Ohio Crop Weather

June 15, 2020

Dry and Warm Weather Continues

A variety of field activities continued due to dry and warm weather, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. While warm windy weather created ideal conditions for making dry hay, windy conditions also may have negatively impacted some crops. In addition, armyworms negatively impacted crops, causing damage to wheat, other small grains and hay fields. Average temperatures for the week were approximately 1 degree above historical normals and the entire state averaged close to a half inch of precipitation. There were 5.8 days suitable for fieldwork during the week ending June 14.

Farmers worked on spot planting, tilling, spraying herbicides, side-dressing corn, and cutting hay. **Topsoil moisture** decreased from 12 percent surplus last week to 5 percent surplus this week. **Soybean** planting progress was 93 percent, ahead of the five-year average by 10 percentage points. **Corn** planting progress was 6 percentage points ahead of the five-year average at 98 percent. Sixty-three percent of corn was considered good or excellent and 73 percent of pasture and range was considered good or excellent compared to 55 percent the previous year.

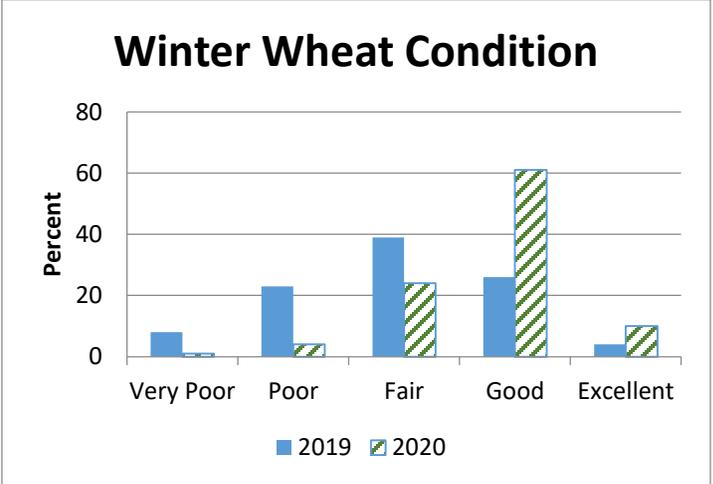

Soil Moisture: Week Ending 06/14/20

| Item | Very short | Short | Adequate | Surplus |
|------------------------|------------|-----------|-----------|-----------|
| | (percent) | (percent) | (percent) | (percent) |
| Topsoil moisture | 1 | 24 | 70 | 5 |
| Subsoil moisture | 0 | 12 | 79 | 9 |

Crop Progress: Week Ending 06/14/20

| Crop/Activity | Percent Completed | | | |
|-------------------------------|-------------------|-----------|-----------|----------------|
| | This week | Last week | Last year | 5 Year average |
| Days Suitable for Fieldwork | 5.8 | 5.2 | | |
| Corn Planted | 98 | 94 | 63 | 92 |
| Corn Emerged | 86 | 73 | 45 | 84 |
