## Warm Weather Followed by Fieldwork

Temperatures were about 8 degrees above normal for the week, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. There were 2.8 days suitable for fieldwork in Ohio during the week ending April 14. Fields were still soft, but operators were able to spray weeds, spread manure, and apply top-dressings to fields before rain fell Sunday. Fruit trees were beginning to bud and winter damage assessments were being made. Cold season vegetables were reportedly going into the ground as soil temperatures began to increase. **Oats** were planted at a quick pace compared to the 5-year average while weather conditions allowed. **Winter wheat** continued to green up. Conditions improved slightly with 33 percent of wheat rated good to excellent condition.
