

Ohio Crop Weather

OH-CW2623

June 26, 2023

Crop Conditions Improved

Storms last week delivered timely moisture to crops, according to Ben Torrance, State Statistician, USDA NASS, Ohio Field Office. The most recent U.S. Drought Monitor report showed 80.2 percent of the State as abnormally dry or worse, an improvement over last week's 96.4 percent rating. Conditions matching the moderate drought rating were observed in 32.9 percent of the State. Topsoil moisture conditions were rated 5 percent very short, 28 percent short, 63 percent adequate, and 4 percent surplus. Statewide, the average temperature for the week ending on June 25 was 70.1 degrees, 0.7 degrees below normal. Weather stations recorded an average of 0.70 inches of precipitation, 0.15 inches below average. There were 4.5 days suitable for fieldwork during the week ending June 25.

Last week, weed suppression, side dressing for row crops, and limited soybean replanting kept farmers in fields. Severe storms, tornadoes, and hail contributed to crop damage in the northern tier of the state. **Corn** and **soybean** condition were each 66 percent good to excellent, both up from the previous week. **Winter wheat** was 55 percent mature and 1 percent harvested for grain. Winter Wheat crop condition was rated 60 percent good to excellent, up from the previous week. **Oats** were 78 percent headed. Crop condition for oats was rated 67 percent good to excellent, down from the previous week. First cuttings of **alfalfa and other dry hay** were 99 and 98 percent completed, respectively. Second cuttings of alfalfa were 25 percent complete, and second cuttings of other hay were 11 percent complete. **Pasture and range** condition was rated 54 percent good to excellent. Livestock were reported to be doing well.
