

Ohio Crop Weather

Wet Fields Slowed Progress

More precipitation than usual fell across the entire State last week and again hampered planting progress, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. There were 2.1 days suitable for fieldwork in Ohio during the week ending June 2. Temperatures were warmer than normal for the State but rain kept operators out of fields. **Corn** and **soybean** planting progress was slowed by wet soils again last week. **Wheat** and **oats** headed progress both lagged behind their 5-year averages. **Hay** and **pastures** were in good condition but forages could not be cut in many fields due to wet soils. Operators lucky enough to have dry fields were applying manure and spraying when possible.

Soil Moisture: Week Ending 06/02/19

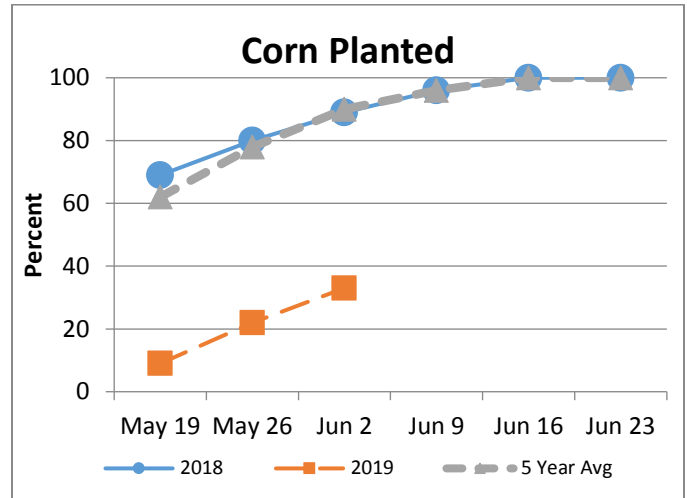

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	0	0	38	62
Subsoil moisture	0	0	38	62

Crop Progress: Week Ending 06/02/19
