

Ohio Crop Weather

Dry Weather Returns

Low amounts of precipitation made way for more field activity throughout the week, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Topsoil moisture conditions were rated 88 percent adequate to surplus by week's end, down 3 percentage points from the previous week. Average temperatures for the week were 4.8 degrees above historical normals and the entire State averaged 0.7 inches of precipitation. There were 6.2 days suitable for fieldwork during the week ending November 8.

During the week, farmers hauled manure and harvested crops. **Soybeans** were 87 percent harvested by week's end, four percentage points less than the five-year average of 91 percent, while soybeans moisture content was at 13 percent. **Corn** harvested was at 64 percent compared to the five-year average of 76 percent. Corn moisture content decreased by 2 percentage points to 20 percent. **Winter wheat** planted reached 100 percent. Fifty-one percent of corn was rated good to excellent condition compared to 37 percent the previous year and 68 percent of winter wheat was rated good to excellent condition.

Soil Moisture: Week Ending 11/08/20

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
