

Ohio Crop Weather

Rain Held Back Planting Progress

Much of the State received higher than normal amounts of rain last week, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. There were 2.5 days suitable for fieldwork in Ohio during the week ending June 16. Temperatures slumped nearly 6 degrees below normal. **Corn** and **soybean** planted progress increased but were still well behind their 5-year averages. **Wheat** began to mature and was rated 65 percent fair to good condition. There were reports of **hay fields** and **pastures** that were difficult or impossible to mow due to increased soil moisture levels. Operators making haylage found it easier to stay on schedule than those making dry hay. First cutting progress for alfalfa and other hay also lagged behind their 5-year averages. **Oats** planted progress crept to 91 percent while oats reached the headed stage slower than the 5-year average.

Soil Moisture: Week Ending 06/16/19

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
Topsoil moisture	0	2	27	71
Subsoil moisture	0	1	29	70

Crop Progress: Week Ending 06/16/19

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
