Ohio Crop Weather

July 2, 2018

Dry Weather Supports Crop Progress

Producers used the dry conditions last week to make headway with haymaking, straw baling, and other fieldwork, according to Cheryl Turner, State Statistician, USDA, NASS, Ohio Field Office. There were 4.2 days suitable for fieldwork in Ohio during the week ending July 1. High temperatures were ideal for wheat maturation, however, they caused stress to livestock. **Winter wheat** harvest was well underway. Lingering wet soil conditions and additional scattered storms last week caused some damage in crops fields. There were some reports of ponding in fields, flood damage, and yellowing of plants. **Soybean** emergence was nearly complete. Crop conditions remained mostly good to excellent.

Soil Moisture: Week Ending 07/01/18

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal. Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees fahrenheit. Climate normals used are for the 1981-2010 period.

Notice: Please be advised, the Weekly Crop Progress and Condition Report's weather station data table may be discontinued for budget reasons. This includes the possibility of discontinuing the weather graphics. Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. Crop progress and condition data will continue to be available in the Weekly Crop Progress and Condition Report.
