Ohio Crop Weather

July 9, 2018

Weather and Wheat Harvest Heat Up

Winter wheat harvest sped up during the week with help from warmer than average temperatures, according to Cheryl Turner, State Statistician with the USDA, NASS, Ohio field office. There were 5.1 days suitable for fieldwork in Ohio during the week ending July 8. High temperatures continued to be ideal for wheat maturation and harvest but also continued to dry out the soil. Scattered, heavy rains continued to miss most fields yet caused lodging of wheat and **corn** in others. **Soybean** blooming and corn silking continued to outpace 5-year averages with recent increases over normal growing degree days. **Hay** harvest was almost able to catch up to last year's progress thanks to the dry weather.

Soil Moisture: Week Ending 07/08/18

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	0	12	74	14
Subsoil moisture	0	7	78	15

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal. Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees fahrenheit. Climate normals used are for the 1981-2010 period.

Notice: Please be advised, the Weekly Crop Progress and Condition Report's weather station data table may be discontinued for budget reasons. This includes the possibility of discontinuing the weather graphics. Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. Crop progress and condition data will continue to be available in the Weekly Crop Progress and Condition Report.
