# Ohio Crop Weather

July 22, 2019

## Timely Rains Support Progress

Scattered rain events were beneficial to crops affected by recent extreme hot dry weather, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. There were 4.8 days suitable for fieldwork during the week ending July 21.

Wet conditions prevented some field activities. **Corn** and **soybean** conditions were still mostly fair.

**Wheat** harvest progress remained slightly behind last year and the 5-year averages. Producers were waiting for dryer conditions to complete harvesting. **Oat** harvest began in some areas. Early in the week, conditions were adequate for harvesting before most areas received some rainfall. **Hay** continued to be cut and baled. First cuttings were complete and second cuttings were progressing well. Pasture and range conditions were mostly fair. Some pastures showed signs of stress before the rain.
