

Ohio Crop Weather

Warm Temperatures and More Rain

Rain fell and fields remained too wet for most equipment, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Temperatures averaged 4 degrees higher than historical normals and the entire State averaged about an inch of rain. There were 2.0 days suitable for fieldwork during the week ending April 12.

Oats planted progress jumped to 24 percent complete last week despite the short window for fieldwork. Other field activity was limited and ranged from manure hauling, spraying weeds, to tiling fields. Top dressing of winter wheat with nitrogen continued although consistent rain threatened to wash away application effectiveness. Hay fields and pastures continued to slowly green up even as soil moisture levels remained mostly surplus.
