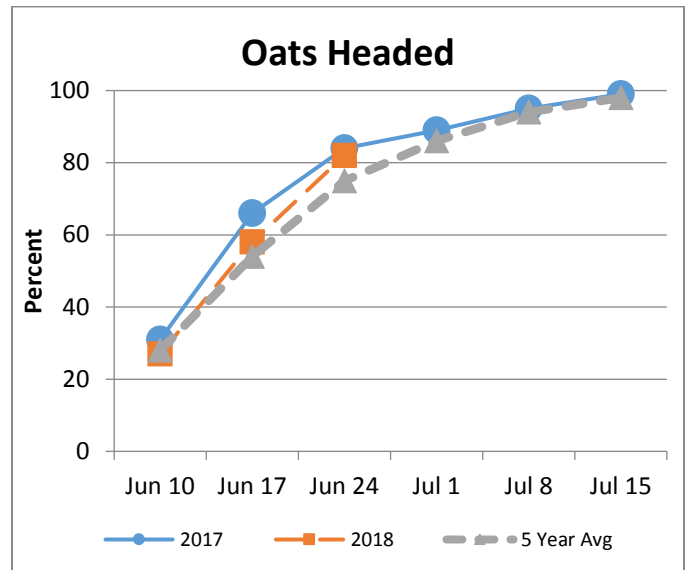

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	0	1	54	45
Subsoil moisture	0	1	59	40

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal. Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees fahrenheit. Climate normals used are for the 1981-2010 period.

Notice: Please be advised, the Weekly Crop Progress and Condition Report's weather station data table may be discontinued for budget reasons. This includes the possibility of discontinuing the weather graphics. Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. Crop progress and condition data will continue to be available in the Weekly Crop Progress and Condition Report.
