Ohio Crop Weather

April 24, 2023

Cool and Cloudy as Oats and Wheat Advanced

Farmers prepared their fields for planting ahead of scattered storms late last week, according to the USDA NASS, Great Lakes Regional Field Office. Reporters commented that field conditions were largely favorable, but last week's temperature fluctuations deterred farmers from planting. Topsoil moisture conditions were rated 5 percent short, 84 percent adequate, and 11 percent surplus. Statewide, the average temperature for the week ending on April 23 was 51.9 degrees, 0.8 degrees below normal. Weather stations recorded an average of 0.97 inches of precipitation, 0.18 inches above average. There were 4.3 days suitable for fieldwork during the week ending April 23.

Oats were 61 percent planted and 19 percent emerged. **Winter wheat** advanced to 69 percent jointed and winter wheat condition was rated 63 percent good to excellent, consistent with the previous week. **Corn** and **soybeans** each reached 6 percent planted. Fieldwork included manure hauling, pre-emergence spraying, tillage, and tiling. Wheat stands showed favorable development, with greening completed in many counties. Despite last week's frost, blooming fruit trees in the northern tier of the State were widely spared from damage. Farmers reported that livestock were in good health and performing well, grazing on green pasture.

Soil Moisture: Week Ending 04/23/23

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	0	5	84	11
Subsoil moisture	0	5	79	16

Crop Progress: Week Ending 04/23/23
